

Approved Courses for Freshman Students:

www.mcgill.ca/oasis/ba/freshman/approved

Please visit this website to review
all courses that a U0 Freshman student
is approved to take.

Economics Approved Courses

ECON 199 FYS: Aspects of Globalization
ECON 205 An Intro to Political Economy
ECON 208 Microeconomic Analysis&Applic
ECON 209 Macroeconomic Analysis&Applic
ECON 219 Current Econ Problems:Topics
ECON 223 Pol Economy of Trade Policy
ECON 225 Economics of the Environment

U0 students interested in economics should
take ECON 208 and ECON 209. These courses
provide good preparation for the honours and
major programs, although neither course is a
prerequisite for either program and do not
count towards either program.

The first year of microeconomics courses for
the Honours program (ECON 250D1/ECON
250D2) and for the Majors program (ECON
230D1/ECON 230D2) should not be taken in
the U0 year.

Information for Arts Freshman U0 Students Interested in Economics

**Department of Economics
McGill University**

Introduction

McGill's Department of Economics offers a range of programs suited to the needs of students with a variety of interests.

Some programs are designed for students who wish to make economics their main area of study, others for those who wish to specialize in two main fields. It is also possible to follow a sequence of economics courses while specializing in another discipline, or as part of an interdisciplinary program.

Economics programs require that students learn a core of economic theory and quantitative methods. The depth to which these topics are studied varies considerably across the different programs.

Students use the theory and quantitative methods they have learned and extend it in the study of different fields of economics, such as labour, public finance and economic policy, money and banking, environment and natural resources, international trade, economic development, economic history, and industrial organization.

The better the student's grasp of economic theory and quantitative methods, the more deeply fields of particular interest can be studied.
