

Job offer in biostatistics:

Title: Statistical consultant

Location: Douglas Mental Health University Institute,

6875 Boulevard LaSalle
Arrondissement Verdun
Montreal, H4H 1R3

Description: The Douglas Mental Health University Institute is affiliated with McGill University and the World Health Organization. It is an international leader in care, research and teaching in mental health. It provides specialized services within a continuum of care and contributes to the advancement of knowledge and best practices through state-of-the-art research and teaching.

The Institute is in the process to open a new statistical consultation service for the researchers and students of the three main divisions (clinical, neuroscience and psychosocial). We are looking for a full time statistical consultant who will provide statistical support in the planning of the experiments, data preparation and statistical analyses. There will also be some opportunities for working on collaborative research projects with some researchers.

Requirements: MSc in statistics

At least 2 years of experience in statistical consultation or equivalent

Excellent communication skills (oral and written English)

Ability to work as part of a team

Conditions: One year contract (renewable)

Salary to be agreed

Working hours to be agreed

Contact: Dr. Aurélie Labbe. Email : aurelie.labbe@mcgill.ca
