Fax: (514) 398-8900
Email: hogan@med.mcgill.ca

2 History

2.1 Faculty of Dentistry

The history of dental education in Quebec goes back to 1892 when the Association of Dental Surgeons of the Province of Quebec founded, in Montreal, a dental school known as the Dental College of the Province of Quebec. Instruction in this College was in both English and French and the College was located on Phillips Square. This College became associated with Bishop's University in Lennoxville, Quebec, four years later as a department in the Faculty of Medicine of that University, but remained situated in Montreal. In this way the clinical training was provided by the College and the academic training by the University. The first D.D.S. degree in the Province of Quebec was granted by Bishop's University.

The McGill Dental School was established in June 1904 as a department in the Faculty of Medicine and continued as such until 1920 when it became known as the Faculty of Dentistry.

The Faculty of Dentistry has always been closely associated with the Montreal General Hospital, where the clinical teaching in the Faculty is mainly carried out along with rotations to other teaching hospitals. The preclinical teaching laboratory is housed in the Strathcona Anatomy and Dentistry Building on campus. The basic science subjects are taught in conjunction with the Faculty of Medicine during the first 18 months of the program.
3 General Information

3.1 Admission Procedures and Requirements

Application for admission to the Faculty of Dentistry must be made on the University and Faculty forms which may be obtained from the Administrative Assistant (Student Affairs). As the number of students in each class is limited, application should be made early and in any case not later than the fifteenth of November for applicants whose residence is outside of Quebec, the first of February for residents of Quebec applying to the four-year program, and the first of March for residents of Quebec applying to the five-year program. All documents, including transcripts and letters of recommendation, must be submitted by these deadlines. Each application must be accompanied by a non-refundable fee of $60 in the form of a certified cheque or money order payable to McGill University. The results of all prerequisite subjects must be submitted to this Faculty prior to June 1 for August registration.

Canadian applicants are required to undertake the Canadian Dental Association Aptitude Test and have the results sent to the Faculty. Students applying to the four-year program must complete this Test in the Fall prior to their application year. Students applying to the five-year program are advised to attempt this Test in the Fall. The Test should be retaken if it was written more than three years before the date of application. Detailed information may be obtained from the Administrator, Dental Aptitude Test Program, The Canadian Dental Association, 1815 Alta Vista Drive, Ottawa, ON, K1G 3Y6.

Candidates applying from the United States should take the American Dental Association Aptitude Test and have the results sent to the Faculty of Dentistry.

Candidates who have studied in a foreign country must have their transcripts evaluated by the Service des équivalences, Ministère des relations avec les citoyens et de l’immigration, 454 Place Jacques Cartier, Fifth Floor, Montreal, Quebec H2Y 3B3. Telephone (514) 873-5647.

A reservation fee of $250 is payable by Province of Quebec applicants within 15 days of the receipt of notice that the student has been accepted for admission; all other accepted applicants must pay a reservation fee of $1,000. This fee will be credited towards the applicant’s University fees, but will not be returned if the student fails to register.

The language of instruction is English.

Four-Year Program

A high academic standing is required for this program. The average for the incoming classes over the last few years has been between 3.4 and 3.7. A maximum of four applications is permitted, coinciding with academic progress.

Candidates currently in university must have completed at least: one year (two semesters) in Mathematics and in each of the following courses, with laboratory:

- General Biology
- General Chemistry
- Organic Chemistry
- Physics

one half-year (one semester) university level course in:

- Cell Biology
- Molecular Biology.

A full year university level course in Biochemistry may be substituted for the courses in Cell and Molecular Biology.

Five-Year Program

Prospective applicants who are citizens or Permanent Residents of Canada living in the province of Quebec and who are enrolled in the final year of the Sciences Profile of the Quebec Colleges of General and Professional Education (CEGEP) are eligible to apply for the five-year program.

Required courses are:

- Biology 301, 401
- Chemistry 101, 201, 202
- Mathematics 103, 203
- Physics 101, 201, 301

Recommended course: Chemistry 302; those who do not take this course in CEGEP will be required to take an equivalent course in the first year of the program.

CEGEP students who have been enrolled formerly in college or university programs or in post secondary technical schools, within or outside of the Province, are not eligible to apply to the five-year program. Prospective applicants who have completed CEGEP and are registered in an undergraduate degree program must fulfill the requirements for, and make application to, the four-year program.

In the first dental preparatory (DENT-P) year, the students are registered in the Faculty of Science. In addition to completing the specific requirements for entry into the four-year program, they must take a number of elective courses selected for the purpose of broadening and enriching their education. Following the successful completion of this year, determined by a promotions committee, students proceed into the first year of the four-year program.

It should be noted that there are more applicants for the five-year program than can be accepted. Unsuccessful applicants are ordinarily well qualified for admission into other undergraduate degree programs (e.g., B.A., B.Sc.). All applicants are advised to make application for an alternative program. This can be done by submitting a separate application which must be obtained from and returned to the Admissions, Recruitment and Registrar’s Office.

3.2 Entrance to Advanced Standing

Students may be considered for admission to the Preclinical Teaching – Dentistry component of the Four-Year Program if space is available. Students who have received their dental degree from a non-Canadian university should contact the National Dental Examining Board of Canada for information concerning the special programs which will be offered at some Canadian dental schools. McGill University will not have this special program.

3.3 Award of McGill B.Sc. Degree

Students who have entered this Faculty from the Faculty of Science at McGill University shall be eligible to receive a B.Sc. degree upon completion of the dental degree provided that they have completed a minimum of 60 credits of a 90-credit program (90 credits of a 120-credit program) while registered in the Faculty of Science and have fulfilled the requirements of a degree program. Students wishing to be considered must submit a written application to the office of the Associate Dean of Science at least four months before Convocation.

3.4 Professional Practice

Applicants are reminded that a university degree in dentistry does not in itself confer the right to practise the profession of dentistry. It is necessary to comply with the dental laws of the country, province or state in which one proposes to practise. Students, therefore, are advised to register their qualifications at the beginning of their university course with the licensing body in the area in which they intend to practise.

3.5 Licensure Requirements

PROVINCE OF QUEBEC

Candidates who have successfully completed the regular program of the Faculty of Dentistry, McGill University, may be eligible for licensure. In order to practise in the Province of Quebec, candidates must successfully complete the comprehensive examinations held conjointly with the National Dental Examining Board of
Canada and l’Ordre des Dentistes du Québec and meet the French language requirement for professionals, which is fully described in the combined General Information section of this Calendar. Candidates who wish to practise elsewhere in Canada must also successfully complete the National Dental Examining Board comprehensive examinations.

PROVINCIAL DENTAL BOARDS
Students are advised to write to the addresses listed below for information whenever they are in doubt as to the regulations of any province in Canada.
Alberta – Executive Registrar, Alberta Dental Association, 101-8230 105th Street, Edmonton, AB, T6E 5H9
British Columbia – Registrar, College of Dental Surgeons of British Columbia, 500-1765 West 8th Avenue, Vancouver, BC, V6J 5C6
Manitoba – Registrar, Manitoba Dental Association, 103-698 Corydon Avenue, Winnipeg, MB, R3M 0X9
New Brunswick – Registrar, New Brunswick Dental Society, 520 King Street, Suite 820, Fredericton, NB, E3B 4Z9
Newfoundland – Registrar, Newfoundland Dental Board, 139 Water Street, 6th Floor, St. John’s, NF, A1C 1B2
Nova Scotia – Registrar, Provincial Dental Board of Nova Scotia, 5991 Spring Garden Road, #602, Halifax, NS, B3H 1Y6
Ontario – Registrar, Royal College of Dental Surgeons of Ontario, 6 Crescent Road, 5th Floor, Toronto, ON, M4W 1T1
Prince Edward Island – Registrar, Dental Association of Prince Edward Island, 184 Belvedere Avenue, Charlottetown, PE, C1A 2Z1
Quebec – Executive Director and Secretary, Ordre des Dentistes du Québec, 625 René-Lévesque Boulevard West, Fifteenth Floor, Montréal, QC, H3B 1R2
Saskatchewan – Registrar, College of Dental Surgeons of Saskatchewan, 202-728 Spadina Crescent East, Saskatoon, SK, S7K 4H7

NATIONAL DENTAL EXAMINING BOARD OF CANADA
The National Dental Examining Board of Canada issues, after an examination, a certificate to successful candidates which may be obtained from the Secretary of the licensing board of the specific province in Canada.

Students intending to practise in the United States are advised to contact the Secretary, Council of the National Board of Dental Examiners, American Dental Association, 211 East Chicago Avenue, Chicago, Illinois 60611. Information should also be obtained from the Secretary of the licensing board of the specific state in which the student intends to practise.

3.6 Registration
Registration for the 1999-2000 session will be by MARS (McGill’s Automated Registration System). Information including dates and forms for payment of fees will be forwarded in the summer.

3.7 Vaccination
For information on the requirements, see page 5.

3.8 Medals and Prizes
FOURTH YEAR:
DR. A.W. THORNTON GOLD MEDAL, donated by the Montreal Dental Club, awarded to the student in the final year attaining the highest overall standing in the four years of the dental undergraduate program.
DR. JAMES MCCUTCHEON MEDAL awarded to the member of the graduating class who has demonstrated outstanding qualities of leadership, scholarship and professional achievement throughout the four years of the program in Dentistry.
DR. J.K. CARVER AWARD, donated by l’Ordre des Dentistes du Québec, awarded to the student in the final year attaining the second highest overall standing in the four years of the dental undergraduate program.
C.D.A. PRESIDENT’S AWARD, donated by the Canadian Dental Association, awarded to the graduating student who, over the undergraduate years, has shown outstanding qualities of leadership, scholarship, character, and humanity and who may be expected to have a distinguished career in the dental profession and society at large. The student must be a member of the Canadian Dental Association.
LEANORE K. FEINE PRIZE awarded to the student in the final year who has best demonstrated commitment to the oral health of the local community throughout the clinical undergraduate program.
DR. W.G. LEAHY PRIZE awarded to the student in the final year for meritorious achievement in Clinical Dentistry throughout the clinical undergraduate program.
DR. PAUL A. MARCHAND AND MAURINE McNEIL MARCHAND PRIZE, awarded to the student in the final year who has demonstrated the highest degree of professionalism and patient management.
McGILL ALUMNAE SOCIETY PRIZE presented annually upon graduation to a distinguished student for excellence and high academic standing. Preference given to women students.
QUEBEC DENTAL SURGEONS ASSOCIATION PRIZE awarded to a student in the graduating year who has best served the interests of his/her colleagues throughout the university years.
DR. A. GERALD RACEY PRIZE, awarded to the student in the final year who has excelled in the comprehensive oral examination in Oral and Maxillofacial Surgery.
DR. A.L. WALSHE PRIZE awarded to the student in the final year for meritorious achievement in Oral Medicine throughout the clinical undergraduate program.

THIRD YEAR:
DR. L.A. COHN PRIZE awarded to the student attaining the highest standing in Prosthetic Dentistry in the third year of the dental undergraduate program.
Pierre Fauchard Academy Prize, awarded to the junior Canadian Dental Association Student Governor for demonstrating leadership in the profession.
DR. LYMAN E. FRANCIS PRIZE awarded to the student in the third year of the program who has obtained the highest standing in the subjects of General Pharmacology and Therapeutics, Dental Pharmacology and Therapeutics and Oral Diagnosis over the Second and Third years of the dental undergraduate program.
DR. GERALD FRANKLIN PRIZE awarded to the student attaining the highest standing in the examinations in the third year of the dental undergraduate program.
INTERNATIONAL COLLEGE OF DENTISTS PRIZE (CANADIAN SECTION) awarded to the student attaining the second highest standing in the third year of the dental undergraduate program.

SECOND YEAR:
DR. W.C. BUSHELL PRIZE awarded to the student attaining the highest overall standing in the Diseases/Dysfuntion of the Orofacial Complex course in the second year of the dental curriculum.
Dr. M. Donigan Prize, awarded to the student attaining the highest overall standing in the Introduction to the Patient and Introduction to the Practice of Medicine unit in the Basis of Medicine component of the curriculum.

Leanore K. Feine Prize awarded to the student in the Preclinical Teaching – Dentistry component of the undergraduate program who has best demonstrated commitment to the oral health of the local community.

Dr. I.K. Lowry Prize awarded to the student attaining the highest overall standing in the Management of Diseases/Dysfunction of the Oro-facial Complex course in the second year of the dental curriculum.

Dr. K.I. Melville Prize awarded to the student attaining the second highest overall standing in The Healthy Patient course in the second year of the dental curriculum.

Dr. D.P. Mowry Prize awarded to the student attaining the highest overall standing in Unit II of the dental curriculum.

First Year:

James G. Bliss Annual Book Award – $100 awarded to the student who obtains the highest standing in the Gas, Fluids and Electrolytes unit.

Joseph Morley Drake Prize – founded by the late Joseph Morley Drake, M.D., a prize of $300 is awarded to the student with the highest standing in the Pathobiology, Prevention and Treatment of Disease unit.

Shirley Nancy Endman Prize – established in 1982 by Louis Endman in memory of his wife. A prize of $70 is awarded to the student who obtains the second highest standing in the Gas, Fluids and Electrolytes unit.

Charles E. Frost Medical Prize and Bronze Medal – a bronze medal and prize of $1,000 are awarded annually to a student, in the Basis of Medicine, who has achieved excellence in the Unit on Pathobiology, Treatment and Prevention of Disease and has demonstrated, on the basis of interviews, the most promise in the field of Pharmacology.

Robert B. Greenblatt Prize – endowed in 1987 by Dr. Robert B. Greenblatt, an eminent endocrinologist and professor emeritus at the Medical College of Georgia, who graduated from McGill with a B.A. in 1928 and an M.D., C.M. in 1932. Awarded by the Faculty Scholarships Committee to the student who obtains the highest standing in the Life Cycle unit.

Joseph Hills Prize – founded by the late Dr. Joseph Hills, of Woonsocket, R.I., a prize of $175 is awarded to the student obtaining the highest standing in the Musculoskeletal and Blood unit.

F. Slater Jackson Prize – founded by Mr. and Mrs. H.F. Jackson in memory of their son, the late F. Slater Jackson, M.D., a prize of $175 is awarded to the student with the highest standing in the Molecules, Cells and Tissues unit.

Francis McNaughton Prize – established in 1980, a prize of $200 and a book are awarded to the student with the highest standing in the Nervous System and Special Senses unit.

Mark Nickerson Prize – Value: $250. Established in 1990 by the Department of Pharmacology and Therapeutics in honour of Professor Mark Nickerson, a renowned McGill pharmacologist. Awarded to the student in the Basis of Medicine, who has achieved excellence in the unit on Pharmacology, Treatment and Prevention of Disease and has demonstrated, on the basis of interviews, an understanding of the role of pharmacology and therapeutics in contemporary society. Recipients will also receive a scroll.

Samuel Rosenfeld Prize – a prize of $125 is awarded to the student with the highest standing in Host Defence and Host/Parasite Relationships unit.

Dr. Arthur S. Solomon Prize awarded to the student attaining the second highest standing in the Basis of Medicine component of the curriculum.

Mary and Louis Streicher Prize – established in 1980, a prize of $150 is awarded to the student with the highest standing in the Endocrinology, Metabolism and Nutrition unit.

Sutherland Prize – founded in 1878 by the late Mrs. Sutherland in memory of her husband, William Sutherland, M.D., formerly Professor of Chemistry in the Faculty. A Prize of $250 is awarded to the student who obtains the highest standing in the Basis of Medicine component of the medical undergraduate curriculum. The Faculty of Dentistry is well aware of the many awards and prizes that are offered to students through various academies, associations and commercial dental manufacturers. However, due to Faculty policy which was initiated by the Dental Students’ Society, students are eligible only for prizes and awards that are endorsed by Faculty and listed in the Faculty of Dentistry Calendar.

3.9 Scholarships, Bursaries and Loans

Ping Kwan Lau Scholarship

Established in 1998 by Arthur Lau (B. Arch. 1962) and family in memory of his father, Ping Kwan Lau, for students entering the four-year D.D.S. program. This Scholarship will be awarded on the basis of high academic achievement, by the Faculty of Dentistry with preference to international students and will be renewable provided the holder maintains an academic standing established by the Faculty.

Each year a limited number of Entrance Scholarships are awarded to students of high academic standing. Applicants must be entering a university for the first time to undertake a full-time undergraduate degree program.

Full information concerning undergraduate scholarships and bursaries are given in the Undergraduate Scholarships and Awards Calendar, which may be obtained from the Admissions, Recruitment and Registrar’s Office or by accessing the Office website (http://www.aro.mcgill.ca).

The University has a fund from which loans may be made to students of good academic standing.

L’Ordre des Dentistes du Québec has created a loan fund to assist students of the Faculty who are registered with the Order. The W.K. Kellogg Foundation Loan Fund, the Dental Students’ Society Dean D.P. Mowry Memorial Fund, and the Dr. Stan Small bursary are available to assist any student registered in the Faculty.

Applications for financial assistance should be made to the Student Aid Office at 3637 Peel Street.

4 Program for the Degree of D.D.S.

4.1 Curriculum

Candidates for the degree of Doctor of Dental Surgery must have completed the requirements for entrance as noted in section 3.1 on page 22, before entering either the five-year or four-year program.

The following courses are given by the Faculty of Science:

Molecular Biology .................................................. 177-200A
Cell Biology and Metabolism .................................. 177-201B

The following courses are given conjointly by the Faculty of Medicine and the Faculty of Dentistry (see Medicine section):

First Year – Basis of Medicine

Molecules/Cells/Tissues ............................................. 524-101A
Musculoskeletal/Blood .......................................... 524-102A
Gas, Fluid and Electrolytes ..................................... 524-103A
Endocrinology/Metabolism/Nutrition ....................... 524-104B
Life Cycle ............................................................ 524-105A
Nervous System & Special Senses ............................ 524-106C
Introduction to the Patient/Introduction to the Practice of Medicine .......................... 524-109H
Second Year
Host Defence & Host/Parasite Relationships.................. 524-207G
Pathobiology Treatment & Prevention of Disease.......... 524-208A
Introduction to the Patient/Introduction to the Practice of Medicine ............. 524-203A

The following courses are given by the Faculty of Dentistry:

Second Year – Preclinical Teaching
The Healthy Patient........................................... 590-202B
Diseases/Dysfunction of the Oro-facial Complex ......... 590-203B
Management of Diseases/Disfunction of the Oro-facial Complex................. 590-204E
Dental Public Health........................................... 590-205E

Third Year
Anaesthesiology.................................................. 590-324A
Community Clinics............................................. 590-313B
Dental Pharmacology & Therapeutics....................... 590-319D
Dental Public Health.......................................... 590-319H
Endodontics...................................................... 590-311H
Image Interpretation.......................................... 590-322A
Implant Dentistry............................................... 590-339E
Multidisciplinary Clinic...................................... 590-310H
Operative Dentistry........................................... 590-336D
Oral & Maxillofacial Pathology & Oral Medicine........ 590-317D
Oral & Maxillofacial Surgery................................ 590-323H
Orthodontics..................................................... 590-315H
Pediatric Dentistry........................................... 590-316D
Periodontology................................................ 590-318H
Prosthodontics (Fixed)........................................ 590-321D
Prosthodontics (Removable)................................ 590-320D
Rotations......................................................... 590-330D
Summer Clinic/Externship................................... 590-314C
Treatment Planning............................................ 590-337B

Fourth Year
Advanced Restorative Dentistry............................. 590-409D
Dental Public Health.......................................... 590-405D
Endodontics..................................................... 590-411D
Multidisciplinary Clinic Practice............................ 590-410D
Oral & Maxillofacial Surgery................................ 590-423D
Orthodontics..................................................... 590-415D
Pediatric Dentistry........................................... 590-416D
Periodontology................................................. 590-418D
Rotations......................................................... 590-430D
Treatment Planning............................................ 590-437D

* It should be understood that this curriculum is subject to change without notice.

4.2 Regulations Governing Grading and Advancement

Four-Year Program
In the first 18 months of the program, students will abide by the rules and regulations as outlined in the Faculty of Medicine’s “Student Information Manual” which will be distributed to them at registration.

The following rules and regulations apply to the Preclinical and Clinical Teaching years.

Final grades are based on oral, written and practical/clinical assessments which are held throughout the academic year to measure the progress of students. In most courses, a final examination is held at the end of the course during a scheduled examination period.

In order to qualify for advancement, a student must attain a grade of C+ or higher in each course and a grade point average (GPA) of 2.9 or higher. Students are required to pass both the theoretical and practical/clinical components in each dental course/section. A student who fails one or more divisional sections of any course in the Preclinical Teaching component of the program will be asked by the Division Director to take a remedial program in that discipline. The final mark already obtained in that course would not be confirmed pending the successful completion of the remedial program.

Examinations which are deferred due to documented medical problems will be taken at the earliest possible time after the student's return to health and at the convenience of the course director. Since August is the time set aside for supplemental examinations, students writing deferred examinations at this time forfeit the right to write a supplemental examination.

Students who pass all courses but do not obtain a GPA of at least 2.9 will be permitted to take supplemental examinations in two courses chosen in consultation with the Dean in an attempt to raise their average. If the students do not raise their GPA to at least 2.9, they will be permitted to repeat the year.

Students who, by the end of the regular academic year, have failed in not more than two courses will be permitted to write supplemental examinations in the course(s) failed. If the students are unsuccessful in a supplemental examination, or their GPA for all courses remains below 2.9, they will be permitted to repeat the year. Students who fail in a course comprising laboratory or clinical components may be required to fulfill prescribed additional laboratory or clinical work before presenting themselves for supplemental examinations. A fee may be attached to these requirements. These requirements will not be considered as a substitute for the supplemental examination itself.

Supplemental examinations will be held during the month of August. Applications for supplemental examinations must be made to the Administrative Assistant (Student Affairs) at least 10 days before the date set for supplemental examinations and must be accompanied by a fee of $35 for each examination. This fee must be paid before a student is permitted to write the supplemental examination. Students who were unsuccessful in a course comprising a theoretical and practical/clinical component will have the option of attempting supplemental examinations in both components. Students will not be permitted to choose a third course in order to raise their GPA to 2.9 or higher.

A student who is repeating a year must attain, during the regular academic year, passing final grades of C+ or higher in each course/section and a GPA of 2.9 or higher. If this standard is not achieved, the student will be required to withdraw from the Faculty without recourse to further supplemental examinations. A student who has repeated one year in the Faculty is ineligible to repeat another year.

A student who has failed in three or more courses by the end of the regular academic year will be required to withdraw from the Faculty.

Notwithstanding any of the above, the Faculty reserves the right to require the withdrawal of a student at any time if the student has displayed unprofessional conduct or demonstrates incompetence.

Though not exhaustive, such matters as failure to show respect for patients, failure to maintain good personal hygiene, failure to assume responsibility for actions taken, failure to adhere to the Codes of Ethics of the Canadian Dental Association or of l’Ordre des Dentistes du Québec as they apply to students, patient abuse, or rendering any act on a patient which is considered harmful and which jeopardizes the patient’s welfare may be taken into consideration. The procedure to be followed in such instances is found in the bylaws of the hospitals through which students rotate.

The Faculty’s evaluation system is under constant review. Any changes made will affect the incoming class.

REREAD POLICY
Consultation
In accordance with the Charter of Student Rights, and subject to the conditions stated therein, “every student has the right to consult any written submission for which he or she has received a mark and a right to discuss this submission with the examiner”. Students have seven calendar days after receiving their mark to ask for a consultation. Requests for consultations should be addressed directly to the examiner. The examiner has the option of meeting with the student to answer any questions that the student may have about the grading of the paper, or may supply the
student with the correct answers to the examination questions in writing. The student may review these in the presence of the Faculty member or designate, but may not take any document away.

Verification
In a case where a student feels that an error has been made in arriving at the final grade, the student can request that the examiner verify that all questions have been marked and that the final grade has been computed correctly.

Reread
In accordance with the Charter of Student Rights, students have the right, subject to reasonable administrative arrangements, "to an impartial and competent review of any mark". The request for a reread must be received within seven calendar days after the consultation. A $35 fee for reread will be charged to the student’s McGill account. This will be reimbursed if there is a change upwards in the letter grade for the course.

The request for a formal reread must be made by the student, in writing, to the Faculty of Dentistry, Office of the Administrative Assistant (Student Affairs), and include reasons to justify the request. It must include a statement that the student has already met with the examiner to review the mark or indicating why this has not been possible. In the case of requests for rereads of group work, all members of the group must sign the request, indicating that they agree to the reread. Rereads for computer-scored examinations are not possible, but students may ask for a verification.

There are no re-evaluations of oral examinations and laboratory examinations.

A list of possible rereaders will be obtained by the Office of the Administrative Assistant (Student Affairs) by contacting the Director of the Division involved in the reread. The Associate Dean (Academic Affairs) selects the second reader. The Office of the Administrative Assistant (Student Affairs) conducts all communications with the second reader. The second reader is provided the original documents, with marginalia, summary comments, and mark intact, as well as pertinent notes from the first examiner describing issues such as the general nature of the course or the assignment and grading schemes. The student’s and the instructor’s name are blanked out to reduce the possibility of prejudice, and to help meet the requirements of the Charter of Student Rights. The rereader’s name will not be made known to the student or examiner at any time. The second reader will provide an assessment of the work, in writing, to the Faculty of Dentistry. This assessment will also be transmitted to the first examiner.

As a result of the reread process, the grade may become higher, lower or remain unchanged. The grade submitted by the second reader replaces the original grade and cannot be challenged. The new grade will be communicated to the student in a letter from the Office of the Administrative Assistant (Student Affairs) with a copy to the first examiner.

4.3 Five-Year Program
A student accepted to the five-year program will be required to register for a full year in the Faculty of Science. In that year, the student must take courses totalling 30 credits. Following the successful completion of this year, determined by the Student Promotions Committee, students proceed into the first year of the four-year program.

Required Courses (6 credits)
177-200A (3) Molecular Biology
177-201B (3) Cell Biology and Metabolism

Elective Courses (24 credits) preferably in Humanities.
A student who has not taken Chemistry 302 in CEGEP will also be required to take an equivalent Organic Chemistry course.

4.4 Grade Point Average (GPA)
The Faculty of Dentistry has adopted a grade point average system similar to the one used by the undergraduate faculties. Official transcripts will show the numerical grade, the letter grade and the class average for each course offered by the Faculty of Dentistry.

Listed below are the percentages, letter grades and their grade point equivalents:

<table>
<thead>
<tr>
<th>PERCENTAGES</th>
<th>LETTER GRADES</th>
<th>GRADE POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>85 – 100</td>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>80 – 84</td>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>75 – 79</td>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>70 – 74</td>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>65 – 69</td>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>60 – 64</td>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>0 – 59</td>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>

Class standing will be determined on the GPA computed by using the following formula:

GPA = \text{Sum of (Grade Points x Weight of Course) for each result} / \text{Sum of Weights of all courses included in the calculation}

4.5 Petitions
A petition is a request that a regulation be waived on compassionate grounds or because of extenuating circumstances.

Petitions must be directed to the Associate Dean (Academic Affairs), in writing, at least two weeks prior to a future event (e.g. permission not to sit for a scheduled examination). If the event has already occurred, the student will have one week (five working days) to submit the petition. Students must submit together with their petition all information that can strengthen the request.

A decision on the student's petition will be made in consultation between the Associate Dean (Academic Affairs) and the Course Director. If the Associate Dean (Academic Affairs) and the Course Director do not agree, the matter will be referred to the Executive Committee. The Associate Dean (Academic Affairs) will communicate the decision rendered, and the reasons for this decision.

4.6 Appeals
An appeal is a request that a grade or a final standing in a course or program be changed on grounds related to the accuracy or fairness of a mark assigned.

Students must submit their appeal, in writing, to the Associate Dean (Academic Affairs) within five working days of having been notified of the matter which is being appealed.

The Associate Dean (Academic Affairs) will then convene a meeting of the Appeals Committee. The Committee shall have the power to examine all documentation and to listen to all evidence. The Committee shall decide to either maintain, lower, or raise a specific mark and/or to uphold or reverse the decision of the Student Promotions Committee.

The decision is transmitted to the Dean and the student is informed of the decision and change in status, if any, by the Dean or designate. Decisions made by the Appeals Committee can be appealed by the student or Faculty to the University Senate.

4.7 University Regulations Concerning Final Examinations
Listed below are University Regulations which were approved by Senate on September 30th, 1987 and which have been modified for the Faculty of Dentistry.

1. These Regulations shall apply to courses that are evaluated by means of a paper or project.

2. Written examinations (including take-home examinations) shall not be held during the last two weeks of scheduled classes prior to a scheduled examination period, except where a pattern

Class standing will be determined on the GPA computed by using the following formula:

GPA = \text{Sum of (Grade Points x Weight of Course) for each result} / \text{Sum of Weights of all courses included in the calculation}
of continuous evaluation has been established, in which case the total value of examinations given in this period shall comprise no more than 10% of the final mark. The dates of the scheduled examination periods in the Faculty of Dentistry are listed in the timetables which are given to the students at Faculty Registration.

3. If the written examinations in a course constitute 50% or more of the final mark, one of these shall be given as a final written examination; and it shall take place during the examination period after the last day of scheduled lectures.

4. A final examination given during the scheduled examination period shall be worth at least 25% of the final mark.

5. Students shall be informed of all course requirements at the beginning of the course. All term work shall be assigned early enough in the term for students to complete the assignment(s) by the last day of class.

6. The due date for term work in courses to which these Regulations apply shall be no later than the last day of classes.

7. In full year courses, instructors who wish to give a mid-year examination must schedule it in the formal examination period.

8. The principles enunciated in these Regulations shall be applied, appropriately modified, to courses given in other faculties that do not follow the normal University timetable.

9. Individual faculties may propose variations in these Regulations to the Academic Policy and Planning Committee in order to meet their special needs.

10. These Regulations, and any variations to them, shall be made known to students by each faculty.

4.12 Dental Residencies

Residency Programs

a) Multidisciplinary Residency Program

A multidisciplinary residency program is offered at four of the McGill teaching hospitals: the Montreal General Hospital, the Royal Victoria Hospital, the Sir Mortimer B. Davis-Jewish General Hospital and the Montreal Children's Hospital. Positions are available each year starting July 1.

Applicants for these positions must submit their applications to the Faculty by November 1 of the previous year. Further details may be obtained by writing to the Residency Program at the Faculty of Dentistry, McGill University.

Applicants must hold a licence to practise dentistry in Quebec or be graduates from an accredited Canadian or American Dental School.

b) Residency Program in Oral and Maxillofacial Surgery leading to M.Sc. degree

One candidate is selected each year for this four-year program beginning July 1. For further information apply to the Division of Oral and Maxillofacial Surgery, Department of Dentistry, Montreal General Hospital, 1650 Cedar Avenue, Montreal, Quebec, H3G 1A4.

Detailed information concerning this Residency Program may be found in section 6.2 on page 30.

4.13 Dental Officer Training Plan

The Dental Officer Training Plan is a subsidization plan offered to eligible dental undergraduates by the Canadian Forces in return for a short period of service following graduation.

Under the plan, candidates are provided with a second lieutenant's rank and salary, and payment for tuition, instruments, supplies, and books. During the summer months, candidates undergo officer training.

To be eligible a student must be able to meet the Canadian Forces standards for enrolment and be academically acceptable, without condition, to any one of the four professional years of the dental faculty.

Full details of the Dental Officer Training Plan may be obtained from the Commanding Officer, Canadian Forces Recruiting Centre, 1420 St. Catherine Street West, Montreal, Quebec, H3G 1R3. Tel. (514) 390-4999.

5 Courses of Instruction

5.1 Basis of Medicine

Courses Given Conjointly by the Faculties of Medicine and Dentistry

UNIT 1 – Molecules/Cells/Tissues

This unit will examine the biosynthesis and assembly of macromolecules with emphasis on cell and tissue organization and function. The structure and organization of the skin, nerves and the embryo will be surveyed in detail and used as model systems to study the major biochemical, physiological, genetic and molecular principles of cells.

UNIT 2 – Gas, Fluid & Electrolytes

This unit will discuss the embryological development, gross anatomy, histology and physiology of the cardiovascular, respiratory and renal systems. The biochemistry of lipids and proteins and the anatomy and physiology of the autonomic nervous system will also be covered.

UNIT 3 – Life Cycle

This unit is designed as an introduction to the basic science that will enable the student to understand human reproduction. The embryology, histology, and anatomy of the reproductive tract will
be covered. Human development from genetics, to embryo, to parturition, will be explored and how this knowledge can be applied to clinical medicine in resolving problems of infertility, fetal and maternal morbidity, and menopause.

UNIT 4 – Endocrinology/Metabolism/Nutrition
This unit provides an overview of the gross and microscopic structure of the gastrointestinal tract and its accessory organs, along with a grounding in the principles of nutrition and digestion. Emphasis is also placed on those aspects of system and molecular endocrinology which regulate and integrate various metabolic activities.

UNIT 5 – Musculoskeletal/Blood
The objectives of this unit are to study the structure and function of the components of the musculoskeletal and blood systems. The interaction of the structure and function will be examined. The embryology, macroscopic and microscopic anatomy as well as molecular structure and function relating to the musculoskeletal and blood systems will be discussed. Lectures, laboratory sessions, small group seminars as well as audio-visual presentations, multi-discipline clinically applied sessions, computer assisted instruction and independent self-directed learning will be utilized to achieve these goals.

UNIT 6 – Nervous System & Special Senses
The content of this unit includes the anatomy of the head and neck and anatomical, physiological, biochemical and behavioural aspects of the organization of the nervous system and special senses. The material is presented in an integrated series of lectures and laboratory classes combined with small group clinical problem sessions designed to illustrate the clinical relevance of the material.

UNIT 7 – Host Defence & Host/Parasite Relationships
Infectious diseases arise from dynamic interactions between humans and microorganisms. Using lectures, case-oriented small groups, laboratory sessions, and independent learning, an integrated overview of the basic microbiology of organisms, our immune defenses and how they may be subverted, and approaches to the prevention and control of infection will be provided.

UNIT 8 – Pathobiology Treatment & Prevention of Disease
This unit covers the scientific basis of the diagnosis, prevention and drug therapy of selected diseases. The organ/system approach examining pathogenesis, pathology and pathophysiology, and pharmacological principles of treatment of diseases in the individual is integrated with the epidemiology and genetics in the population.

UNIT 9 – Introduction to the Patient/Introduction to the Practice of Medicine
This course addresses the psychological social dimensions of human nature in health and illness. Lectures are supplemented by small group experience to introduce students to the practice of dentistry via exposure to health care teams clinical settings and provides a forum to discuss psychosocial and ethical aspects of practice. The second component is an introduction to clinical data gathering – particularly interviewing and history taking. Lecture format followed by small group practice with tutors will be used to study doctor-patient relationships. This course follows the introduction to the Patient course.

Courses given by the Faculty of Dentistry

5.2 Preclinical Teaching

590-202B THE HEALTHY PATIENT. (6 credits) This course deals with the anatomy, growth and development of the oro-facial region including the teeth. The composition and function of saliva, the normal oral microflora and some physiology in relation to the oro-facial complex are also covered. Dr. Shields and staff

590-203B DISEASES/DYSFUNCTION OF THE ORO-FACIAL COMPLEX. (3 credits) This course discusses all aspects of the most common diseases of the oro-facial complex: caries, periodontal, pulpal and periapical diseases from their etiology to their detection. Craniofacial dysmorphology and growth and development problems will also be discussed. Dr. Klemetti and staff

590-204E MANAGEMENT OF DISEASES/DYSFUNCTION OF THE ORO-FACIAL COMPLEX. (25 credits) This course addresses the management of the conditions discussed in 590-203B as well as principles of oral medicine and radiology. It contains a heavy laboratory component in which the students will acquire the technical skills required for treating patients. Dr. Lamontagne and staff

590-205E DENTAL PUBLIC HEALTH. (4 credits) This course is designed to provide students with a broad understanding of the theory and principles of public health, behavioural sciences, communication skills, ethical and legal issues relevant to clinical practice. A basic understanding of the theory and practice of health promotion and the opportunities to promote oral health and prevent disease at an individual and population level will be discussed. This includes epidemiology, a knowledge of the structure and organization of the health system (in particular the key features, characteristics and issues affecting the dental care system in Canada), the theory of statistics and skills needed to apply basic statistical methods to oral health data in order to critically interpret the statistical contents of research findings, human nutrition and its implications in the prevention of dental caries. Dr. Allison and staff

5.3 Clinical Teaching

Advanced Restorative Dentistry

FOURTH YEAR (590-409D) (2 credits) This course will focus on didactic and theoretical aspects of the clinical management of more complex restorative challenges that the senior students might expect to encounter in their final year clinical program or in private practice following graduation. Dr. Blomfield and staff

Anaesthesiology

THIRD YEAR (590-324A) (1 credit) General principles and the physiology of general anaesthesia and sedative agents with emphasis on factors of safety and the suitability of the agent used are discussed. Cooperation with the anaesthetist under hospital or office conditions and emergency resuscitative measures are stressed. Dr. Hickey and staff

Community Clinics

THIRD YEAR (590-313B) (1 credit)

FOURTH YEAR (590-413D) (2 credits) Introduction to a variety of mobile dental delivery systems and instruction as to the merits of each system. This course will allow students to demonstrate their knowledge in oral medicine, prevention, operative dentistry, and treatment planning. Dr. Wiseman and staff

Dental Pharmacology & Therapeutics

THIRD YEAR (590-319D) (2 credits) A study of those drugs that have special application to dental practice is presented by means of lectures and small group seminars. Lectures and seminars reviewing various pathological conditions and possible therapy are presented. Dr. H.S. Katz and staff

Dental Public Health

THIRD YEAR (590-305H) (1 credit)

FOURTH YEAR (590-405H) (3 credits) A short history of dentistry, the role of, and career possibilities for, dentists, geriatric dentistry, clinical nutrition, practice management, ethics and jurisprudence, with practical experience in the use of evidence-based and preventive health care techniques. Dr. Allison and staff
Endodontics

THIRD YEAR (590-311H) (3 credits) Microbiology and immunology, pathology, histology, oral surgery, and dental anatomy as they apply to endodontics.

FOURTH YEAR (590-411D) (2 credits) Seminars given throughout the Fourth Year.

Dr. Borsuk and staff

Image Interpretation

THIRD YEAR (590-322A) (1 credit)
Image interpretations of various conditions affecting the head and neck region.

Dr. Dagenais and staff

Implant Dentistry

THIRD YEAR (590-339E) (2 credits) This series of lectures will cover topics related to: patient selection, surgical and prosthetic techniques, implant maintenance, biomaterials and biomechanics, and current implant research. Students will have the opportunity to observe the surgical aspects of implant dentistry during their Oral Surgery rotation. A hands-on course allows the student to identify and assemble implant components in a laboratory environment.

Dr. Head and staff

Multidisciplinary Clinic

THIRD YEAR (590-310H) (9 credits)
Multidisciplinary approach to comprehensive patient care concerning diagnosis and treatment planning for patients at the McCall Dental Clinic.

Dr. Myers and staff

Oral & Maxillofacial Pathology & Oral Medicine

THIRD YEAR (590-317D) (3 credits) The nature, identification, and management of diseases affecting the oral and maxillofacial regions.

Dr. Chauvin and staff

Ooral & Maxillofacial Surgery

THIRD YEAR (590-323H) (3 credits)

FOURTH YEAR (590-423D) (3 credits)
This course, offered over two years, is designed to help students develop a foundation of professional knowledge coupled with surgical skills to enable them to diagnose and manage competently the oral surgical problems related to the practice of general dentistry. The student is also expected to acquire an academic appreciation of the advanced field of oral surgery, which involves the diagnosis, treatment, prescribing for and operating upon any disease, injury, malformation or deficiency of the human jaws or associated structures.

Dr. Head and staff

Orthodontics

THIRD YEAR (590-315H) (2 credits)
FOURTH YEAR (590-415D) (3 credits)
Basic principles of growth and development, diagnosis and treatment planning, biomechanics and basic orthodontic techniques with clinical experience in preventive, interceptive and limited corrective treatments.

TBA and staff

Pediatric Dentistry

THIRD YEAR (590-316D) (3 credits) This course comprises lectures, seminars, and preclinical laboratory techniques directed at the dentition of the young patient. Included are the restoration of the deciduous dentition and the particular problems of the young patient.

FOURTH YEAR (590-416D) (4 credits) This course comprises lectures, seminars reviewing pertinent literature, and clinical treatment of children at the McCall Dental Clinic. The aim of this course is to teach students comprehensive dental care for children.

Dr. Schwartz and staff

Periodontology

THIRD YEAR (590-318H) (3 credits)
FOURTH YEAR (590-418D) (1 credit)
Emphasis is on practical treatment including occlusal, sanative, curative and preventative modalities.

Dr. Touyz and staff

Prosthodontics

Operative Dentistry

THIRD YEAR (590-336D) (2 credits) Clinical instruction in: diagnosis and treatment planning; prevention and preventive treatment strategies; the "biomechanical" treatment for diseased and/or traumatized tooth structure; the anatomical restoration of individual teeth in the adult dentition to physiologic form and function with the restorative materials generally used by the dental practitioner.

Dr. Blomfield and staff

Fixed Prosthodontics

THIRD YEAR (590-321D) (2 credits) Fixed prosthodontic procedures are performed within the overall treatment of clinical patients. Lectures, seminars, and references from the periodic literature complement clinical experience to increase the knowledge and understanding of fixed prosthodontics.

Dr. Lamontagne and staff

Removable Prosthodontics

THIRD YEAR (590-320D) (3 credits) Introduction to the theoretical aspects of removable prosthodontics which involve the examination, diagnosis, treatment planning, and fabrication of the prostheses which replace missing oral structures and contribute to the maintenance of the existing hard and soft tissues.

Dr. Kiemetti and staff

Rotations

THIRD YEAR (590-330D) (2 credits) Internship in Oral Diagnosis and Exodontia Clinic.

FOURTH YEAR (590-430D) (3 credits) Internship in the Emergency and Exodontia Clinics of the Montreal General Hospital. A one-week rotation to the Sir Mortimer B. Davis-Jewish General Hospital introduces the student to comprehensive dental treatment as currently provided in a hospital dental department and a one-week rotation to the Montreal Children’s Hospital where the student is exposed to emergency work, early childhood caries, children with syndromes and systemic problems, and to the operating room to participate in pediatric oral rehabilitation.

Students are also required to present at least one table clinic on an approved topic while enrolled in the undergraduate program prior to the start of their fourth year.

Dr. Katz and staff

Summer Clinic/Externship

THIRD YEAR (590-314C) (3 credits) Summer Clinic concentrates in the treatment and management of patients, including patients with handicaps. Externships and research projects for an equal duration are acceptable alternatives with prior approval from the course director.

Dr. Katz and staff

Treatment Planning

THIRD YEAR (590-337B) (1 credit)
FOURTH YEAR (590-437D) (2 credits)
Development of a treatment plan for patients requiring complete mouth restoration involving multidisciplinary restorative procedures.

TBA
6 Courses Offered in the Faculty of Graduate Studies and Research

6.1 Master of Science in Dental Sciences – Oral Biology

The goal of this program is to train students in research in the dental sciences which comprise a number of disciplines relating to the oro-facial complex.

Students who have successfully completed the D.D.S./D.M.D. degree or a B.Sc. degree with a GPA of 3.0 in any of the disciplines in the Health Sciences (Anatomy, Biochemistry, Microbiology and Immunology, Physiology) or related disciplines (Biology, Chemistry, Physics, Psychology) are eligible to apply for admission to a graduate program in the Faculty of Dentistry leading to the M.Sc. degree in Dental Sciences. In addition to submitting GRE scores, TOEFL tests must be passed in the case of non-Canadians whose mother tongue is not English.

All applicants must include an up-to-date official transcript of academic performance, two letters of recommendation and a brief résumé indicating their particular field of interest for the M.Sc. degree. B.Sc. students who have not obtained eligible qualifications will be required to make up for deficiencies in their academic profile by taking a qualifying year.

Students must be accepted by a research director who is a member of the Faculty of Dentistry before the Faculty approves the application, prior to registration for the M.Sc. degree.

Deadline for receipt of the completed application is February 1 for admission in the Summer, March 1 for Fall, and November 15 for Winter registration.

The number of candidates accepted each year will depend on the courses and research facilities available which are applicable to the candidate’s area of expertise.

The M.Sc. degree should normally be completed within 2 years of full-time study.

Applications may be obtained by writing to the Office of the Associate Dean (Research), Faculty of Dentistry, McGill University, 3640 University Street, Room M/18, Montreal, Quebec, H3A 2B2.

6.2 Master of Science in Oral and Maxillofacial Surgery

All students who are registered in Graduate Clinical Programs in the Faculty of Dentistry, McGill University, and who are not already registered with l’Ordre, must register with l’Ordre des Dentistes du Québec. Further information may be obtained from the Registrar of l’Ordre des Dentistes du Québec, 625 René-Lévesque Boulevard West, Fifteenth Floor, Montreal, Québec H3B 1R2.

A residency training program in Oral and Maxillofacial Surgery provides a candidate with a comprehensive background for the practice of Oral and Maxillofacial Surgery as a specialty.

During the four years of the program, the candidate serves as a resident principally at the Montreal General Hospital. During this time, the resident is given increasing responsibility for the care of in-patients and out-patients, as well as being required to fulfill certain basic science courses and other assignments. Candidates for this program must possess a D.D.S. or D.M.D. degree or its equivalent, and be acceptable to l’Ordre des Dentistes du Québec as a training candidate in a hospital. A research project must be undertaken, followed by a Master’s thesis.

**Duration:** Four calendar years commencing July 1. Applications must be submitted by September 15.

Further information may be obtained by writing to Graduate Program in Oral and Maxillofacial Surgery, Department of Dentistry, Montreal General Hospital, 1650 Cedar Avenue, Montreal, Québec, H3G 1A4.

The program is open to one candidate per year.

The following courses are included in the program:

- 590-611C,D,H,J,K (9) Oral and Maxillofacial Surgery I Seminars
- 590-612C,D,H,K (24) Oral and Maxillofacial Surgery I Clinical
- 590-613C,D,K (3) Anatomy/Surgical Anatomy
- 590-621C,D,G,H (12) Anaesthesia
- 590-622A,C,D (6) General Surgery
- 590-623A,B,C,D (4) Surgical Intensive Care Unit
- 590-624A,B,C,D (4) Emergency
- 590-625A,C,D,E (6) Internal Medicine
- 590-626A,B,C,D (4) Pathology
- 590-631C,D,H,J,K (9) Oral and Maxillofacial Surgery II Seminars
- 590-632C,D,G,H,K (3) Oral and Maxillofacial Surgery II Clinical
- 590-633A,B,C,D,E (24) Research (including thesis)
- 590-641A,C,D,H,K (9) Oral and Maxillofacial Surgery III Seminars
- 590-642A,C,D,K (18) Oral and Maxillofacial Surgery III Clinical
- 590-643A,C,D,G,H,T (6) Oral and Maxillofacial Surgery III Trauma
- 590-644A,B,C,D (3) Surgical Elective

Information for financial support for this course may be obtained by writing to the Director of the program.

Dr. Head and staff

7 Continuing Dental Education

Associate Professor — H.S. KATZ

CREDIT COURSES

At periodic intervals, the Faculty sponsors courses in Continuing Dental Education which are recognized for Continuing Dental Education credits by dental licensing bodies.

Generally the Faculty offers a series of courses in various clinical and basic sciences related to dentistry. These are provided in both small and larger group sessions to enhance the learning process. The courses are designed to meet the needs of dental practitioners and researchers, to keep them abreast of current concepts and practices and to make them aware of recent advances in dental science.

Enquiries should be directed to the Director of Continuing Education, Faculty of Dentistry, McGill University, 3640 University Street, Montreal, QC, H3A 2B2.
