| **Planned Start  Date & End Date:** | June 15, 2017 to June 14, 2018 |
| **Date of Posting:** (post for 5 working days minimum) | May 1, 2017 |
| **Deadline to Apply:** | June 1, 2017 |

## PRIMARY DUTIES

The laboratory conducts both basic science research and clinical research: this position is for someone primarily interested in working in clinical research. The candidate will collaborate also with the Mood Disorders Clinic of the MUHC and the McGill Departments of Epidemiology and Biostatistics.

The casual research assistant will be expected to:
1. Help to finalize a meta-analysis of adolescent cannabis use as a risk factor for depressive symptoms
2. Work to recruit patients from the Mood Disorders Clinic for a study on endocannabinoid levels and depression.
3. Manage a computerized database of the endocannabinoid study
4. Assist the Principal Investigator in lab coordination and research daily duties.
5. Any other research activities designated by the Supervisor

## EDUCATION/EXPERIENCE

- A Bachelor's degree in a scientific field

## OTHER QUALIFYING SKILLS & ABILITIES

The candidate should have strong problem-solving abilities and scientific reasoning. He/she should be highly organized. He/she should have the ability to multi-task, and the ability to prioritize, meet deadlines and juggle several tasks at once. Attention to detail is essential. The candidate should be fluent in English and preferably French.

## HOW TO APPLY

**Please submit your application to:**
Please submit your curriculum vitae to gobbilab.psychiatry@mcgill.ca

*McGill University is committed to equity in employment and diversity.
