## Graduate Certificate in Biologics Manufacturing

The **Graduate Certificate in Biologics Manufacturing** provides students with foundational knowledge and practical skills needed to support innovation in the rapidly expanding bio-industrial sector.

Combining core concepts in bioengineering, bioprocessing, data sciences and quality systems, the program equips learners to navigate the complexities of producing cell and gene therapy products, recombinant proteins, vaccines, and other advanced biologic therapeutics.

**Designed with flexibility in mind, the program is ideal for:**

- Recent graduates in (bio)engineering seeking specialization to access positions in the biologics manufacturing sector.
- Working professionals seeking to upskill or transition into the biologics sector through part-time study.
- Applicants from related fields such as Life Sciences, Pharmacology, Biochemistry, and allied disciplines.

**Deadlines to apply:**

- International - **JANUARY 15**
- Canadian/Permanent Resident - **JUNE 21**
