The third, too hot or too busy to scout out for your own? Fear not, the shopper: Now you can enjoy the ambience of your home office and conduct your shopping from the comfort of your official architectural research website.

Supervise in Detroit is a recent addition to the official Old Montreal website, a virtual reality venture that promises to revolutionize the way people envision old buildings and their architectural heritage.

The online tour of the city center's historic buildings is divided into sections, each providing a unique perspective on the city's architectural heritage. From the cosmopolitan ambiance of the Place d'Armes to the historic elegance of the Vieux-Marché, the tour offers a comprehensive look at the city's architectural history.

The flexibility of this virtual tour is unparalleled. You can select your own path through the city, choosing to visit the most famous landmarks or exploring the less traveled paths. The tour is also interactive, allowing you to zoom in on specific details, such as the intricate designs of the buildings.

In one example, you can see the detailed craftsmanship of the city's historic buildings, such as the Old Montreal City Hall, with its ornate ironwork and stained glass windows. The tour also includes a visit to the historic McTavish House, which was built in 1793 and is considered one of the oldest buildings in the city.

The tour is available on all devices and is accessible to anyone with an internet connection. It is a perfect way to explore the city's architectural heritage, even if you can't make it to Montreal in person.

Visit the official website to start your virtual tour of Old Montreal.
