

Brenda Milner Neuropsychology Day

Contest – Learning and Memory in the Human Brain Event

Join The Neuro in the 22nd Annual Neuropsychology Day and Brenda Milner Lecture by participating in a contest for high school and cégep students where students are invited to express in an artistic form what “Learning and memory in the human brain” means to them.

Competition: Help us in the understanding of learning and memory in the human brain.

As part of the 22nd Annual Neuropsychology Day and Brenda Milner Lecture, we are reaching out to you on behalf of The Neuro (Montreal Neurological Institute-Hospital). We invite high school and cégep students to enter our contest by submitting an artistic interpretation of what “Learning and memory in the human brain” means. The submitted pieces will be judged by graduate students in the Integrated Program in Neuroscience at McGill University.

All submitted pieces will be showcased on the dedicated website for the 22nd Annual Neuropsychology day and on The Neuro social media accounts. This is an excellent opportunity for aspiring young scientists to reflect on what learning and memory is and be exposed to cutting-edge research. We hope that this opportunity will inspire students to pursue studies, and perhaps even a career, in cognitive neuroscience.

Competition description - Applicants are asked take a photo of their artistic interpretations or submit a short-written piece (150 words max) in English or French. Examples of projects are a drawing, a painting or a poem.

Prize - Five winners each from the high school and cégep entries will be selected. The winners will:

Receive a certificate

- Be invited to attend the 22nd Annual Neuropsychology Day and Brenda Milner Lecture on May 25, 2021 which this year will be held remotely.
- Have the chance to learn from the recognized neuroscientists during the lectures offered at the Neuropsychology Day and Brenda Milner Lecture.
- Be invited to an informal virtual chat Zoom with current graduate students from The Neuro, to discuss and ask questions about science and pursuing advanced studies.
- Be featured on this website, at the pre-symposium event, and on The Neuro social media

How to submit - Review the rules and guidelines and submit your project using the submission form. (Mackenzie is trying to create the form or may reach out to you. The word form should be hyperlinked to the form)

Deadline - The deadline for the competition is April 23, 2021 at midnight. Applicants will be notified of selection results at the beginning of May. For any questions about the competition, you may contact gloria.castaneda@mail.mcgill.ca.
