**Booths:** At an in-person fair, a company would have 2 representatives (or more) at one table/booth. For the virtual fair we do not have tables, we have booths that can accommodate one company representative for the day. The standard package will come with 2 links to set up 2 company booths and the premium package will come with 5 links to set up 5 company booths. Each booth can accommodate up to 48 students in one-on-one chat sessions over the time period.

\*Promotion of Group Information Sessions: In order to promote your Group Info Session(s) (through social media & TechFair website) the details (date/time/description) must be provided to us by September 24, 2021 @ 5pm. Note this is only for Info Session promotion, employers are still responsible for Group Info Session logistics.
