Health Reform UPDATE –

This slide shows the regrouping of our RUIS McGill health partners in 6 of our major regions.

Our 3 RUIS McGill health partners in the North, Nunavik and Bay James remain unchanged.
Accreditation UPDATE —

Tremendous thanks to all involved. Formidable task, especially with Quebec health reform, MUHC hospital move and continued rollout of the new UGME curriculum.

UGME waiting for final report, but action plan is in place.

For UGME, LCME-CACMS survey team highlighted strengths, including launch of new UGME and strong culture of commitment and dedication among faculty and staff. Also areas for improvement.

Examples of UGME priority items include: establishing detailed timetables for Faculty’s strategic milestones; demonstrating effectiveness of new UGME curriculum “service-learning” component; developing more detailed minutes following curriculum meetings; transferring mapping of educational objectives into newly acquired software; improving communication of objectives to students and residents.

Majority of actions to be completed by the fall of 2015.

In support of these efforts, you may be called on help.

Awaiting CPD; Peds to do an internal survey by April 2016; Neo, no more follow-up until 2018 (only regular progress reports); Clinical Investigators report pending.
Faculty Research News, EXCELLENT NEW FOR US –

On Friday, May 29, the Canadian government announced a national investment of $333 million for research infrastructure through the Canada Foundation for Innovation (CFI). Ten projects submitted by McGill and its hospital-affiliated research institutes have received a total of $30 million in funding, which will be matched by the Government of Quebec.

This is fantastic news for the Faculty, with the majority of its projects accepted, including:

- Kathleen Cullen, Targeted Manipulation of Neural Microcircuits for Understanding and Correcting Brain Dysfunction; $2,407,815
- Michael Meaney, Treatment Outcomes in Mood Disorders; $1,157,277
- Morag Park, Targeting the Tumour Microenvironment: Bridging Basic Science and Therapy; $2,389,840
- Alain Ptito, Sensing and repairing the injured brain: tools and methods for the characterization of brain injury and repair; $2,995,246
- Amir Shmuel, Québec Centre for High-Field Brain Imaging; $7,516,327

CONGRATULATIONS!!!
SRP UPDATE –

Implementation of the SRP began in June 2014.

There will be a meeting of the Steering Committee in June 2015, where implementation progress will be reviewed.

Some implementation highlights included:

• Completed review of MD/PhD Program. M. Eisenberg recruited as Director. A Business plan for the program in place.
• New Public & Population Health program was proposed. As part of Population Health, M. Pai recruited as head of Global Health program. Strategic and financial plan for program in place.
• Received $4M from Merck for Translational Research, which was used to fund about 12-14 proposals in the first part of the competition.
• Will receive $1.4 M back from McGill Central to support core facilities. Competition organised by S. Baum. Funding decisions will be taken soon. Another competition in three months.
• Neuroscience selected as top priority for CFREF. Application put forward by University for $102 M over 7 years.
Many, many accolades!
