

# SPUTNIK and US

Friday, October 5  
4 pm

**FREE**

Redpath Museum Auditorium  
859 Sherbrooke St. West  
McGill University  
Metro: McGill/ Peel    Bus: 24

*A Freaky Friday to mark 50 years since the first satellite orbited earth: A presentation by Canadian Space Agency representatives followed by a *Sputnik and Sons* skit and concluding with planet gazing and lunar rock examination.*

Join us along with Canadian Space Agency engineers Bruno Blais and Stephane Corbin to learn about Canada's important role in space. After the presentation you can view a bit of space on the front field through the telescopes of the Royal Astronomical Society or closely examine lunar rocks collected by Apollo missions.

For information about star and planet gazing contact the President of the Royal Astronomical Society: Andrew Fazekas at 514-620-1672 or [andrew.fazekas@sympatico.ca](mailto:andrew.fazekas@sympatico.ca).

*Sponsors:* Redpath Museum, the Dean of Science,  
the Royal Astronomical Society of Canada  
and the Canadian Space Agency
