

Hiring Unit:

Biology Dept.

Course Title and Course Number:

BIOL 206 Methods in Biology of Organisms

Estimated Number of Positions:

1

Total Hours of Work per Term:

45

Position Summary:

Helping undergraduate students with basic statistics concepts, statistical computing and coding in R, by way of a virtual statistics help desk.

Qualifications:

Should be proficient in coding and running statistical analyses in R, in particular in data manipulation and visualization. Should have some experience and training in the fundamental statistical concepts and statistical tests (e.g. t-tests, ANOVA, linear regression). It is a bonus if the student has had experience in helping students remotely using zoom.
