Dr. Sean Carrington is a Barbadian Professor of Plant Biology at the University of the West Indies, Cave Hill Campus, and formerly served as Dean of the Faculty of Pure & Applied Sciences. He studied at the University of Edinburgh (Scotland) (B.Sc.) and at the University of York, UK (D. Phil.).

His recent work has focused on plant cell wall biochemistry, the post-harvest physiology of fruits, as well as on Caribbean wild plants and their uses.

He is internationally recognized for his knowledge of Caribbean flora. In particular, he is renowned for the books *Wild Plants of Barbados* and *Wild Plants of the Eastern Caribbean*. He is also lead author on the *A-Z of Barbados Heritage*.

The BITS Program gives a heartfelt thank-you to Prof. Carrington for his participation in teaching the Horticulture course in 2015.
