Assistant Professor

Faculty of Medicine – Department of Surgery / McGill University Health Centre (MUHC)

Position description

The Department of Surgery at McGill University is currently inviting applications for a tenure-track faculty position in the field of Surgical Education at the rank of Assistant Professor.

The successful candidate will guide the research mission of our surgical education program across all McGill teaching hospitals, research institutes and at the University, will develop their own research program, and will play a key role in our Surgical Education/Simulation Concentration in the Experimental Surgery Graduate Program. They will also play an important role in advancing the research component of the Steinberg Centre for Simulation and Interactive Learning by mentoring health care professionals in their research efforts.

The McGill Department of Surgery is internationally recognized for excellence in surgical education and is committed to advancing the field through generation of new knowledge and development of future surgical educators. It is supported by excellent facilities such as: the new Centre for Innovative Medicine at the McGill University Health Centre with its Experimental Operating Room and adjacent Simulation Suite; the DeKuyper Centre for Surgical Education dedicated to the use of multimedia, social media and web-based educational platforms; the Steinberg-Bernstein Centre for Minimally Invasive Surgery and Innovation that emphasizes the role of simulation in minimally invasive and endoscopic surgery; the Steinberg Centre for Simulation and Interactive Learning at McGill University whose vision is “Inspiring world-class simulation-based education, research and innovation to provide the best possible health care to the communities we serve” and the McGill Centre for Medical Education dedicated to the promotion of excellence and scholarship across the continuum of health sciences education.

Job Duties

The successful candidate is expected to perform original research, publish and win competitive research funding in the area of Surgical Education, the use of Simulation in Education, and technology evaluation and validation related to surgical education and simulation. The successful candidate is expected to create and deliver graduate teaching in this and related areas, to supervise graduate students in Experimental Surgery whose research is directed at Surgical Education and Surgical Innovation, to be responsible for the organization of workshops and
faculty development, and to contribute to the academic mission of the Department of Surgery. The successful candidate will also be involved with the advancement of the research activities of the Steinberg Centre for Simulation and Interactive Learning at McGill University, the hub of medical simulation across all health professions at McGill University.

Qualifications and Education requirements

The individual shall hold a PhD relevant to their research area, demonstrate a record of excellence in research and teaching, including significant publications and a record of competitive extramural funding with a focus in medical education, preferably directed at simulation-based education with some experience in surgical, procedural or team-training topics.
