

## **Advanced Course on Integrated Water Resources Management (IWRM)**

*Jointly offered by McGill University and the Caribbean Institute for  
Meteorology and Hydrology*

### **AGENDA**

Wednesday September 26<sup>th</sup>, 2007

### **CLIMATE CHANGE IMPACTS AND ADAPTATION**

- |                    |                                                                          |
|--------------------|--------------------------------------------------------------------------|
| 9:00-9:30          | Science of climate change (IPCC Fourth Assessment Report Findings)       |
| 9:30-10:00         | Impacts of climate change on water resources                             |
| <i>10:00-10:30</i> | <i>Break</i>                                                             |
| 10:30-12:00        | Climate impacts on available water in the Caribbean                      |
| <i>12:00-13:00</i> | <i>Lunch</i>                                                             |
| 13:00-13:30        | Adaptation to climate change                                             |
| 13:30-14:00        | Coping strategies (example of a vulnerability assessment)                |
| 14:00-15:00        | Breakout session on past experiences with climate, and coping strategies |
| 15:00-15:30        | Report back to group                                                     |
| 15:30-16:00        | Case studies (video) of adaptation in the Caribbean, from COP11          |
