RESEARCH ASSISTANT NEEDED
We are looking for a Research Assistant to help with a pilot study investigating exposure to chemicals among Montreal firefighters. This is a unique opportunity to be directly involved and gain experience with field research. The successful candidate will assist with the development of questionnaires, human subject protocols and Standard Operating Procedures (SOPs) as well as the development and maintenance of databases and administration of interviews. Other duties will include conducting literature reviews and assisting with PowerPoint presentations.

QUALIFICATIONS
* PhD student in epidemiology or related field. Will consider MSc or MPH student or graduate with experience.
* Excellent understanding of the research process
* Excellent written and oral communication skills in French and English
* Interest in the field of environmental/occupational health and in hands-on field research
* The ideal candidate is resourceful, street-smart, motivated, solution- and detail-oriented
* Experience developing questionnaires, human subjects protocols, SOPs, relational databases and/or conducting interviews not required but an asset

TIME COMMITMENT
About 10-15 hours per week, starting this spring and continuing through the fall semester.
