Mary H Brown Endowment Fund Proposals
Suggestions for Preparing a Successful Application

Successful projects in the past have included most or all of the following elements:

☐ Create links with other McGill departments, organizations, or student groups.

☐ Have an impact on students, including those beyond the project applicants.

☐ Involve students in sensitization and educational events.

☐ Engage groups of students with local communities.

☐ Request a modest vs. a large budget.

☐ Explains the potential for the project to be ongoing and to receive alternate sources of funding in the future.

Projects less likely to receive support through this fund include those

☐ under the jurisdiction of, and already funded by a student association, although co-sponsorships are eligible

☐ that include research or academic issues that should be funded at the departmental or Faculty level

☐ that benefit only individual students (e.g., funding for taking a course or travel)

☐ that request upgrading or improvements to equipment, furnishings or physical space (interior or exterior)

☐ that cover costs pertaining to an hourly wage, salary or honoraria.
