CASUAL RESEARCH ASSISTANT NEEDED
(Please forward to any interested party)

We are looking for a Casual Research Assistant to help with a project to study privacy-preserving statistical methods, applicable to drug safety networks and pharmaco-epidemiology. This is a unique opportunity to be involved in an emerging and cross-disciplinary research area and could potentially be extended as a dissertation topic. The successful candidate will assist with literature review, simulation study and presentation. The student will be invited to be a co-author on any publications that may arise from this work.

QUALIFICATIONS
The ideal candidate
- Should be motivated, solution- and detail-oriented
- Should be interested in the following research areas: data privacy, post-marketing surveillance of pharmaceutical drugs, statistical computing
- Is a PhD student in Biostatistics or related field (I will consider MSc student with experience)
- Should have excellent understanding of the research process
- Should have excellent written and oral communication skills in English

TIME COMMITMENT
About 10 hours per week, starting this winter (2016) and continuing through fall.

SALARY
Minimum $14.90/hr, negotiable depending on experience and academic level.

TO APPLY
Contact Dr. Paramita Saha Chaudhuri at paramita.sahachaudhuri@mcgill.ca. Send a CV and a short statement of interest.
