RATIONALE: Many specialized courses are given by our department as Topics courses. Giving them slot status allows us to cut down on the number of such courses with the same title. For example, Topics in Analysis 1 to 6 is being cut down to Topics in Analysis 1 and 2 (to allow two such courses to be given in the same semester). Some freed numbers are being retitled in a more specific way which will carry more information both in the Calendar and on transcripts. Even with the introduction of some of these more specific titled topics courses, 21 courses are being retired.
