

Environmental Biology Seminar Series

Department of Natural Resource Sciences

Winter 2022 All are welcome!

Thursdays Seminar 11:45-12:45

<https://mcgill.zoom.us/j/81084048030?from=addon>

Feb 03rd Drs. P. Withers, K. Forbes, S. Rothwell, J. Martin-Ortega

University of Leeds and Lancaster University, UK

Rephokus: Sustainable stewardship for national and catchment phosphorus dynamics in the UK;

Host: Christopher Lyon

Feb 17th Dr. Natasha Gownaris — Gettysburg College

Intraspecific Variation and the Ability of Populations to Adapt to Rapid Environmental Change;

Host: Elliot Lab

Mar 24th Dr. Marta Berbés-Blázquez — Arizona State University

Nature-based solutions for urban futures

Host: Bennett Lab

April 7th Dr. Jill Olin — Michigan Tech University

Species- and food web-level responses to environmental stressors using dietary biomarker and ecological modeling

Host: McKinney Lab

NRS seminar organizing committee:
Cynthia Kallenbach, Jessica Gillung, Aurelie Harou
