T he Getty Museum, as only the Getty can, has the most ambitious plan: to be a cultural and artistic center for the 21st century. The museum, which opened in 1997, is the brainchild of J. Paul Getty, who founded the museum in his lifetime to house his vast collection of art. The Getty Museum is a complex of buildings, including the Getty Research Institute, the Getty Conservation Institute, the Getty Education Institute, the Getty Villa, the Getty Research Institute for the History of Art and the Humanities, and the Getty Center for the History of Art and the Humanities. The Getty Museum is located in Los Angeles, California, USA.

The Getty Museum is a major research institution throughout the planet of the center's library, collections, journals, and even a striping chamber where the library archives are preserved. It is the most thoroughly controlled topography of the history of ideas, from the ancient world to the present day. The museum is open to the public, and it is an important research center for the study of art and culture.

The museum houses a vast collection of art, ranging from prehistoric to contemporary, and includes works by artists from all over the world. The museum is open to the public, and it is an important research center for the study of art and culture.
