

**Dr. Krueger's Presentation, May 16<sup>th</sup>, 2014 11:00AM – 12:30PM**

Title: Personality in DSM-5

Objectives:

1. Describe major aspects of the history of psychiatric classification that led to the approach taken in DSM-IV
2. Convey notable changes between DSM-IV and DSM-5, such as the removal of the multi-axial system
3. Explain the DSM-IV (copied in DSM-5 Section II) and DSM-5 Section III approaches to classifying personality disorders, and the conceptual underpinnings of these approaches
