Learn about pitfalls to avoid, and how to gain maximum information from precious low-input RNA and DNA samples…

D-MARK BIOSCIENCES presents:
Advances in Next Gen Sequencing for Cancer Genomics

“With the high cost of gene expression studies, and the complexity of NGS, it is important to identify key steps in the workflow to maximize your success”

When: Tuesday July 5th, 11am to 12pm
Where: Goodman Cancer Research Center, 501
RSVP *Pizza lunch to follow in the atrium

D-MARK Biosciences is a solutions-based provider, bringing the most innovative, next generation molecular research tools to Canadian laboratories.
