13.1 The Faculty

Mission statement: The Faculty of Agricultural and Environmental Sciences is committed to excellence in teaching, research and service to ensure that humanity’s present and future food, health and natural resource needs are met while protecting the environment.

13.1.1 Location

McGill University, Macdonald Campus
21,111 Lakeshore Road
Sainte-Anne-de-Bellevue, QC H9X 3V9
Canada

Telephone: (514)398-7928
Website: www.mcgill.ca/macdonald

The Faculty of Agricultural and Environmental Sciences and the School of Dietetics and Human Nutrition are located on the Macdonald Campus of McGill University in Sainte-Anne-de-Bellevue at the western end of the Island of Montreal.

Served by public transport (STM, bus and train), it is easily reached from the McGill downtown campus and from Dorval (Pierre Elliott Trudeau) International Airport. A McGill intercampus shuttle bus service is also available.

13.1.2 Administrative Officers

Deborah J.I. Buszard; B.Sc.(Bath), Ph.D.(Lond.) Dean, Faculty of Agricultural and Environmental Sciences, and Associate Vice-Principal (Macdonald Campus)

William H. Hendershot; B.Sc.(Tor.), M.Sc.(McG.), Ph.D.(U.B.C.) Associate Dean (Academic)

David J. Lewis; B.Sc., M.Sc., Ph.D.(Mem.) Associate Dean (Student Affairs)

Marcel J. Couture; B.Sc.(Agr.)(McG.), M.Sc.(Guelph) Associate Dean (Community Relations)

Marc G. Fortin; B.Sc., M.Sc.(Laval), Ph.D.(McG) Associate Dean (Research)

Gary O’Connell; B.Comm.(C’dia) Director, Administrative Services

Suzanne Higgins; B.A.(McG.) Manager, Admissions and Student Affairs

Philip Lavoie; Dip.Agr., B.Sc.(Agr.)(McG.) Manager, Macdonald Campus Farm

Ginette Legault Manager, Campus Housing
13.1.3 Programs
The Faculty of Agricultural and Environmental Sciences and the School of Dietetics and Human Nutrition offer degrees in Bachelor of Science in Agricultural and Environmental Sciences, Bachelor of Engineering in Bioresource Engineering, Bachelor of Science in Food Science, Bachelor of Science in Nutritional Science, Certificate in Ecological Agriculture, Certificate in Entrepreneurship, Diploma in the Environment, and Diploma of Collegial Studies in Farm Management and Technology.

The Faculty of Agricultural and Environmental Sciences is one of the three faculties in partnership with the McGill School of Environment.

Several programs offered by the Faculty and School lead to professional accreditation. These include Dietetics (membership in the Dietitians of Canada and the Ordre professionnelle de diététistes du Québec); Agricultural Economics, Agricultural Sciences, Agricultural Sciences Internship, Animal Science and Plant Science (membership in the Ordre des agronomes du Québec and other provincial Institutes of Agriculture); Bioresource Engineering (membership as a professional Engineer in any province of Canada plus the Ordre des agronomes du Québec). Professional Practice experiences to complete the dietetics practicum are provided in the McGill teaching hospitals and in a wide variety of health, education, business, government and community agencies.

The Faculty also offers M.Sc. and Ph.D. programs in the areas of Agricultural Sciences, Biological Sciences, Bioresource Engineering, Environmental Sciences, Food Science, and Nutritional Sciences. In addition, a Graduate Certificate in Biotechnology and a Graduate Diploma in Dietitian Credentialing are offered.

The Institute of Parasitology offers graduate programs leading to M.Sc. and Ph.D. degrees as well as a non-thesis M.Sc.(A) in Biotechnology and a Graduate Certificate in Biotechnology. Major areas of research include the molecular biology, immunology, and population biology of parasites and their hosts and the biochemical pharmacology of antiparasite drugs. The underlying orientation of all research is to apply relevant modern biological techniques to reduce parasite transmission and to improve methods of diagnosis and control. The research background and activities of the staff encompass many disciplines applied to the study of host-parasite interactions of protozoa and helmith parasites of humans, livestock and other animals, as well as cancer biology. The Institute has been designated by the Quebec Government as a Centre for Host-Parasite Interactions.

13.1.3.1 Internship Opportunities and Co-op Experience
All students in agricultural programs have the opportunity to participate in a summer-long internship on a farm or related agricultural enterprise. Students who register in the Agricultural Sciences Internship Program benefit from two summers of internship experience. Study facilities are available, on request from the Curator, Morgan Arboretum.

Most undergraduate programs offered in the Faculty include the opportunity for a Co-op work experience. Internships and Co-op experience both involve a work placement of a minimum 12 weeks' duration where the student is exposed to the main areas of operation of the employer. Each work placement is unique, and the student benefits from a program developed by both the employer and the instructor exclusively for that student.

Students who register for a Co-op experience benefit from practical learning arising from work-term employment in a meaningful job situation. Students also benefit from the non-tangible learning experience arising from the increased responsibilities required to obtain and successfully complete the work term. Students have the opportunity to pursue a 6 credit internship within the Barbados and Panama Field Studies semesters. For details, see www.mcgill.ca/mse/field_study.

13.1.3.2 Exchange Programs
The Faculty of Agricultural and Environmental Sciences participates in all university-wide student exchange programs available at McGill and also has faculty-specific exchange programs. For more information, please see section 15.2 “Exchange Programs”.

13.1.4 Macdonald Campus Facilities
Morgan Arboretum
The Morgan Arboretum has 245 hectares of managed and natural woodlands, fields and tree plantations used for environmental research and teaching in a wide range of courses. Groups of most Canadian native trees and many useful and important exotics are also present. The Arboretum features three self-guided interpretation trails, 20 kilometres of wooded trails, a variety of forest ecosystems, soil and water conservation projects, forest operations such as plantation management, timber harvesting and maple syrup production, and related forestry-wildlife ecological activities. A nature interpretation program is also offered.

Macdonald Campus Library
Located in the Barton Building, the Macdonald Campus Library’s collection encompasses a wide variety of resources in agriculture, food and animal science, nutrition, entrepreneurship, the environment, ecology, plant science, and biotechnology. The library is a depository for many print and electronic government publications. All computers provide access to the on-line catalogue (MUSE), databases, electronic journals and resources, as well as the Internet. In the electronic classroom, students can do research, write papers, and save documents. The library is a wireless zone allowing students to use laptops that have wireless network interface cards. There are designated areas in the library that allow laptops to connect to the McGill server and Internet via VPN (Virtual Private Network). Students can request articles or books through the interlibrary loan service; the forms are available on-line. Reference service is available to assist users in obtaining necessary print or electronic resources, and a comprehensive library instruction service is provided throughout the year. For further information about Macdonald Campus Library visit the Website at www.mcgill.ca/macdonald-library or feel free to drop by.

Macdonald Campus Computing Centre
The Macdonald Campus Computing Centre is responsible for a multi-platform network of Novell and Windows servers. Housed in the Macdonald-Stewart Building, the complex has 3 undergraduate labs open 24/7. 15 public e-mail stations around campus and a first-level help desk during regular work hours. Apart from supporting the staff and student servers, the centre is also the gateway to the many services offered from the downtown campus such as e-mail, WWW, and library systems. Visit the virtual help desk for more information at www.agrenv.mcgill.ca/computing, call (514) 398-7600 or e-mail lise.menard@mcgill.ca.

Lyman Entomological Museum and Research Laboratory
Originally established in 1914 and formerly housed in the Redpath Museum, the Lyman Entomological Museum was moved to the Macdonald Campus in 1961. It houses the largest university collection of insects in Canada, second in size only to the National Collection. The Museum also has an active graduate research program in association with the Department of Natural Resource Sciences. Study facilities are available, on request from the Curator, to all bona fide students of entomology. Visits by other interested parties can be arranged by calling (514) 398-7914. More information is available at www.agrenv.mcgill.ca/facility/lyman.htm.

Brace Centre for Water Resources Management
The Brace Centre for Water Resources Management is located on the Macdonald Campus. It is a multidisciplinary and advanced research and training centre of McGill University, dedicated to solving problems of water management for all human and environmental uses. It brings together staff from several McGill faculties to undertake research, teaching, specialized training, and policy and strategic studies, both in Canada and internationally. The
Centre draws on the wide range of facilities available within the University. More information is available at www.mcgill.ca/brace.

13.1.5 The Student Affairs Office
The Student Affairs Office, located in Laird Hall Room 106, provides a wide variety of academic services. These include information about admission (prerequisites and program requirements), academic standing, examinations (deferrals, conflicts, rereads), exchange programs, inter-faculty transfers, registration (course change, withdrawals), scholarships (entrance and in-course), second degrees, second majors, minors, session away, and graduation (convocation).

13.2 Summary of Academic Programs

13.2.1 Outline of Academic Programs
Programs leading to three degrees are offered on the Macdonald Campus, with Majors associated with each degree. In addition, Certificates are offered in Ecological Agriculture and in Entrepreneurship.

13.2.1.1 Major Programs
Bachelor of Science in Agricultural and Environmental Sciences - B.Sc.(Ag.Env.Sc.)
Graduates of programs marked with an asterisk * are eligible for membership in the Ordre des agronomes du Québec and other provincial institutes of agriculture.

Agricultural Economics*
Agribusiness Option
Agricultural Systems Option
Natural Resource Economics Option
Agricultural Sciences*
General Option
Ecological Agriculture Option
International Agriculture Option
Soils Option
Agricultural Biotechnology Option
Agricultural Sciences Internship*
General Option
Ecological Agriculture Option
International Agriculture Option
Soils Science Option
Agricultural Biotechnology Option
Animal Biology
Animal Science*
Applied Zoology
Botanical Science
Ecology Option
Molecular Option
Environmental Biology
Environment, under McGill School of Environment
Biodiversity and Conservation Domain
Ecological Determinants of Health Domain
Environmetrics Domain
Food Production and Environment Domain
Land Surface Processes and Environmental Change Domain
Renewable Resource Management Domain
Water Environments and Ecosystems Domain
Microbiology
Biotechnology Option
Ecology Option
Environment Option
Plant Science*
Resource Conservation
Wildlife Biology

Bachelor of Engineering in Bioresource Engineering - B.Eng.(Bioresource)
This normally leads to professional qualification in any provincial professional engineering order plus the Ordre des agronomes du Québec.

Bioresource Engineering

Bachelor of Science in Food Science - B.Sc.(F.Sc.)
Note: Admission to this program is presently suspended. The program is undergoing revision.

Food Science

Bachelor of Science in Nutritional Sciences - B.Sc.(Nutr.Sc.)
Two Majors are offered by the School of Dietetics and Human Nutrition.

Dietetics
Nutrition
Nutritional Biochemistry
Global Nutrition
Food Function and Safety
Sports Nutrition

13.2.1.2 Minor Programs
Agricultural Economics
Agricultural Production
Ecological Agriculture
Entrepreneurship
Minor in Environment, under McGill School of Environment
Environmental Engineering
Human Nutrition

13.2.1.3 Certificate Programs
Ecological Agriculture
Entrepreneurship

13.2.1.4 Diploma Program
Diploma in Environment, under McGill School of Environment

13.2.1.5 Diploma in Collegial Studies
Farm Management and Technology

13.2.2 Environmental Sciences Programs
McGill School of Environment (MSE)
The MSE is a joint initiative of the Faculty of Agricultural and Environmental Sciences, the Faculty of Arts, and the Faculty of Science. It offers a B.Sc.(Ag.Env.Sc.) Major in Environment, B.Sc. Major in Environment, a B.A. Faculty Program in Environment, a Minor in Environment and a Diploma in Environment. Many of the MSE programs allow students to choose to study exclusively on the Macdonald or downtown campuses, or to take advantage of both.

A list of the B.Sc.(Ag.Env.Sc.) Domains is given under section 13.2.1.1 “Major Programs”. Further information on all programs is given under the McGill School of Environment.

Other Environmental Programs at Macdonald Campus
A number of other integrated environmental science programs are also offered on the Macdonald Campus. The objective of these interdepartmental programs is to provide the student with a well-rounded training in a specific interdisciplinary subject as well as the basis for managing the natural resource. The programs include:

Agricultural Economics Major, Natural Resource Economics Option
Applied Zoology Major
Botanical Science Major
Environmental Biology Major
Microbiology Major
Resource Conservation Major
13.3 Faculty Admission Requirements

For information about the admission requirements for this faculty please see section 3 “Application Procedures, Admission Requirements”.

For information about inter-faculty transfers, see section 4.3.11 “Inter-Faculty Transfer”.

Applicants are encouraged to submit applications on-line at www.mcgill.ca/applying. Please note that the same application is used for all undergraduate programs at McGill and two program choices can be entered. For information, or to obtain a printed application package for students unable to apply via the Web, contact:

Student Affairs Office
Macdonald Campus of McGill University
21,111 Lakeshore Road
Sainte-Anne-de-Bellevue, Quebec H9X 3V9
Telephone: (514) 398-7928
E-mail: studentinfo.macdonald@mcgill.ca
Website: www.mcgill.ca/macdonald/studentaffairs

More specific information on application deadlines and admission requirements can be found on the Web or in the "General Admission and Documentation Requirements”, section 3.5.

13.4 Student Information

13.4.1 Student Services

Students who study on the Macdonald Campus may make full use of all McGill Student Services. For further information see section 4.1.2. The Office of the Dean of Students, in cooperation with the Faculty of Agricultural and Environmental Sciences, offers students direct access to several services, see "Student Services – Macdonald Campus", section 4.12.3.

13.4.2 Athletic Services

All students who have paid Student Services fees are also eligible to use any Athletic facility without additional expense. For further information please visit the Website www.agrenv.mcgill.ca/society/athletic or telephone the Stewart Athletic Complex at (514) 398-7789.

13.4.3 Macdonald Campus Residences

Students may apply for residence in either of two distinctive facilities: Laird Hall, with a capacity of more than 210 students, is arranged on a co-educational basis and provides single and double room accommodation for both undergraduate and graduate students. The EcoResidence, Canada’s first ecologically friendly student residence and winner of the Prix d’excellence from the Ordre des architectes du Québec, accommodates 100 students in apartment-style living.

For further information, please refer to "Residence Fees – Macdonald Campus”, section 4.13.2.1, or the Faculty Website, www.mcgill.ca/macdonald/resources/residences, or e-mail residences.macdonald@mcgill.ca.

13.4.4 Extracurricular Activities

All undergraduate, postgraduate, and Farm Management and Technology students are members of the Macdonald Campus Stu-
13.5 Faculty Information and Regulations

Each student in the Faculty of Agricultural and Environmental Sciences must be aware of the Faculty Regulations as stated in this Calendar. While departmental and faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of program and degree requirements, and for the observance of regulations and deadlines rests with the student. It is the student's responsibility to seek guidance if in any doubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from any regulation, deadline, program or degree requirement.

13.5.1 Minimum Credit Requirement

Students must complete the minimum credit requirement for the degree as specified in the letter of admission.

Students are normally admitted to a four-year program requiring the completion of 120 credits, but advanced standing of up to 30 credits may be granted to students who obtain satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests.

Normally, Quebec students who have completed the Diplôme d'études collégiales (DEC) or equivalent diploma are admitted to the first year of a program requiring the completion of a minimum of 90 credits, 96 credits for Agricultural Sciences Major Internship Options, 111 credits for Bioresource Engineering, and 115 credits for Dietetics.

Students from outside Quebec who are admitted on the basis of a high school diploma enter the Freshman Major (see "Freshman Major", section13.5.2).

Students will not receive credit towards their degree for any course that overlaps in content with a course successfully completed at McGill, at another university, at CEGEP, or Advanced Placement exams, Advanced Level results, International Baccalaureate Diploma, or French Baccalaureate.

13.5.2 Freshman Major

Students entering university for the first time from a high school system (outside of Quebec CEGEP system) will be required to complete the 30 credits listed below before selecting a subject Major.

<table>

Elective - Winter 3.0

Elective: AEBI202 Cellular Biology must be substituted for students in programs in the B.Sc.(Nutr.Sc.) degree.
BREE103 Linear Algebra must be substituted for students in the B.Eng.(Bioresource) degree.

Total Credits 30.0
* AGRI195 and AGRI196 are required for all freshmen, excluding Bioresource Engineering and optional for Dietetics and Nutrition students who may substitute an elective.

Normally, students registered in the Faculty of Agricultural and Environmental Sciences Freshman program may take a maximum of 8 credits outside the Faculty offerings to meet the requirements of the program. Permission to exceed this limit must be received from the Associate Dean (Student Affairs) prior to registration.

Freshman students in the B.Sc.(Ag.Env.Sc.) degree will automatically be moved to the default major, Agricultural Sciences- General Option, upon completion of their freshman year. Students must provide a program change form if this is not the major of their choice.

13.5.3 Academic Advisers

Before registration, all students entering the Faculty must consult with the Academic Adviser of their program for selection and scheduling of required, complementary, and elective courses. The Academic Adviser will normally continue to act in this capacity for the duration of the student's studies in the Faculty.

13.5.4 Categories of Students

Full-Time Students

Full-time students in satisfactory standing take a minimum of 12 credits per term.

Full-time students in probationary standing are not normally permitted to take more than 14 credits per term. In exceptional circumstances the Committee on Academic Standing may give permission to attempt more.

Part-time Students

Part-time students carry fewer than 12 credits per term.

13.5.5 Academic Standing

All students are required to give satisfactory evidence of mastery of the material of lectures and laboratories. Examinations are normally held at the end of each course but other methods of evaluation may also be used. The grade assigned for a course represents the standing of the student in all the work of the course.

The following rules apply to the academic standing of a student:

1. When a student's CGPA (or TGPA in the first term of the program) falls below 2.00, the student's academic standing becomes Probationary and withdrawal is advised but not required.

2. Students in Probationary standing may register for no more than 12 credits per term.

3. While in Probationary standing, students must achieve a TGPA of 2.50 to continue in Probationary standing or a CGPA of 2.00 in order to return to Satisfactory standing. Failure to meet at least one of these conditions will result in Unsatisfactory standing. (In the case of Fall term, this will be Interim Unsatisfactory standing and the rules for Probationary standing will apply.)

4. When a student's CGPA (or TGPA in the first term of the program) falls below 1.50, the student's academic standing becomes Unsatisfactory and withdrawal is required. (In the case of Fall term, the standing will be Interim Unsatisfactory standing and the rules for Probationary standing will apply.)

5. Students in Unsatisfactory standing are required to withdraw. Application for readmission may be made only after registration has been interrupted for at least one term (not including Summer term).

6. Readmission will be in the standing Unsatisfactory Readmit and a CGPA of 2.00 must be achieved to return to Satisfactory standing or a TGPA of 2.00 must be achieved for Probationary
standing. Failure to meet at least one of these conditions will result in requirement for permanent withdrawal.

13.5.6 Credit System

The credit assigned to a particular course reflects the amount of effort it demands of the student. As a guideline, one credit would represent approximately 45 hours total work per course. This is, in general, a combination of lecture hours and other contact hours such as laboratory periods, tutorials and problem periods as well as personal study hours. Please refer to "Credit System", section4.6.2.

13.5.7 Academic Credit Transfer

Transfer credits based on courses taken at other institutions (completed with a grade of C or better) before entrance to this Faculty are calculated and assigned after an accepted applicant has confirmed that s/he is accepting the offer of admission.

Transfer credits may also be granted for courses taken at other institutions (completed with a grade of C or better) during a student’s attendance at McGill University. Permission to apply such credits to a program in this faculty must be secured by the student before the work is undertaken. Prior Approval Forms are available in the Student Affairs Office in the Faculty. Grades obtained in such courses do not enter into calculations of grade point averages (GPA) in this faculty.

Exemption from a required or complementary course on the basis of work completed at another institution must be approved by both the Instructor of the appropriate McGill course and the Academic Adviser.

Full-time students may, with the written approval of the Student Affairs Office, register for 3 credits, or exceptionally 6 credits, in each term at any university in the province of Quebec. These courses successfully completed with a minimum grade of C (according to the standards of the university giving the course), will be recognized for the purpose of the degree but the grades obtained will not enter into calculations of GPA in this Faculty. For further details, see section 4.3.4 "Quebec Inter-University Transfer Agreement (IUT)".

13.5.8 Regulations Regarding Second Academic Majors

While registered in a Major in the Faculty of Agricultural and Environmental Sciences, a student may pursue a second set of courses of greater scope than a Minor (e.g., Faculty Program, Major, Honours Program, Major Concentration) in either this Faculty or another faculty. Application for a Second Academic Major shall be made to the Associate Dean (Student Affairs) in the Student Affairs Office, Laird Hall, Room 106. Following are the regulations and procedures for Second Academic Majors:

1. The applicant for a Second Academic Major must be in satisfactory academic standing with a minimum CGPA of 3.00.

2. The applicant, in consultation with the appropriate authority associated with each Major (Academic Adviser, Associate Dean) must construct a proposal showing all the courses that are to be taken to satisfy the entrance and program requirements of both the First and Second Academic Majors.

3. A minimum of 36 credits must be unique to the Second Major (i.e., not part of the Required or Complementary courses taken for the First Major).

4. Students in the Faculty of Agricultural and Environmental Sciences must obtain prior approval for all proposed Second Academic Majors from their Academic Adviser and the Student Affairs Office and from the Associate Dean, adviser or appropriate committee of the other faculty concerned.

5. Normally, proposals for Second Academic Majors will be initiated before completion of U1 year of the First Academic Major.

6. The academic standards applicable to each Major will be respected.

13.5.9 Course Change Information

1. Courses: please refer to "Course Change Period", section4.3.6 and the Calendar of Dates.

2. Course withdrawal (Transcript notation of "W"): please refer to "Regulations Concerning Course Withdrawal", section4.3.7 and the Calendar of Dates.

3. Other changes: Information about changes may be obtained from the Student Affairs Office of the Faculty.

13.5.10 Graduate Courses Available to Undergraduates

Undergraduates wishing to take such courses must have a cumulative grade point average (CGPA) of at least 3.20. Final approval must be obtained from the Graduate and Postdoctoral Studies Office.

13.5.11 Attendance and Conduct in Class

Matters of discipline connected with, or arising from, the general arrangement for teaching are under the jurisdiction of the Dean of the Faculty or Director of the School concerned.

Students may be admonished by a professor or instructor for dishonest or improper conduct or may be reported to the Dean or Director concerned for disciplinary action.

Punctual attendance at all classes, laboratory periods, tests, etc., is expected of all students. Absences are excused only on grounds of necessity or illness, of which proof may be required. Special attention is called to the fact that the completion of all laboratory work is obligatory and the opportunity to make up work missed will be provided only in the case of properly excused absences.

The Faculty has the power to refuse examination to those students who persist in absenting themselves from classes without permission.

Students are requested not to make application for additional leave either before or after holiday periods, as such leaves are granted only in case of illness or other exceptional circumstances.

13.5.12 Incomplete Grades

An instructor who believes that there is justification for a student to delay submitting term work may extend the deadline until after the end of the course. In this case, the instructor will submit a grade of K (incomplete), indicating the date by which the work is to be completed. The maximum extensions for the submission of grades to the Student Affairs Office are as follows:

- Students graduating in June:
  - Fall courses: January 15
  - Winter courses, and courses spanning Fall/Winter: April 30

- Non-graduating students:
  - Fall courses: January 15
  - Winter courses, and courses spanning Fall/Winter: May 15

Students’ deadlines for submitting their work must be sufficiently in advance of these dates to ensure that the work can be graded and the mark submitted on time. It is important to note that instructors may impose earlier deadlines than those listed above.

If marks to clear Ks have not been submitted to the Student Affairs Office by the above dates, the K is automatically changed to a KF and counts as an F in the GPA. Students with a grade of K who have serious extenuating circumstances may request an extension of the K deadline (KE) from the Associate Dean (Student Affairs). Please refer "Grading and Grade Point Averages (GPA)", section4.3 for more information about grading and credit.
13.5.13 Examinations
Students should refer to "Examinations", section 4.7 for information about final examinations and deferred examinations.

Every student has a right to write essays, examinations and theses in English or in French except in courses where knowledge of a language is one of the objects of the course.

Oral presentations made as part of course requirements shall be in English.

13.5.13.1 Reassessments and Rereads
In accordance with the Charter of Student Rights, and subject to the conditions stated therein, students have the right to consult any written submission for which they have received a mark as well as the right to discuss this submission with the examiner.

If, after discussion with the instructor, students request a formal final examination reread, they must apply in writing to the Associate Dean (Student Affairs). The following conditions apply:

• grades may be either raised or lowered as the result of a reread;

• rereads in courses outside the Faculty of Agricultural and Environmental Sciences are subject to the deadlines, rules and regulations of the relevant faculty.

Application for rereads must be made by March 31 for Fall term courses and by September 30 for Winter term and Summer term courses. Students are assessed a fee for formal rereads. Any request to have term work re-evaluated must be made directly to the instructor concerned. Students should consult the Student Affairs Office for further information.

13.5.13.2 Deferred Examinations
The Faculty offers deferred exams for the Fall and Winter period. Verify date in Calendar of Dates and consult the Student Affairs Office for procedures.

13.5.14 Degree Requirements
To be eligible for a B.Eng. (Bioresource), B.Sc. (Ag. Env. Sc.), or B.Sc. (Nur. Sc.) degree, students must have passed, or achieved exemption in, all required and complementary courses of the program. They must have a CGPA of at least 2.00.

They must have completed the minimum credit requirement for the degree as specified in their letter of admission or its attached documentation, "Minimum Credit Requirement", section 13.5.1.

At least 60 of these credits must have been taken at McGill.

In addition, students in the Dietetics program must have completed the Stages of professional formation requiring a CGPA of 2.5.

13.5.15 Distinction or Great Distinction
Students in Major programs whose academic performance is appropriate may be awarded their degrees with Distinction or Great Distinction under the following conditions:

• for Distinction, the CGPA at graduation must be 3.30 to 3.49;

• for Great Distinction, the CGPA at graduation must be 3.50 or greater.

13.5.16 Dean’s Honour List
The designation Dean’s Honour List may be awarded to graduating students under the following conditions:

• students must be in the top 10% of the Faculty’s graduating students.

13.5.17 Medals and Prizes
Various medals, scholarships and prizes are open to graduating students. No application is required. Full details of these are set out in the Undergraduate Scholarships and Awards Calendar, available in the Student Affairs Office, Laird Hall, Room 106.

Assistant Professor — Ka-Yan Diana Mok
Lecturers — Joan Marshall

AGRICULTURAL ECONOMICS MAJOR

Increasingly complex economic problems facing the agriculture and food system and our natural environment have intensified the need for specialized knowledge and training in the field of agricultural economics. The curriculum is designed to provide students with the knowledge, analytical and decision-making skills required in a career in agribusiness, resource management, international development, and research. The selection of courses from the agribusiness, agricultural system or natural resource economics options permits a degree of specialization along those lines, in conjunction with the core courses listed below.

Graduates are eligible to apply for membership in the Ordre des agronomes du Québec (OAQ) if they fulfill the agronomic course requirements (consult the academic adviser).

Core Required Courses: 39 credits
Core Complementary Courses: 12 credits

Required Courses: 39 credits

AGRIBUSINESS OPTION

Whether one has interests in agricultural supply, production, marketing, finance, food processing or retailing, professional management skills are the key to success. The agribusiness option prepares students for managerial responsibility by drawing on the resources of both the Faculty of Management and the Faculty of Agricultural and Environmental Sciences. This special partnership provides students with not only a first-class business training but also a specialization in the field of agriculture.
### Core Required and Complementary Courses: 51 credits
### Electives: To meet the minimum credit requirement for the degree.

### AGRICULTURAL SYSTEMS OPTION

The smooth functioning of the agriculture and food system requires good market analysis and appropriate policy and program development and management in the public sector. Agricultural economists are called upon to perform these tasks, utilizing their knowledge of the economic forces that affect the industry and the methods of analysis to predict the outcome of the numerous changes that occur. The agricultural systems orientation is intended to provide students with a broad understanding of the many dimensions of agriculture and food systems, including economic development, international agriculture, and food and agricultural policy.

### NATURAL RESOURCE ECONOMICS OPTION

This option integrates biological sciences and environmental decision making with the economics of natural resource use and development. The natural resource economics option is intended to prepare students for careers in the management of natural resources and the analysis of natural resource problems and policies.

**Core Required and Complementary Courses:** 51 credits

**Option Required and Complementary Courses:** 32 credits

### MINOR IN AGRICULTURAL ECONOMICS

A minor in Agricultural Economics will complement a student’s education in four ways. First, as a social science, Economics will provide an alternative perspective for students in the Faculty. Second, the minor will provide an excellent foundation of the workings of the economy at large. Third, it will aid students to understand the business environment surrounding the agri-food industry. Finally, it will challenge students to analyze the interaction between the agricultural economy and the natural resource base.

**General Regulations:**

- To obtain a Minor in Agricultural Economics, students must:
  - a) Ensure that their academic record at the University includes a C grade or higher in the courses specified in the course requirements below.
  - b) Complete a minimum total of 24 credits from the courses given below, of which not more than 6 credits may be counted for both Major and Minor programs. This restriction does not apply to elective courses in the Major program.

**Required Courses:** 12 credits

**Complementary Courses:** 12 credits

### MINOR IN ENTREPRENEURSHIP

**Academic Adviser:** Robert Oxley

The Minor is concerned with the genesis and development of entrepreneurial activities. It deals with marketing, finance, organization, and policy in the development and expansion of small businesses in the agri-food and environment sectors. This 24-credit Minor will be of interest to students who wish to develop the skills...
and perspectives necessary to be successful in an entrepreneurial environment, whether it be self-employed in a start-up business or within an established corporation that employs entrepreneurial management strategies.

Students are advised, during the U1 year, to consult their Major Program adviser and the academic adviser of the Minor. At the time of registration for the U2 year, students must declare their intent to obtain the Minor. With the agreement of their Major Program adviser they must submit their program of courses already taken, and to be taken, to the academic adviser of the Minor. The academic adviser of the Minor will then certify which courses the student will apply toward the Minor and confirm that the student’s program conforms with the requirements of the Minor.

General Regulations:
To obtain a Minor in Entrepreneurship, students must:

a) Ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements listed below.

b) Complete the 24 credits listed below, of which not more than 6 credits may be counted for both the Major and the Minor programs.

Required Courses (24 credits)
AGEC200 (3) Principles of Microeconomics
AGEC230 (3) Agricultural and Food Marketing
AGEC242 (3) Management Theories and Practices
AGEC343 (3) Accounting and Cost Control
AGEC344 (3) Entrepreneurial Leadership
AGEC450 (3) Agriculture Business Management
AGEC453 (3) Venture Capital Opportunities
NUTR446 (3) Applied Human Resources

CERTIFICATE IN ENTREPRENEURSHIP

Academic Adviser: Robert Oxley

This 30-credit Certificate Program is very similar to the Minor Program and is concerned with the genesis and development of entrepreneurial activities. It deals with marketing, finance, organization, and policy in the development and expansion of small businesses in the agri-food and environment sectors. The Certificate will be of interest to students who already hold a bachelor’s degree and wish to develop the skills and perspectives necessary to be successful in an entrepreneurial environment, whether it be self-employed in a start-up business or within an established corporation that employs entrepreneurial management strategies.

Students holding a B.Sc. in agriculture or a related area are eligible to register for this program provided that they are otherwise acceptable for admission to the Faculty. Students who have completed the Minor in Entrepreneurship are not permitted to register for this program.

General Regulations
To obtain a Certificate in Entrepreneurship, students must complete a minimum of 30 credits from the courses as given below.

Required Courses: 27 credits

Professors — Roger B. Buckland, Bruce R. Downey, Kweti Fane Ng-Kwai-Hang, Flannaan Haynes, Urs Kuhnlein
Associate Professors — Roger I. Cue, Humberto G. Monardes, Leroy E. Phillip, Kevin Wade, David Zadworny, Xin Zhao (William Dawson Scholar)
Assistant Professors — Vilceu Bordignon, René Lacroix (PT), Arif Mustafa, Ciro Ruiz-Feria
Associate Member — Ri-Cheng Chian
Adjunct Professors — Pierre Lacasse, Daniel Lefebvre, Bruce Murphly
The Department of Animal Science offers Majors in Animal Science and Animal Biology.

ANIMAL SCIENCE MAJOR

Academic Advisers: V Bordigon (U1), K. M. Wade (U2), K. F. Ng-Kwai-Hang (U3)

The curriculum in Animal Science involves intensive training in both the basic and applied biological sciences as related to domestic animals and qualifies the graduate for membership in the Ordre des agronomes du Québec and other professional organizations. Graduates generally enter agricultural industries, mainly sales and marketing, government service (Provincial or Federal), extension, teaching or postgraduate studies. Some students go on to study veterinary medicine. Students are strongly advised to obtain at least 3 months’ practical experience on a commercial livestock farm before graduation.

ANIMAL BIOLOGY MAJOR
Academic Adviser: H. Monardes

The Animal Biology Major is directed towards students who wish to further their studies in the basic biology of the larger mammals and birds. Successful completion of the program will enable students to qualify in applying to most professional schools in North America, to postgraduate schools in a variety of biological-oriented programs, and to work in most laboratory settings. The program is not intended for students wishing to become professional agrologists.

Required Courses: 34 credits
Complementary Courses: 24 credits, minimum Electives: To meet the minimum credit requirement for the degree

Complementary Courses: 24 credits

BIORESOURCE ENGINEERING MAJOR
The Department of Bioresource Engineering collaborates with other departments and the Faculty of Engineering in providing courses of instruction for a curriculum in Bioresource Engineering. Graduates qualify to apply for registration as professional engineers in any province of Canada.

Via the appropriate choice of elective course sets, a particular area of study may be emphasized. Principal options are: Bio-Environmental Engineering, Soil and Water Engineering, Food and Bioprocess Engineering, and Agricultural Engineering.

All required and complementary courses must be passed with a minimum grade of C. One term is spent taking courses from the Faculty of Engineering on the McGill downtown campus. Students also have the opportunity to pursue a Minor. Several possibilities are: Agricultural Production, Environment, Ecological Agriculture, Biotechnology, Computer Science, Construction Engineering and Management, Entrepreneurship, and Environmental Engineering. Details of some of these Minors can be found in the Faculty of Engineering "Minor Programs and Choice of Electives or Complementary Courses", section 8.5. To complete a Minor, it is necessary to spend at least one extra term beyond the normal requirements of the B.Eng.(Bioresource) program.

Required Courses: 50 credits
Complementary Courses: 61 credits

Complementary Courses: 61 credits
### AGRICULTURAL AND ENVIRONMENTAL SCIENCES – DIETETICS AND HUMAN NUTRITION

**Set B - Basic Sciences (9 credits):**

9 credits from the following, with at least 3 credits chosen from:

- AEBI202 (3) Cellular Biology
- FDSC211 (3) Biochemistry 1
- MICR230 (3) Introductory Microbiology
- PLNT201 (3) Comparative Plant Biology
- WILD200 (3) Comparative Zoology
- WILD205 (3) Principles of Ecology

and the remainder, if any, chosen from:

- ANSC250 (3) Principles of Animal Science
- FDSC200 (3) Introduction to Food Science
- GEOG203 (3) Environmental Systems
- NRSC201 (3) Introductory Meteorology
- NRSC333 (3) Physical and Biological Aspects of Pollution

**Set C - Social Sciences (9 credits):**

One 3-credit course on the impact of technology on society from the following list:

- CHEE230 (3) Environmental Aspects of Technology
- CHEE430 (3) Technology Impact Assessment
- CIVE469 (3) Infrastructure and Society
- ENVR201 (3) Society and Environment
- MIME308 (3) Social Impact of Technology
- SOCI235 (3) Technology and Society

Two 3-credit courses in the humanities and social sciences/administrative studies and law/language courses. (Any language course which is deemed by the academic adviser to have a sufficient cultural component or, in the case of the student who is not proficient in a specific language, program credit will be given for the second of two successfully completed, academically approved 3-credit language courses.)

**Set D - Engineering (37 credits, minimum):**

37 credits (minimum) from the following courses:

- BREE214 (3) Geomatics
- BREE217 (3) Hydrology and Water Resources
- BREE314 (3) Agri-Food Buildings
- BREE315 (3) Design of Machines
- BREE322 (3) Organic Waste Management
- BREE323 (3) Properties of Bio-Materials
- BREE325 (3) Food Process Engineering
- BREE412 (3) Machinery Systems Engineering
- BREE416 (3) Engineering for Land Development
- BREE418 (3) Soil Mechanics and Foundations
- BREE419 (3) Structural Design
- BREE430 (3) GIS for Bioresource Management
- BREE501 (3) Simulation and Modelling
- BREE502 (3) Drainage/Irrigation Engineering
- BREE504 (3) Instrumentation and Control
- BREE506 (3) Advances in Drainage Management
- BREE509 (3) Hydrologic Systems and Modelling
- BREE512 (3) Soil Cutting and Tillage
- BREE515 (3) Soil Hydrologic Modelling
- BREE518 (3) Bio-Treatment of Wastes
- BREE519 (3) Advanced Food Engineering
- BREE525 (3) Climate Control for Buildings
- BREE530 (3) Fermentation Engineering
- BREE531 (3) Post-Harvest Drying
- BREE532 (3) Post-Harvest Storage
- AGRI435 (3) Soil and Water Quality Management
- CHEE474 (3) Biochemical Engineering
- CIVE202 (4) Construction Materials
- CIVE317 (3) Structural Engineering 1
- CIVE318 (3) Structural Engineering 2

**ENVIRONMENTAL ENGINEERING MINOR**

The Minor program consists of 27 credits in courses that are environment related. By means of a judicious choice of complementary and elective courses, Bioresource Engineering students may obtain this Minor with a minimum of 12 additional credits. The "Environmental Engineering Minor", section 8.5.7, is administered by the Faculty of Engineering, Department of Civil Engineering and Applied Mechanics.

**Courses available in the Faculty of Agricultural and Environmental Sciences (partial listing):**

- BREE322 Organic Waste Management
- BREE416 Engineering for Land Development
- BREE518 Bio-Treatment of Wastes
- MICR331 Microbial Ecology
- WILD333 Physical and Biological Aspects of Pollution

**MINOR IN AGRICULTURAL ENGINEERING**

The Minor in Agricultural Engineering was retired at the end of the 2004-05 academic year. Students currently enrolled in this program should consult the 2004-05 calendar.

**BARBADOS FIELD STUDY SEMESTER**

The Department of Bioresource Engineering, Faculty of Agricultural and Environmental Sciences, coordinates the 15-credit interdisciplinary Barbados Field Study Semester. For more information, see section 15.1.2 “Barbados Field Study Semester”.

**13.6.4 School of Dietetics and Human Nutrition**

Macdonald Stewart Building – Room MS2-039
Telephone: (514) 398-7840
Fax: (514) 398-7739
E-mail: nutrition.dietetics@mcgill.ca
Website: www.mcgill.ca/dietetics

**Director** — Kristine G. Koski

**Emeritus Professor** — Helen R. Neilson

**Professors** — Timothy A. Johns, Peter J. H. Jones, Harriet V. Kuhnlein

**Associate Professors** — Laurie Chan (NSERC Northern Research Chair), Grace Egeland (Canada Research Chair), Katherine Gray-Donald, Kristine G. Koski, Stan Kubow, Louise Thibault, Linda Wykes (William Dawson Scholar)

**Lecturers** — Peter Bender (PT), Lynda Fraser (PT), Linda Jacobs Starkey, Melanie Journoud, Maureen Rose, Joanne Routhier, Sandy Phillips, Hugues Plourde, Heidi Ritter

**Adjunct Professors** — Kevin A. Cockell, Jeffrey S. Cohn

**Cross-Appointed Staff**

- Food Science and Agricultural Chemistry: Selim Kermasha
- Medicine: Louis Beaumier, Franco Carli, Katherine Cianflone, RéjeanneGougeon, L. JohnHoffer, ErrolMariëls, Thomas Schricker, Jean-FrançoisYale

**Parasitology:** Marilyn E. Scott

**Psychiatry:** Simon Young

Health and well-being of individuals in relation to food choices and physiological status prevails as the unifying theme of the programs in the School of Dietetics and Human Nutrition. The availability of
food, normal metabolism and clinical nutrition, community nutrition at the local and international level, the evaluation of nutritional products and their use in nutrition, and the communication of information about food and health form the core of academic programs.

DIETETICS MAJOR

Academic Advising Coordinator:
Linda Jacobs Starkey, Ph.D., RD, FDC

Graduates are qualified for challenging professional and leadership positions related to food and health, as dietitians, nutritionists and food administrators. The designations "Dietitian" and "Nutritionist" are reserved titles in the province of Quebec. As clinical nutritionists, dietitians may work in health-care settings and food service centres, nutrition counselling centres, clinics and private practice. As community nutritionists, dietitians are involved in nutrition education programs through school boards, sports centres and local and international health agencies. The dietitian in the food service sector participates in all aspects of management to assure quality food products. Postgraduate programs are available to qualified graduates. The duration of the program is three and one-half years.

Successful graduates are qualified for membership in Dietitians of Canada and the Ordre professionnelle de diététistes du Québec. Forty weeks of supervised professional experience in clinical and community nutrition and food service systems management are included.

Required Courses: 103 credits
Note: The School firmly applies prerequisite requirements for registration in all required courses in the Dietetics Major. All required and complementary courses must be passed with a minimum grade of C.

Complementary Courses: 6 credits

Electives: 6 credits to meet the minimum credit requirements for the degree.

CREDITS

Term 1
AGEC242 Management Theories and Practices 3
FDSC211 Biochemistry 1 3
NUTR207 Nutrition and Health 3
NUTR214 Food Fundamentals 3
One Elective or Complementary (see list below) 3

Term 2
BREE251 Microcomputer Applications 3
ANSC234 Biochemistry 2 3
MICR230 Introductory Microbiology 3
NUTR208* Stage in Dietetics 1 1
NUTR217 Application: Food Fundamentals 3
One Elective or Complementary (see list below) 3

Summer
NUTR209* Professional Practice Stage 1B 3

Term 3
AEMA310 Statistical Methods 1 3
AGEC343 Accounting and Cost Control 3
ANSC323 Mammalian Physiology 4
ANSC330 Fundamentals of Nutrition 3
NUTR322 Applied Sciences Communications 2
NUTR345 Food Service Systems Management 2

Term 4
ANSC424 Metabolic Endocrinology 3
NUTR310* Stage in Dietetics 2A 1
NUTR337 Nutrition Through Life 3
NUTR344 Clinical Nutrition 1 4
NUTR346 Quantity Food Production 2
One Elective or Complementary (see list below) 3

Summer
NUTR311* Stage in Dietetics 2B 5

Term 5
NUTR403 Nutrition in Society 3

NUTR445 Clinical Nutrition 2 5
NUTR446 Applied Human Resources 3
NUTR450 Research Methods: Human Nutrition 3
One Elective or Complementary (see list below) 3

Term 6
NUTR409* Stage in Dietetics 3 8
NUTR436 Nutritional Assessment 2
NUTR438 Interviewing and Counselling 2

Term 7
NUTR510* Professional Practice - Stage 4 14

Two Complementary Courses are to be selected from the following, as specified:
3 credits of Human Behavioural Science courses chosen from:
NUTR301 (3) Psychology or equivalent course from another faculty.

3 credits from the social sciences:
AGEC200 (3) Principles of Microeconomics
AGEC230 (3) Agricultural and Food Marketing
ENVR201 (3) Society and Environment
ENVR203 (3) Knowledge, Ethics and Environment
RELG270 (3) Religious Ethics and the Environment or equivalent courses from another faculty.

Elective Courses:
The following courses most often fit the timetable; elective choice is not limited to these courses.
FDSC200 (3) Introduction to Food Science
FDSC212 (3) Biochemistry Laboratory
FDSC251 (3) Food Chemistry 1
FDSC425 (3) Principles of Quality Assurance
NUTR420 (3) Toxicology and Health Risks
NUTR430 (3) Directed Studies: Dietetics and Nutrition 1
NUTR451 (3) Analysis of Nutrition Data
NUTR501 (3) Nutrition in Developing Countries
NUTR503 (3) Bioenergetics and the Lifespan
NUTR511 (3) Nutrition and Behaviour
NUTR512 (3) Herbs, Foods and Phytochemicals

* Successful completion of all component parts of each level of Stage (Professional Practice) in Dietetics courses is a prerequisite for the next level and must be passed with a minimum grade of C. Undergraduate registration is restricted to students in the Dietetics Major, CGPA greater than or equal to 2.50. Visiting students must contact the Academic Advising Coordinator (Dietetics) regarding course registration eligibility.

Students are reminded that ethical conduct on Professional Practice (Stage) rotations is required. The Faculty reserves the right to require the withdrawal of any student at any time if it (Faculty) feels the student has displayed unprofessional conduct or demonstrates incompetence.

A compulsory immunization program exists at McGill which is required for Dietetics students to practice. Students should complete their immunization before arriving at Macdonald Campus; medical/health documentation must be received prior to commencement of Stage.

NUTRITION MAJOR

Academic Advising Coordinator: Kristine G. Koski, Ph.D., RD

This Major covers the many aspects of human nutrition and food and gives first, an education in the scientific fundamentals of these disciplines and second, an opportunity to focus in (a) nutritional biochemistry and metabolism, (b) global nutrition issues, (c) food function, product development and safety and/or (d) sports nutrition. Graduates are qualified for careers in pharmaceutical and/or food industries or government laboratories, the health science communications field, sports clinics and national or international food support programs. Graduates often continue on to further studies preparing for careers in research, medicine, and dentistry or as specialists in nutrition. Aside from working as university ...
MINOR IN HUMAN NUTRITION

Academic Adviser: Linda Wykes, Ph.D.

The Minor in Human Nutrition is intended to complement a student’s primary field of study by providing a focused introduction to the metabolic aspects of human nutrition. It is particularly accessible to students in Biochemistry, Biology, Physiology, Anatomy and Cell Biology, Microbiology and Immunology, Animal Science or Food Science programs. The completion of 24 credits is required, of which at least 18 must not overlap with the primary program. All courses must be taken in the appropriate sequence and passed with a minimum grade of C. Students may declare their intent to follow the Minor program at the beginning of their U2 year. They must then consult with the Academic Adviser for the Human Nutrition Minor in the School of Dietetics and Human Nutrition to obtain approval for their course selection. Since some courses may not be offered every year and many have prerequisites, students are cautioned to plan their program in advance.

The Minor program does not carry professional recognition; therefore, it is not suitable for students wishing to become nutritionists or dietitians. However, successful completion may enable students to qualify for many postgraduate nutrition programs.

Required Courses: 6 credits
Complementary Courses: 18 or 19 credits

CREDITS
Required Courses: 57

Term 1
FDSC 211 Biochemistry 1 3
FDSC 212 Biochemistry Laboratory 2
NUTR 207 Nutrition and Health 3
NUTR 214 Food Fundamentals 3

Term 2
ANSC 234 Biochemistry 2 3
MICR 230 Introductory Microbiology 3
BREE 251 Microcomputer Applications 3
FDSC305 Food Chemistry 1 3

Term 3
ANSC 323 Mammalian Physiology 4
NUTR 322 Applied Sciences Communication 2
AEMA 310 Statistical Methods 1 3
FDSC 305 Food Chemistry 2 3

Term 4
ANSC 424 Metabolic Endocrinology 3
NUTR 337 Nutrition Through Life 3
NUTR 344 Clinical Nutrition 1 4

Term 5
NUTR 420 Toxicology and Health Risks 3
NUTR 450 Research Methods: Human Nutrition 3
NUTR 451 Analysis of Nutrition Data 3
NUTR 512 Herbs, Foods, and Phytochemicals 3

Complementary Courses: 15/16
One of the following courses: 3
NUTR307 Human Nutrition
or ANSC330 Fundamentals of Nutrition
And one of the following sets of 12/13 credits. 12/13

Nutritional Biochemistry: 13
ANSC551 Carbohydrate & Lipid Metabolism 3
ANSC552 Protein Metabolism & Nutrition 3
CELL204 Genetics 4
PARA438 Immunology 3

Global Nutrition: 12
AGRI340 Principles of Ecological Agriculture 3
NRSC340 Global Perspectives on Food 3
NUTR403 Nutrition in Society 3
NUTR501 Nutrition in Developing Countries 3

Food Function and Safety: 12
FDSC300 Food Analysis 1 3
FDSC315 Food Analysis 2 3
FDSC319 Food Chemistry 3 3
FDSC425 Principles of Quality Assurance 3

Sports Nutrition: 12
ANAT214 Systemic Human Anatomy 3
EDKP205 Structural Anatomy 3
EDKP391 Physiology in Sport & Exercise 3
EDKP495 Scientific Principles of Training 3
NUTR503 Bioenergetics and the Life Span 3

Notes:
1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.
2. Some courses may not be offered every year. For information on available courses, consult Class Schedule at www.mcgill.ca/minerva; complete listings can be found in the Courses section of this Calendar.
13.6.5 Department of Food Science and Agricultural Chemistry

Macdonald Stewart Building – Room MS1-034
Telephone: (514) 398-7898
Fax: (514) 398-7977
E-mail: foodscience.macdonald@mcgill.ca
Website: agrenv.mcgill.ca/foodscience

Chair — William D. Marshall

Associate Professors — Ashraf A. Ismail, Selim Kermasha, Benjamin K. Simpson, Varoujan Yalayian

Adjunct Professors — John W. Austin, Byong H. Lee, Yasuo Konishi, Michèle Marcotte, André Morin, J. R. Jocelyn Paré

FOOD SCIENCE MAJOR

Note: Admission to the program is presently suspended. The program is undergoing revision. Students in course will follow the program outlined in the 2004-2005 calendar.

13.6.6 Department of Natural Resource Sciences

Macdonald Stewart Building – Room MS3-040
Telephone: (514) 398-7890
Fax: (514) 398-7990
E-mail: info@nrs.mcgill.ca
Website: www.mcgill.ca/nrs

Chair — Benoît Côté

Emeritus Professors — A. Clark Blackwood, Roger Knowles, Angus F. Mackenzie, Robert A. MacLeod, Peter H. Schuepp, Robin K. Stewart

Professors — David M. Bird, Peter Brown (joint appoint. with Geography and McGill School of Environment), James W. Fyles (Tomlinson-Fowler Professor of Forest Ecology), William H. Hendershot

Associate Professors — Benoît Côté, Mark A. Curtis, Brian T. Driscoll, Gary B. Dunphy, David J. Lewis, Guy R. Mehdy, Donald F. Niven, Manfred E. Rau, Rodger T. Titman, Terry A. Wheeler, Lyle Whyte

Assistant Professors — Christopher Buddle, Murray Humphries, Ian Strachan, Joann Whalen

Curators — Stephanie Boucher, Christina Idziak

Associate Members — Laurie Chan (School of Dietetics and Human Nutrition), David Green (Redpath Museum), William D. Marshall (Dept. of Food Science and Agricultural Chemistry), Greg T. Matlashewski (Dept. of Microbiology and Immunology), Donald L. Smith (Dept. of Plant Science)

Adjunct Professors — Robert Anderson, Frederick S. Archibald, Suzanne Beauchemin, Dominique Bertrand, Guy Boivin, Jeffrey Cumming, Charles W. Greer, Thomas Herman, Carlos Miguez, Elizabeth Pattey, Husain Sadar, Jean-Pierre Savard, Anton Scheuhammer, Geoffrey Sunahara, Charles Vincent

APPLIED ZOOLOGY MAJOR

Academic Advisers: Professor T. A. Wheeler (U1, U3), C. Buddle (U2)

The great diversity of animals form the focus of this Major, from the invertebrates, with their many beneficial and pest insects, to vertebrates, including fish and wildlife. The interaction of animals with each other and with human populations is stressed. By careful course selection students may emphasize life in soils or water, entomology, physiology, parasitology or vertebrate biology and ecology. Career opportunities exist in both the public and private sectors in research, program development and implementation, pest control, wildlife management, etc.

Required Courses: 27 credits

Complementary Courses: 36 credits

Electives: To meet the minimum credit requirement for the degree.

For more information, please consult the McGill Summer Studies Calendar, the Summer Studies Website at www.mcgill.ca/summer, or the Faculty Website at www.agrenv.mcgill.ca/envschool.
### ENVIRONMENTAL BIOLOGY MAJOR

Academic Advisers: Professors M.E. Rau (U1),
I. Strachan (U2, U3)

This program provides scientists with basic knowledge in Biology and strong emphasis in Ecology. As ecologists they will be equipped to investigate the scientific aspects of the relationships between organisms and their environment.

**Required Courses:** 27 credits

**Complementary Courses:** 30 credits

**Electives:** To meet the minimum credit requirement for the degree.

- WILD475 (3) Desert Ecology
- WOOD410 (3) The Forest Ecosystem
- WOOD420 (3) Environmental Issues: Forestry

With the permission of the Academic Adviser and the Committee on Academic Standing, ecological or environmental courses offered on the Downtown Campus may be substituted for those appearing in the above list of Complementary Courses.

### MICROBIOLOGY MAJOR

Academic Advisers: Professors B. Driscoll (U1),
D. Niven (U2, U3)

Students receive training in fundamental principles and applied aspects of Microbiology, choosing one of the three options: Biotechnology, Ecology or Environment. Successful graduates are competent to work in university, government and industrial research laboratories and in the pharmaceutical, fermentation and food industries.

**Required Courses:** 51 credits

**Complementary Courses:** 12 credits, chosen from one option (Biotechnology or Ecology or Environment)

**Electives:** To meet the minimum credit requirement for the degree.

**Complementary Courses:** (12 credits)

- 12 credits taken from one of the three options listed below: Biotechnology, Ecology, Environment

### Biotechnology

- 12 credits chosen from the following list of courses:
  - AEBI306 (3) Experiments in Biotechnology
  - AGEC200 (3) Principles of Microeconomics
  - ANSC400 (3) Eukaryotic Cells and Viruses
  - ANSC420 (3) Animal Biotechnology
  - BIOT505 (3) Selected Topics in Biotechnology
  - BTEC501 (3) Bioinformatics
  - CELL500 (3) Techniques Plant Molecular Genetics
  - CELL501 (3) Plant Molecular Biology and Genetics
  - ENTO352 (3) Control of Insect Pests
  - FDSC535 (3) Food Biotechnology

### Ecology

- 12 credits chosen from the following list of courses:
  - AEMA306 (3) Mathematical Methods in Ecology
  - ENTO330 (3) Insect Biology
  - PLNT201 (3) Comparative Plant Biology
  - PLNT305 (3) Plant Pathology
  - SOIL210 (3) Principles of Soil Science
  - SOIL335 (3) Soil Ecology and Management
  - WILD200 (3) Comparative Zoology
  - WILD205 (3) Principles of Ecology
  - WILD212 (3) Evolution and Systematics
  - WOOD410 (3) The Forest Ecosystem

### Environment

- 12 credits chosen from the following list of courses:
  - ENVR200 (3) The Global Environment
  - ENVR201 (3) Society and Environment
  - ENVR202 (3) The Evolving Earth
  - ENVR203 (3) Knowledge, Ethics and Environment
  - EPSC205 (3) Astrobiology
  - NRSC201 (3) Introductory Meteorology
  - NRSC333 (3) Physical and Biological Aspects of Pollution
  - NUTR420 (3) Toxicology and Health Risks
  - PARA410 (3) Environment and Infection
  - WILD375 (3) Issues: Environmental Sciences

### RESOURCE CONSERVATION MAJOR

Academic Adviser: Professor B. Côté

The Major prepares students to deal with problems in integrated resource management and environmental protection with the objective of making optimal use of natural resources under any given set of economic, social and ecological conditions. Students follow a series of required courses and select complementary...
courses on physical, biological, soil and aquatic resources from approved lists on each of these themes.

**Required Courses:** 26 credits

**Complementary Courses:** 33 credits

**Electives:** To meet the minimum credit requirement for the degree.

1 Downtown Campus

**Note:** Other courses on the Downtown Campus may be equivalent to some required courses; consult the Academic Adviser. Course substitutions must be approved by the Committee on Academic Standing.

**WILDLIFE BIOLOGY MAJOR**

Academic Advisers: Professors M. Humphries (U1), R. Tilman (U2), M. Curtis (U3)

This program emphasizes understanding the ecology of vertebrate animals, their biological and physical environment and the interactions that are important in the management of ecological communities and wildlife species. Employment opportunities exist in resource planning, nature interpretation, wildlife management and environmental impact assessment. By careful course selection students may meet requirements for certification by the Wildlife Society.

**Required Courses:** 37 credits

**Complementary Courses:** 27 credits

**Electives:** To meet the minimum credit requirement for the degree.

### BOTANICAL SCIENCE MAJOR

**Academic Adviser:** Professor S. de Blois  
E-mail: sylvie.deblois@mcgill.ca

The Botanical Science Major offers two options for those interested in working with plants, one emphasizing the ecology of plants and their environment and the other emphasizing the physiology and molecular biology of plants. The Ecology Option emphasizes ecology, conservation, and environmental sciences. The Molecular Option emphasizes molecular genetics, plant improvement, and biotechnology. These two options form botanists prepared for exciting careers in the knowledge economy.

Graduates find employment within private industry, government services, consulting, teaching, or go on to do postgraduate research. These programs can be completed entirely on the MacDonald Campus or one term can be spent taking courses on the Downtown Campus during the final year.

**Required Courses:** 42 credits  
**Complementary Courses:** 18 credits, selected from an approved list in consultation with the Academic Adviser; taken in either the Ecology or the Molecular Option.  
**Electives:** To meet the minimum credit requirement for the degree.

**Note:** Courses marked with an asterisk (*) are offered on the downtown campus.

### PLANT SCIENCE MAJOR

**Academic Adviser:** Professor J. Bede  
E-mail: jacqueline.bede@mcgill.ca

The Plant Science Major offers intensive training in agricultural plant science. Comprehensive studies are offered in all aspects of biology and production practices related to important crop plant species. Studies include laboratory, greenhouse, and field exposure relating to agronomic, horticultural, or field crop development, production and management.

Graduates are eligible to apply for membership in the Ordre des agronomes du Québec (OAQ) and the Agricultural Institute of Canada (AIC). Graduates rapidly find employment in agricultural industries, government services, extension, consulting, teaching, or go on to do postgraduate research.

**Required Courses:** 49 credits

**General Complementary Courses:**

- AEMA310 (3) Statistical Methods 1  
- AGEC200 (3) Principles of Microeconomics  
- ANSC250 (3) Principles of Animal Science  
- CELL204 (3) Genetics  
- FDSC211 (3) Biochemistry 1  
- MICR230 (3) Introductory Microbiology  
- PLNT211 (3) Principles of Plant Science  
- PLNT300 (3) Cropping Systems  
- PLNT305 (3) Plant Pathology
To obtain a Minor in Agricultural Production, students must:

a) ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements given below.

b) offer a minimum total of 24 credits from the courses as given below, of which not more than 6 credits may be counted for both the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Complementary Courses: 18 credits

BREE300 (3) Elements of Agricultural Engineering
ENTO452 (3) Control of Insect Pests
AGEC231 (3) Economic Systems of Agriculture
AGEC320 (3) Economics of Agricultural Production
AGEC331 (3) Farm Business Management
AGEC350 (3) Agricultural Finance

A minimum of 3 credits selected from the following list:

PLNT310 (3) Plant Propagation
PLNT353 (3) Plant Structure and Function
PLNT358 (3) Flowering Plant Diversity
PLNT434 (3) Weed Biology and Control
PLNT495 (1) Seminar 1
PLNT496 (1) Seminar 2
SOIL210 (3) Principles of Soil Science
SOIL315 (3) Soil Fertility and Fertilizer Use

PLNT331 (3) Field Crops
PLNT341 (1) Horticulture - Cole Crops
PLNT343 (1) Horticulture - Root Crops
PLNT344 (1) Horticulture - Salad Crops
PLNT345 (1) Horticulture - Solanaceous Crops
PLNT346 (1) Horticulture - Temperate Fruits
PLNT347 (1) Horticulture - Small Fruits
PLNT348 (1) The Brassicas
PLNT421 (3) Landscape Plant Materials
PLNT460 (3) Plant Ecology
PLNT535 (3) Plant Breeding

SOIL310 (3) Post Harvest Fruit and Vegetable Technology
PLNT215 (1) Orientation in Plant Science
PLNT220 (1) Introduction to Vascular Plants
PLNT221 (1) Introduction to Fungi
PLNT322 (3) Greenhouse Management
PLNT331 (3) Field Crops
PLNT341 (1) Horticulture - The Alliums
PLNT342 (1) Horticulture - Cole Crops
PLNT343 (1) Horticulture - Root Crops
PLNT344 (1) Horticulture - Salad Crops
PLNT345 (1) Horticulture - Solanaceous Crops
PLNT346 (1) Horticulture - Temperate Fruits

Notes:
1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.

2. Not all courses are offered every year. For information on available courses, consult Class Schedule at www.mcgill.ca/undergraduate/courses. Complete listings can be found in the Courses section of this Calendar.

MINOR IN ECOLOGICAL AGRICULTURE

Academic Adviser: Professor J. Henning

This Minor program is designed to focus on the principles underlying the practice of ecological agriculture and is suitable for students wishing to farm, do extension and government work, and those intending to pursue postgraduate studies in this field.

Students are advised to consult their Major Program adviser and the Academic Adviser of the Minor in their first year. At the time of registration for the U2 year, students must declare their intent to obtain the Minor. With the agreement of their Major Program adviser, they must submit their program of courses already taken, and to be taken in their final year, to the Academic Adviser of the Agricultural Production Minor. The Academic Adviser of the Agricultural Production Minor will then certify which courses the student will apply toward the Minor and that the student’s program conforms with the requirements of the Minor.

General Regulations
To obtain a Minor in Ecological Agriculture, students must:

a) Ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements given below.

b) Offer a minimum total of 24 credits from the courses as given below, of which not more than 6 credits may be counted for both the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Required Courses: 12 credits

Complementary Courses: 12 credits

Notes:
1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.

2. Not all courses are offered every year. For information on available courses, consult Class Schedule at www.mcgill.ca/undergraduate/courses. Complete listings can be found in the Courses section of this Calendar.

13.6.8 Interdisciplinary Studies

Ecological Agriculture Program
Telephone: (514) 398-7928
Website: www.agrenv.mcgill.ca/agsciences/ecoagr
Required Courses: 9 credits
Complementary Courses: 15 credits

Required Courses:
1. AGR210 Agro-Ecological History 3
2. AGR340 Principles of Ecological Agriculture 3
3. AGR341 Ecological Agriculture Systems 3

Complementary Courses:
1. 15 credits chosen from the following, in consultation with the Academic Adviser for Ecological Agriculture with at least 3 credits chosen from:
   - SOIL335 (3) Soil Ecology and Management
   - SOIL445 (3) Agroenviron. Fertilizer Use
   - and the remaining credits to be chosen from: 3-6

AGRICULTURAL SCIENCES MAJORS

Academic Adviser: Katherine McClintock
Department of Plant Science
Telephone: (514) 398-7940

To meet the minimum credit requirement for the 52 credits

Required Courses: 52 credits
Complementary Courses: 19 credits
Electives: To meet the minimum credit requirement for the degree.

AGRICULTURAL SCIENCES MAJOR – GENERAL OPTION

(90 credits)

Required Courses: 52 credits
Complementary Courses: 19 credits
Electives: To meet the minimum credit requirement for the degree.

Notes:
1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study to ensure that they have met all conditions.
2. Not all courses are offered every year. For information on available courses, consult Class Schedule at www.mcgill.ca/minerva; complete listings can be found in the Courses section of this Calendar.
3. Students using AGRI491D1/AGRI491D2 towards the requirements of the Certificate/Minor are limited to an experience on farms or other enterprises that are either organic, biodynamic, or practicing permaculture. The placement must be approved by the academic advisor for the Certificate/Minor.
4. SOIL521 is an alternate year course.

Agricultural Sciences Majors are designed to provide students with a broad appreciation of the scientific and applied aspects of modern agriculture and the flexibility to pursue individual interests. During the summer months, students can gain valuable practical field experience (and obtain additional course credit) in the Agricultural Sciences Internship Major. Both majors consist of a similar core of required courses that confer eligibility to apply for membership in the Ordre des agronomes du Québec and other provincial institutes of agrology. Students in the Agricultural Sciences Majors can enrol in the General Option, or obtain more specialized experience by selecting the Ecological Agriculture, International Agriculture, Soil Science or Agricultural Biotechnology Options.
### AGRI301D1 Agrology Internship 3
### AGRI301D2 Agrology Internship 3

#### General Option
- All of the required courses (52 credits) specified for the Agricultural Sciences Major – General Option.
- Electives: To meet the minimum credit requirement for the degree.

#### Agricultural Sciences Internship Major – Agricultural Biotechnology Option
- All of the required courses (61 credits) specified for the Agricultural Sciences Major – Agricultural Biotechnology Option, with the addition of:
  - AEBI201D1 Agri-Environment Internship 3
  - AGR201D2 Agri-Environment Internship 3
  - AGR301D1 Agrology Internship 3
  - AGR301D2 Agrology Internship 3

#### Agricultural Sciences Internship Major – Ecological Agriculture Option
- All of the required courses (90 credits) specified for the Agricultural Sciences Major – Ecological Agriculture Option.
- Electives: To meet the minimum credit requirement for the degree.

#### Electives
- To meet the minimum credit requirement for the degree.

### Complementary Courses
- At least one of:
  - AEBI202 Cellular Biology 3
  - MIRC338 Bacterial Molecular Genetics 3
  - PARA400 Eukaryotic Cells and Viruses 3

### Credits
- 61 credits

---

### Entering the Field of Agricultural Sciences

**At least one production course in Agricultural Science:**
- PLNT331 Field Crops 3
- ANSC456 Principles of Plant Science 3
- SOIL315 Soil Fertility and Fertilizer Use 3

**Complementary Courses:**
- At least one of:
  - ANSC323 Mammalian Physiology 4
  - PLNT353 Plant Structure and Function 4

**at least one production course in Agricultural Science:**
- AGEC331 Farm Business Management 3
- ANSC450 Dairy Cattle Production 3
- ANSC452 Beef Cattle and Sheep Production 3
- ANSC454 Swine Production 3
- ANSC456 Poultry Production 3
- PLNT331 Field Crops 3

**and at least 3 credits must be chosen from three of the four blocks below:**
- AGR201D1 Agri-Environment Internship 3
- AGR201D2 Agri-Environment Internship 3
- AGR1340 Principles of Ecological Agriculture 3
- WILD205 Principles of Ecology 3

**Required Courses:**
- AGR1341 Ecological Agriculture Systems 3

**Electives:**
- To meet the minimum credit requirement for the degree.

### Credits
- 16 to 19 credits
MICR331 (3) Microbial Ecology
PLNT434 (3) Weed Biology and Control
PLNT460 (3) Plant Ecology
AGEC333 (3) Resource Economics
ENVR201 (3) Society and Environment
ENVR400 (3) Environmental Thought

Agricultural Sciences Internship Major – Ecological Agriculture Option (96 credits)

Required Courses: 73 credits

Complementary Courses: 13 credits

Electives: To meet the minimum credit requirement for the degree.

Credits: 73

Required Courses:
- All of the required courses (61 credits) specified for the Agricultural Sciences Major – Ecological Agriculture Option, with the addition of:
  - AGR201D1 Agri-Environment Internship 3
  - AGR201D2 Agri-Environment Internship 3
  - AGR301D1 Agrology Internship 3
  - AGR301D2 Agrology Internship 3

Complementary Courses:
- at least one of:
  - ANSC323 (4) Mammalian Physiology
  - PLNT353 (4) Plant Structure and Function

at least one production course in Agricultural Science:
- AGEC331 (3) Farm Business Management
- ANSC450 (3) Dairy Cattle Production
- ANSC452 (3) Beef Cattle and Sheep Production
- ANSC454 (3) Swine Production
- ANSC456 (3) Poultry Production
- PLNT331 (3) Field Crops

at least 3 credits must be chosen from two of the three blocks below:
- AGR435 (3) Soil and Water Quality Management
- SOIL335 (3) Soil Ecology and Management
- SOIL445 (3) Agroenviron. Fertilizer Use
- SOIL521 (3) Soil Microbiology and Biochemistry
- MIRC331 (3) Microbial Ecology
- PLNT434 (3) Weed Biology and Control
- PLNT460 (3) Plant Ecology
- AGEC333 (3) Resource Economics
- ENVR201 (3) Society and Environment
- ENVR400 (3) Environmental Thought

Agricultural Sciences Internship Major – International Agriculture Option (96 credits)

Required Courses: 70 credits

Electives: To meet the minimum credit requirement for the degree.

Credits: 70

Required Courses:
- All of the required courses (58 credits) specified for the Agricultural Sciences Major – International Agriculture Option, with the addition of:
  - AGR201D1 Agri-Environment Internship 3
  - AGR201D2 Agri-Environment Internship 3
  - AGR301D1 Agrology Internship 3
  - AGR301D2 Agrology Internship 3

Complementary Courses:
- at least one of:
  - ANSC323 (4) Mammalian Physiology
  - PLNT353 (4) Plant Structure and Function

at least one production course in Agricultural Science:
- AGEC331 (3) Farm Business Management
- ANSC450 (3) Dairy Cattle Production
- ANSC452 (3) Beef Cattle and Sheep Production
- ANSC454 (3) Swine Production
- ANSC456 (3) Poultry Production
- PLNT331 (3) Field Crops

a minimum of 9 credits chosen from the following:
- ANTH212 (3) Anthropology of Development
- POLI227 (3) Developing Areas/Introduction
- SOC1254 (3) Development and Underdevelopment
- GEOG216 (3) Geography of the World Economy
- GEOG404 (3) Environmental Management 2
- AGRI341 (3) Ecological Agriculture Systems
- AGRI305 (3) Barbados Agro-Ecosystems
- AGEC430 (3) Agriculture, Food and Resource Policy
- NUTR501 (3) Nutrition in Developing Countries

Agricultural Sciences Internship Major – International Agriculture Option (96 credits)

Required Courses: 52 credits

Electives: To meet the minimum credit requirement for the degree.

Credits: 52

Required Courses:
- All of the required courses (52 credits) specified for the Agricultural Sciences Major – General Option, with the addition of:
  - AGR201D1 Agri-Environment Internship 3
  - AGR201D2 Agri-Environment Internship 3

Complementary Courses:
- at least one of:
  - ANSC323 (4) Mammalian Physiology
  - PLNT353 (4) Plant Structure and Function

at least one production course in Agricultural Science:
- AGEC331 (3) Farm Business Management
- ANSC450 (3) Dairy Cattle Production
- ANSC452 (3) Beef Cattle and Sheep Production
- ANSC454 (3) Swine Production
- ANSC456 (3) Poultry Production
- PLNT331 (3) Field Crops

a minimum of 18 credits chosen from the following:
- AGR435 (3) Soil and Water Quality Management
- BRE217 (3) Hydrology and Water Resources
- SOIL200 (3) Introduction to Earth Science
- SOIL326 (3) Soil Genesis and Classification
- SOIL331 (3) Soil Physics
- SOIL335 (3) Soil Ecology and Management
- SOIL410 (3) Soil Chemistry
- SOIL521 (3) Soil Microbiology and Biochemistry
AGRICULTURAL SCIENCES INTERNSHIP MAJOR – SOIL SCIENCE OPTION (96 credits)

**Required Courses:** 64 credits

**Complementary Courses:** 25 credits

**Electives:** To meet the minimum credit requirement for the degree.

**CREDITS**

**Required Courses:**
- All of the required courses (52 credits) specified for the Agricultural Sciences Major – Soil Science Option, with the addition of:
  - AGRI201D1 Agri-Environment Internship 3
  - AGRI201D2 Agri-Environment Internship 3
  - AGRI301D1 Agrology Internship 3
  - AGRI301D2 Agrology Internship 3

**Complementary Courses:**
- As described for the Agricultural Sciences Major – Soil Science Option.

### 13.6.9 Field Studies

#### African Field Study Semester

The Department of Geography, Faculty of Science, coordinates the 15-credit interdisciplinary African Field Study Semester, see section 15.1.1 "African Field Study Semester".

Note: The AFSS will only be offered in 2005-2006 pending approval by the Dean of Science.

#### Barbados Field Study Semester

The Department of Bioresource Engineering, Faculty of Agricultural and Environmental Sciences, coordinates the 15-credit interdisciplinary Barbados Field Study Semester, offered in the fall term. For more information, see section 15.1.2 "Barbados Field Study Semester".

#### Macdonald Summer Field Course

The Department of Natural Resource Sciences coordinates a summer field course which offers students the opportunity to participate in supervised field research not easily studied at other times of the year. For more information, see the Department of Natural Resource Sciences, section 13.6.6 "Department of Natural Resource Sciences".

#### Panama Field Study Semester

The program is a joint venture between McGill University and the Smithsonian Tropical Research Institute (STRI) in Panama. For more information, see section 15.1.3 "Panama Field Study Semester". You can also visit the following website for details: www.mcgill.ca/mse/field_study/panama

### 13.7 Graduate Programs

Graduate work may be undertaken on the Macdonald Campus, through the Departments of Agricultural Economics, Animal Science, Bioresource Engineering, Food Science and Agricultural Chemistry, Natural Resource Sciences, and Plant Science, the Institute of Parasitology, and the School of Dietetics and Human Nutrition.

The advanced courses of study offered lead to the degrees of Master of Science, Graduate Certificate in Biotechnology, and Doctor of Philosophy.

Information on these programs and related fellowships is available from the Student Affairs Office, Macdonald Campus of McGill University, Sainte-Anne-de-Bellevue, QC H9X 3V9.

The Graduate and Postdoctoral Studies Calendar and full information regarding graduate courses, theses, registration, fellowships, etc., can be accessed on the McGill Website, www.mcgill.ca.

### 13.8 Farm Management and Technology Program

#### 13.8.1 Program – FMT

This 3-year academic and practical program is offered on the Macdonald Campus and taught by the staff of the Faculty of Agricultural and Environmental Sciences of McGill University. The program is funded by the ministère de l’Agriculture, des Pêcheries et de l’Alimentation du Québec and authorized by the ministère de l’Éducation du Québec.

The educational goals of the program are:

1. to make our graduates competent in the exercise of their profession;
2. to help the student’s integration into professional life;
3. to foster professional mobility;
4. to foster a need for continual development of professional knowledge.

Six academic terms are spent on the Macdonald Campus studying a sequence of courses in soil, plant science, animal science, engineering, economics and management. The first summer of the program includes a 13-week internship on an agricultural enterprise other than the home farm, or an agricultural business where the student learns the many skills and encounters the many problems related to modern commercial agriculture. Students prepare for their Enterprise internship during both academic semesters of Year 1 through two Farm Practice courses.

During the second summer, students are registered in Entrepreneurship 1, which involves agricultural enterprises. The students will be responsible for data collection to be used in their Farm Project and the Nutrient Management Plan 2 when they return to campus for the Fall semester. The internships and practicums will enable the students to relate their academic work to the reality of farming and the agri-food sector.

Finally, courses in English, Français, Humanities, Physical Education and two complementary courses taken during the program will entitle the student to receive a Diplôme d'études collégiales (DEC) from the ministère de l’Éducation du Québec. Students will also receive a certification from Macdonald Campus stating that they have successfully completed the requirements of the Farm Management and Technology Program.

#### 13.8.2 Entrance Requirements – FMT

1. Students should have a good practical knowledge of farming under eastern Canadian conditions. One year of experience is recommended but under special conditions a four-month summer season is acceptable.
2. The minimum academic entrance requirements are a Quebec High School Leaving Certificate (Secondary V), or its equivalent and any other academic requirement set by the M.E.Q.
3. All candidates for admission must make arrangements to come to the Macdonald Campus for an interview prior to admission to the program.
4. Admission to this program is only in the Fall semester.
5. We strongly encourage incoming students to acquire their driver’s permit (both for cars and farm equipment) before com-
ing to Macdonald Campus. This is first for safety reasons, given that students work with farm equipment (Soil Preparation) very early on as they arrive at Macdonald. As well, most farmers require that their employees and stagiaires know how to drive and possess the appropriate driver’s license.

13.8.3 Registration – FMT

Students in the Farm Management and Technology Program must register on-line using Minerva at www.mcgill.ca/minerva-students for each semester at McGill. 

Note: The University reserves the right to make changes without prior notice to the information contained in this publication, including the alteration of various fees, schedules, conditions of admission and credit requirements and the revision or cancellation of particular courses. In normal circumstances, individual courses will not be offered with less than five registrants.

13.8.4 Program Outline

Administrative Unit
FMTP 001 Farm Practice 1  
FMTP 011 Farm Practice 2  
FMTP 036 Enterprise Internship  
FMTP 007 Health and Farm Safety  
FMTP 037 Entrepreneurship 1

Bioresource Engineering
FMTP 018 Building Maintenance  
FMTP 024 Farm Building Planning  
FMTP 014 Machinery Management  
FMTP 004 Microcomputing  
FMTP 027 Precision Farming  
FMTP 021 Soil and Water Conservation  
FMTP 003 Soil Preparation  
FMTP 019 Tools and Machinery Maintenance

Agricultural Economics
FMTP 039 Agri-Marketing  
FMTP 002 Introduction to Economics  
FMTP 038 Financial and Managerial Accounting  
FMTP 042 Budgeting, Finance and Policies  
FMTP 043 Entrepreneurship 2  
FMTP 025 Farm Project  
FMTP 044 Management of Human Resources

Animal Science
FMTP 005 Animal Anatomy and Physiology  
FMTP 008 Introduction to Animal Science

English
FMTP 080 English Upgrading  
FMTP 084 English for FMT  
FMTP 081 Components of Discourse  
FMTP 082 Literary Genres  
FMTP 083 Literary Themes

Français
FMTP 075 Langue française et communication  
FMTP 098 Français agricole

Humanities
FMTP 085 Humanities 1: Knowledge  
FMTP 086 Humanities 2: World Views  
FMTP 087 Environmental and Organizational Issues

Natural Resource Sciences
FMTP 040 Nutrient Management Plan 1  
FMTP 041 Nutrient Management Plan 2  
FMTP 009 Soil Fertilization

Physical Education
FMTP 093 Health and Physical Education  
FMTP 094 Physical Activity  
FMTP 095 Active Living

Plant Science
FMTP 006 Agricultural Botany  
FMTP 017 Pesticide Use

ELECTIVE PRODUCTION COURSES

We offer four production courses in the area of Animal Science and four production courses in the area of Plant Science. Students must take a minimum of two courses in each category for a total of four courses. Students could elect to take more than four courses if they wish, after a discussion with their academic adviser. They must take a minimum of two courses per semester.

Animal Science category
FMTP 028 Dairy Heifer Management  
FMTP 029 Dairy Herd Management  
FMTP 030 Swine and Poultry  
FMTP 031 Beef and Sheep

Plant Science category
FMTP 034 Feed Crops  
FMTP 035 Industrial Crops  
FMTP 033 Greenhouse Crops  
FMTP 032 Fruit and Vegetable Crops

COMPLEMENTARY COURSES *

Students must take the following complementary courses to meet the program requirements:

FMTP 096 Forests, Forestry and Society  
FMTP 097 Landscape Design  

* After consultation with their academic adviser, students can substitute complementary courses taken at another collegial institution. This includes science courses which are required for further studies in a degree program. The cost associated with courses taken elsewhere must be assumed by the students.

COMPREHENSIVE ASSESSMENT

The objective of this examination is to ensure that students have attained the objectives and standards for each competency in the program. Successful completion of the Comprehensive Assessment is mandatory to obtain the D.E.C.

The passing grade is 60%. The mark indicating that the student has successfully completed the Comprehensive Assessment will appear on the student’s transcript. Students who failed the Comprehensive Assessment will be offered the possibility of completing the same the following year.

ENGLISH EXIT EXAMINATION

All students who wish to graduate and obtain the D.E.C. must pass the English Exit Examination that is offered by the M.E.Q. Students must take this examination on the date selected by the M.E.Q.

13.8.5 Academic Rules and Regulations – FMT

13.8.5.1 Sessional Dates

The number of teaching and examination days is set by the ministère de l’Éducation du Québec. The sessional dates vary from year to year. At the present time, each semester has 75 teaching days and 7 days of exams.

13.8.5.2 Last Day for Withdrawal or Course Additions

The last day to make course registration changes for Fall term courses is September 20.

The last day to make course registration changes for Winter term courses is February 15.

13.8.5.3 Academic Standing

Attendance in class is compulsory. Students with attendance of less than 80% may not be permitted to write examinations.

Examinations and other work in courses will be marked according to the percentage system. The minimum passing mark in a course is 60%.

When a student’s cumulative percent average (CPA) or semestrial percent average (SPA) first drops below 60%, or they fail four or more courses in a semester, withdrawal is advised. Students who choose to remain in the program are on probation.

Students on probation are normally permitted to register for no more than 10 credits per semester. They are not permitted to be
13.8.6 Fees and Expenses – FMT

13.8.6.1 Fees

Tuition fees for all full-time students who are eligible for the Farm Management and Technology Program are paid by the ministère de l’Agriculture, des Pêcheries et de l’Alimentation du Québec. Student Services and Student Societies’ fees, as well as course material fees, will be charged according to the schedule in effect for all Macdonald Campus students. At the time of printing, the fees were $890.95 for the Fall semester and $546.35 for the Winter semester.

* 2005-06 fees, subject to change without notice.

13.8.6.2 Textbooks and Supplies

The cost of textbooks and supplies is estimated at $200.00 per semester.

13.8.6.3 Financial Assistance

A limited number of loans are granted on the basis of financial need to full-time students who maintain satisfactory academic standing, however, all applicants for McGill aid must apply for maximum government aid or other assistance for which they are eligible.

Applicants must arrange for an interview with a Student Aid Counsellor. During the academic year, the Counsellor visits Macdonald Campus on a regular basis to help students with financial difficulties.

For more information see section 4.9 “Scholarships and Financial Aid” or contact the Coordinator at the Student Services Centre, telephone (514) 398-7992. Applications for McGill loans may be obtained from the Coordinator.

13.8.7 Residence Accommodation – FMT

The Laird Hall Residence has a capacity for more than 210 students. It accommodates undergraduate, graduate, and Farm Management and Technology Program students on the Macdonald Campus. For more information, see section 4.13.2 “University Residences – Macdonald Campus”.

13.9 Instructional Staff
Agricultural and Environmental Sciences – Instructional Staff

Dunphy, Gary B.; B.Sc.(U.N.B.), M.Sc., Ph.D.(Mem.); Associate Professor of Entomology
Dutilleul, Pierre R.; B.Sc., Ph.D.(Belgium); Professor of Statistics
Egeland-Hovda, Grace M.; B.A.(Luther), Ph.D.(Pittsburg); Associate Professor of Nutrition and Canada Research Council Chair
Elyett, William R.; B.A.(Sir G. Wms.), B.Ed.(P.E.)(McG.); Faculty Lecturer, Farm Management and Technology Program and Director of Athletics
Enright, Peter; B.Sc.(Agr. Eng.), M.Sc.(McG.); Faculty Lecturer, Bioresource Engineering
Faubert, Gaétan M.; B.Sc.(Sherbrooke), M.Sc.(Mtl.), Ph.D.(McG.); Professor of Parasitology
Fortin, Marc G.; B.Sc., M.Sc.(Laval), Ph.D.(McG.); Associate Professor of Plant Science (William Dawson Scholar)
Fyles, James W.; B.Sc., M.Sc.(Vic.); Ph.D.(Alta.); Professor of Agriculture Economics and Chair of Department
Fournier, Murray; B.Sc.(Manit.), Ph.D.(Alta.); Assistant Professor of Wildlife Biology
Gray-Donald, Katherine; B.Sc., Ph.D.(McG.); Associate Professor of Dietetics and Human Nutrition
Hayes, J. Flannan; B.Agr.Sc., M.Agr.Sc.(Dub.), Ph.D.(N.C.St.); Professor of Animal Science
Hendershot, William H.; B.Sc.(Tor.), M.Sc.(McG.), Ph.D.(U.B.C.); Associate Dean (Academic), Professor of Soil Science
Hening, John C.; B.Sc., Ph.D.(Guelph); Associate Professor of Agricultural Economics and Chair of Department
Humphries, Murray; B.Sc.(Manit.), Ph.D.(Alta.); Assistant Professor of Parasitology
Jabaji-Hare, Suha; B.Sc.(AUB), M.Sc.(Guelph), Ph.D.(Waterloo); Associate Professor of Food Science and Agricultural Chemistry
Jabaji-Hare, Suha; B.Sc.(AUB), M.Sc.(Guelph), Ph.D.(Waterloo); Associate Professor of Plant Science
Jacobs Starkey, Linda; B.Sc.(H.Ec.)(Mnt.Str.VIN.), M.Sc., Ph.D.(McG.); RD, F.D.C; Faculty Lecturer, School of Dietetics and Human Nutrition
Jardim, Armando; B.Sc., Ph.D.(U.Vic.); Assistant Professor of Parasitology
Johns, Timothy A.; B.Sc.(Mcm.), M.Sc.(U.B.C.), Ph.D.(Mich.); Professor of Dietetics and Human Nutrition
Jones, Peter J.; B.Sc.(U.B.C.), M.Sc.(U.B.C.), Ph.D.(Tor.); Professor of Dietetics and Human Nutrition
Journaud, Mélanie, B.Sc.(Sherb.), B.Sc., M.Sc.(Nutr.Sci.)(McG.); Faculty Lecturer: School of Dietetics and Human Nutrition
Kermasha, Selim; B.Sc.(Baghdad), D.Sc.(Nat. Polytech.Inst., Lorraine(Nancy)); Associate Professor of Food Science and Agricultural Chemistry
Knowles, Roger; B.Sc.(Birm.), Ph.D., D.Sc.(Lond.); F.R.S.C.; Emeritus Professor of Microbiology
Kok, Robert; B.Sc., Ph.D.(W.Ont.); Professor of Bioresources Engineering and Chair of Department
Koski, Kristine G.; B.S., M.S.(Wash.); Ph.D.(Calif. Davis); Associate Professor and Director of School of Dietetics and Human Nutrition
Kubow, Stan; B.Sc.(McG.), M.Sc.(Tor.), Ph.D.(Guelph); Associate Professor of Dietetics and Human Nutrition
Kuhnlein, Harriet V.; B.S.(Penn. St.), M.S.(Oregon), Ph.D.(Calif. Berkeley); Professor of Dietetics and Human Nutrition
Kuhnlein, Urs; B.Sc.(Fed. Inst. of Tech., Zurich), Ph.D.(Geneva); Professor of Animal Science
Kushalappa, Ajamada C.; B.Sc., M.Sc.(B'Iore), Ph.D.(Flor.); Associate Professor of Plant Science
Lewis, David J.; B.Sc., M.Sc., Ph.D.(Mem.); Associate Dean (Student Affairs) and Associate Professor of Entomology
Lussier, Serge; B.Sc.(Agr.)(McG.); Assistant Director and Faculty Lecturer, Farm Management and Technology Program
MacKenzie, Angus F.; B.S.A., M.Sc. (Sask.), Ph.D.(C’nell); Emeritus Professor of Soil Science
MacLeod, Robert A.; B.A., M.A.(U.B.C.), Ph.D.(Wis.), F.R.S.C.; Emeritus Professor of Microbiology
Madramootoo, Chandra; B.Sc.(Agr.Eng.), M.Sc., Ph.D.(McG.); Professor of Biore sources Engineering and Director, Brace Centre for Water Resources Management (James McGill Professor)
Marshall, William D.; B.Sc.(U.N.B.), Ph.D.(Mem.); Professor of Food Science and Agricultural Chemistry and Chair of Department
Mather, Diane E.; B.Sc.(Agr.)(McG.), M.Sc., Ph.D.(Guelph); Professor of Plant Science
McClintock, Katherine; B.A. (Wellesley), B.Sc.(Agr.), M.Sc. (McG.); Faculty Lecturer, Department of Plant Science
Mckyes, Edward; B.Eng., M.Eng., Ph.D.(McG.), F.C.S.A.E.; Professor of Bioresources Engineering
Menkhys, Guy R.; B.Sc., Ing.Agron. (Gembloxi), Ph.D.(Calif.); Associate Professor of Soil Science
Moffat, Donald; B.Ed.(McG.); Grad Dip in Sports Admin. (C’da); Faculty Lecturer (PT), Farm Management and Technology Program and Instructional Coordinator of Athletics
Mok, Ka-Yan Diana; B.Math., B.E.S. (Waterloo), M.P.I. (Queen’s), Ph.D.(Toronto); Assistant Professor of Agricultural Economics (joint appoint. with Geography)
Molga, Christian; B.Sc.(Guelph), B.Sc.(Ottawa); Faculty Lecturer, Farm Management and Technology Program
Monardes, Humberto G.; B.Sc.(Concepcion, Chile), M.Sc.(Ph.D.); Associate Professor of Animal Science
Moxley, John E.; B.Sc.(Agr.)(McG.), M.Sc.(McG.), Ph.D.(C’nell), F.A.I.C.; Emeritus Professor of Animal Science
Mustafa, Arif F.; B.Sc., M.Sc.(Khartoum), Ph.D.(Sask.); Assistant Professor of Animal Science
Ngadi, Michael O.; B.Eng.(Nigeria), M.Sc., Ph.D.(TUNS); Associate Professor of Bioresources Engineering (William Dawson Scholar)
Neilson, Helen R.; B.M.E., B.H.S., M.Sc.(McG.), P.D.T.; Emeritus Professor of Food Science
Ng Kwei Hang, Kwet Fane; B.Sc.(Agr.), M.Sc., Ph.D.(McG.); Professor of Animal Science
Niven, Donald F.; B.Sc., Ph.D.(Aber.); Associate Professor of Microbiology
Phillips, Leroy E.; B.Sc.(Agr.), M.Sc. (McG.), B.Sc.(Guelph); Associate Professor of Animal Science
Phillips, Sandra; B.A.(Queen’s), B.Sc.(F.Sc.), M.Sc.(McG.); Faculty Lecturer (Stage), School of Dietetics and Human Nutrition
Plourde, Hugues; B.Sc.(Nutr.Sci.)(McG.), M.Sc.(Nutr.)(Montr.); Faculty Lecturer, School of Dietetics and Human Nutrition
Prashar, Shiv O.; B.Tech, M.Tech.(Punjab), Ph.D.(U.B.C.); Professor of Bioresource Engineering (James McGill Professor)
Prichard, Roger K.; B.Sc., Ph.D.(N.S.W.); Professor, Institute of Parasitology (James McGill Professor)
Raghavan, G.S. Vijaya; B.Eng.(Bangalore), M.Sc.(Guelph), Ph.D.(Colo.St.); F.A.S.A.E, F.C.S.A.E., F.A.S.M.E.; Professor of Bioresource Engineering (James McGill Professor)
Ramaswamy, Hosahalli; B.Sc.(Bangalore), M.Sc.(Mysore), M.Sc., Ph.D.(U.B.C.); Professor of Food Science and Agricultural Chemistry
Rau, Manfred E.; B.Sc., Ph.D.(W.Ont.); Associate Professor of Parasitology in Department of Natural Resource Sciences
Ribeiro, Paula A.; B.Sc., Ph.D.(York); Associate Professor of Parasitology
Ritter, Heidi; B.Sc., M.Sc.(Nutr.Sci.)(McG.); Faculty Lecturer, School of Dietetics and Human Nutrition
Rose, Maureen; B.Sc.(F.Sc.), M.Ed., Ph.D.(McG.); Faculty Lecturer (Stage), School of Dietetics and Human Nutrition
Routhier, Joane; B.Sc.(F.Sc.)(McG.); Faculty Lecturer, School of Dietetics and Human Nutrition
Ruiz-Feria, Ciro; B.S.(Autonoma Chapingo, Mexico), M.Sc.(Texas A&M), Ph.D.(Arkansas); Assistant Professor of Animal Science
Scheu, Peter H.; Dipl.Sc.Nat.(Zurich), Ph.D.(Tor.); Emeritus Professor of Agricultural Physics
Scott, Marilyn E.; B.Sc.(U.N.B.), Ph.D.(McG.); Associate Professor of Parasitology
Seguin, Philippe; B.Sc.(Agr.), M.Sc.(McG.), Ph.D.(Minn.); Assistant Professor of Plant Science
Sheppard, John D.J.; B.Sc.(Eng.)(Guelph), M.E., Sc.(W.Ont.), Ph.D.(McG.); Associate Professor of Bioresource Engineering
Simpson, Benjamin K.; B.Sc.(Univ. Sc. & Tech., Kumasi), Ph.D.(Memorial); Associate Professor of Food Science and Agricultural Chemistry
Smith, Donald L.; B.Sc., M.Sc.(Acad.), Ph.D.(Guelph); Professor of Plant Science and Chair of Department
Smith, James M.; B.Sc.(NEPoly.), Ph.D.(McG.); Faculty Lecturer, Institute of Parasitology
Smith, James P.; B.Sc., M.Sc.(Strathclyde), Ph.D.(Alta.); Professor of Food Science and Agricultural Chemistry
Spithill, Terence W.; B.Sc., Ph.D.(Monash U., Australia); Professor of Parasitology, Director, Institute of Parasitology, and Canada Research Chair in Immunoparasitology
Steppler, Howard A.; B.S.A.(Man.), M.Sc., Ph.D.(McG.), F.A.I.C.; Emeritus Professor of Agrometeorology
Strachan, Ian; B.Sc.(Tor.), M.Sc., Ph.D.(Queen's); Assistant Professor of Agronomy
Strachan, Ian; B.Sc.(Tor.), M.Sc., Ph.D.(Queen's); Assistant Professor of Agrometeorology
Thibault, Louise; B.Sc., M.Sc., Ph.D.(Laval); Associate Professor of Dietetics and Human Nutrition
Thomasin, Paul; B.Sc.(Agr.)(McG.), M.S., Ph.D.(Hawaii); Associate Professor of Agricultural Economics
Tittman, Rodger D.; B.Sc.(McG.), M.Sc.(Bishop's), Ph.D.(U.N.B.); Fellow A.O.U.; Associate Professor of Wildlife Biology and Associate Director, Avian Science and Conservation Centre
van de Voort, Frederik R.; B.Sc., M.Sc., Ph.D.(U.B.C.); Professor of Food Science and Agricultural Chemistry
Vickery, Vernon R.; B.Sc.(Agr.), M.Sc., Ph.D.(McG.); Emeritus Curator of the Lyman Entomological Museum and Research Laboratory
Wade, Kevin; B.Agr.Sc., M.Agr.Sc.(Dublin), Ph.D.(C'nell); Associate Professor of Animal Science
Wang, Ning; B.Eng.(E.E.), M.Eng.(E.E.)(AIT), M.Sc.(E.E.), Ph.D.(Kansas St.); Assistant Professor of Bioresource Engineering
Waterway, Marcia J.; B.A.(Calvin Coll.), M.S.(Wis.), Ph.D.(C'nell); Associate Professor of Plant Science and Curator, McGill University Herbarium
Watson, Alan K.; B.Sc.(Agr.), M.Sc.(U.B.C.), Ph.D.(Sask.); Professor of Agronomy and Director, Phytorium/Biopesticide Quarantine Facility
Wees, David D.; B.Sc.(Agr.), M.Sc.(McG.); Faculty Lecturer, Department of Plant Science
Whalen, Joann; B.Sc.(Agr.)(Dal. – NSAC); M.Sc.(McG.), Ph.D.(Ohio St.); Assistant Professor of Soil Science
Wheeler, Terry; B.Sc.(Memorial), M.Sc., Ph.D.(Guelph); Associate Professor of Entomology and Director, Lyman Entomological Museum and Research Laboratory
Whyte, Lyle G.; B.Sc.(Regina), Ph.D.(Wat.); Associate Professor of Microbiology and Canada Research Council Chair
Wykes, Linda; B.Sc., M.Sc., Ph.D.(Toronto); Associate Professor of Dietetics and Human Nutrition (William Dawson Scholar)
Yaylayan, Varoujan A.; B.Sc., M.Sc.(Beirut), Ph.D.(Alta.); Associate Professor of Food Science and Agricultural Chemistry
Zadworny, David; B.Sc., Ph.D.(Guelph); Associate Professor of Animal Science
Zhao, Xin; B.Sc., M.Sc.(Nanjing), Ph.D.(C'nell); Associate Professor of Animal Science and Chair of Department (William Dawson Scholar)
