Statistical Consultant – Pediatric Residency Program

The pediatric residency program at the Montreal Children’s Hospital seeks a statistical consultant to work with residents on their research projects. The consultant will provide support and guidance on planning and analysis of research studies. Approximately 15-20 residents per year undertake a research project, and each resident will be entitled to five hours of consultation time on their research project, for a total of approximately 100 hours of consultation time per year.

Consultant tasks include:

- Meeting with residents to discuss statistical issues in research
- Review of protocols/analysis plans
- Advising residents on software and data analysis

Qualifications:

- Enrolment in a MSc or PhD program in Biostatistics, Statistics, or Epidemiology
- Experience with data analysis and consulting
- Experience with clinical research is an asset.

Salary is $20/hour; the position will run through the department of Pediatrics at McGill.

Interested candidates should send a CV and cover letter to Dr. Robert Platt at robert.platt@mcgill.ca.
