<u>**Analytical Training Consultant - Toronto, ON Permanent/Full-Time**</u>

Summary:

Designs, develops and delivers standard and custom advanced analytical technical training courses. Prepares and delivers mentoring services for customers, partners, and/or employees to increase their knowledge of advanced analytics and the operation and features of the company's analytical products and solutions.

Responsibilities:

• Delivers analytical courses, mentoring services, and workshops at SAS training centers, customer sites and/or via live web.
• Designs and develops analytical training products; conducts extensive research to identify new course topics related to advanced analytics methods and how to apply the methods to specific scientific or business applications.
• Assists other analytical training consultants in workshop sessions for training courses, including advanced courses.
• Serves as subject matter experts to sales and consulting for analytical concepts, methods, and applications.
• Provides feedback to Research and Development regarding software quality issues and recommends enhancements.
• Reviews and edits documentation for the Division and other divisions as needed.
• Works with customer and other functional areas within the company to develop and contribute to the development and preparation of training materials.
• Works on special projects, which may include internal and external advanced analytical consulting projects, independently or under the direction of a more senior analytical training consultant or a project leader.
• Acquires subject matter expertise necessary to relate advanced analytical methods to specific scientific and business applications
• Develops and teaches basic and some intermediate level statistical and other analytical courses
• Assists the manager with developing analytical training curriculum

Requirements:

• Advanced presentation, interpersonal communication and organizational skills, including the ability to effectively communicate with users with various technical backgrounds
• Ability to travel six to ten days per month with occasional weekend travel
• Broad knowledge of training methodologies, curriculum development, and training media
• Extensive knowledge of statistics using the SAS System or comparable analytical tool

• Broad knowledge of company's products and application areas; proficient in the use of SAS analytical products
• Ability to write and edit technical material and relate analytical concepts and applications to analytical and non- analytical SAS users
• A seasoned, experienced professional with a full understanding of area of specialization; resolves a wide range of issues in creative ways.
• PhD in Statistics or closely related field.
• Four years' experience analyzing data and/or teaching, including at least three years' experience using SAS analytical products (includes but not limited to base SAS, SAS/STAT, JMP, Enterprise Miner, and Forecast Studio).
• Public speaking or classroom teaching experience using SAS software products or solutions for advanced analytical methods.
