

Assistant Professor in Pharmacology and Therapeutics

Faculty of Medicine – Department of Pharmacology and Therapeutics

Position description

McGill University is seeking candidates for a tenure-track position at the Assistant Professor level to be appointed in the Department of Pharmacology and Therapeutics in the Faculty of Medicine.

The successful applicant is expected to develop an independent research program and work in a multidisciplinary research environment. Research interests should complement existing areas within the Department of Pharmacology and Therapeutics including: (i) translational pharmacology; (ii) quantitative molecular and cellular imaging; (iii) genome editing and (iv) development and applications of new drug delivery systems. For a complete list of research areas, please see: <http://www.mcgill.ca/pharma/research/research-areas>

The Department of Pharmacology and Therapeutics at McGill University is a research-intensive, student-centered unit committed to offering excellent educational opportunities to undergraduate and graduate students, as well as postdoctoral fellows. Founded in 1824, the modern Department is engaged in innovative biomedical research. The Department addresses wide-ranging research questions concerning basic biological mechanisms. The classical fields of pharmacodynamics and toxicology are strongly represented; unique strengths include research in the areas of nanomedicine, disease diagnostics, and drug delivery.

McGill University is a leading Canadian university, consistently ranked among the top universities in the world. It is located in downtown Montreal, a lively city with high quality of life and access to arts, culture and sports.
