Notes

- Do not use batteries supplied before using the camera for the first time.
- The LCD screen is manufactured using extremely high-precision technology so over 99.99% of the points are perfect working points. Some points (white, red, blue or green in color) that constantly appear on the LCD screen. These points are not a malfunction.
- The camera is a precision instrument. Be careful not to bump the lens or LCD screen, and not to apply stress to the camera from the lens portion being dropped, an impact, or vibrations such as when driving a car.
- Instructions not labeled as the ISO 3048 unless noted otherwise.

Additional information refers to product and answers to frequently asked questions can be found at our Customer Support Web site.

Preparations

1 Insert the batteries.

2 Turn the camera on/set the clock.

3 Insert a “Memory Stick Duo” (not supplied).

4 Select the image size for use.

Using batteries other than the supplied ones

You can use an HR-1 (HHR-1) (size AA) Alkaline battery (HR-1 (size AA) Alkaline battery)/Nickle Primary battery (∼1.5 V) as a "Memory Stick Duo" or "Memory Stick Duo" slot.

Using the AC Adaptor

You can connect the camera to a wall outlet (wall socket) using the AC-LS5K AC Adaptor (not supplied) → "Guide/Troubleshooting" (page 16).

To check the remaining battery level

Press POWER to turn on and check the level on the screen.

Battery charging indications

- Batteries are not charged Sufficient remaining battery
- Batteries are charged Battery half full Battery low, charge the batteries. (The CHARGE lamp lights.)

- Batteries are charged and inserted. 100% remaining Battery in use
- Batteries are not charged Sufficient remaining battery
- Batteries are charged and inserted. 100% remaining Battery in use

To charge the battery

Connect the camera to a wall outlet (wall socket) using the AC-LS5K AC Adaptor (not supplied) in any country or region where the power supply is within 100 V to 240 V AC, 50/60 Hz. Use a commercially available AC plug adaptor [a], if necessary, depending on the design of the wall outlet (wall socket).

Notes

- Remove the "Memory Stick Duo" cover.
- Open the "Memory Stick Duo" cover.
- The battery charge is not transferred to a commercially available AC plug adapter (A) (if necessary) depending on the design of the wall outlet (wall socket).

- When charging is insufficient, disconnect the power cord (mains lead) from the wall outlet (wall socket), and remove the Nickel-Hydride battery before the battery charge.

- Do not use the AC Adaptor to charge the Li-ion battery.

- The charging rate during the charging time is not consistent.

- When charging the battery, the CHARGE lamp may remain lit longer than six hours, but this is not a malfunction.

The CHARGE lamp may remain lit longer than six hours, but this is not a malfunction.

Troubleshooting

To turn off the power

Press the POWER button again.

If the camera is powered by battery power and you do not operate the camera for about three minutes, the camera turns off automatically to prevent wearing down battery power (Auto power off function).

Changing the language setting

You can change the desired display language to any one of nine languages in a specific language. To change the language setting, press MENU to display the menu screen. Select [ ] (Setup) with the control button, then select [Language] (page 23), and select the desired language → "User’s Guide/Troubleshooting" (page 85).

Step 1: Open the "Memory Stick Duo" cover.

Step 2: Insert a "Memory Stick Duo" (not supplied) into the "Memory Stick Duo" slot all the way in.

When there is no "Memory Stick Duo" inserted

The camera displays the back images using the internal memory (30 MB) → "User’s Guide/Troubleshooting" (page 20).
