

Armin Raznahan, MD, PhD
Chief of the Section on Developmental Neurogenomics, Human
Genetics Branch, NIH/NIMH

Armin Raznahan, MD, PhD, is a child and adolescent psychiatrist, and Chief of the Section on Developmental Neurogenomics (SDN). His research combines neuroimaging, genomic and bioinformatic techniques to better understand the architecture of human brain development in health, and in neurogenetic disorders that increase risk for psychiatric symptoms. Dr. Raznahan completed his undergraduate and graduate training in London, UK (Medicine and pediatrics at King's College University/ Hospital; psychiatry and the Maudsley Hospital), and then trained as a postdoctoral fellow with Drs. Jay Giedd and Judith Rapoport at the NIMH Intramural Research Program. Dr. Raznahan joined the NIH-Lasker Clinical Research Scholars Program in 2015, and became a tenured Senior Investigator at the NIMH IRP in 2020.
