

Scientists are Artists too!

ARTISTS AMONG US

Gault Nature Reserve special edition

Calling all Artists:

Does the **FOREST** inspire you? In honor of the 60th anniversary of the Gault Nature Reserve in Mont-Saint-Hilaire, a special edition of the Artists Among Us art exhibition will take place during the months of July and August 2018 at the Alice Johannsen Pavilion of the Reserve.

Artists Among Us is a McGill event that celebrates artistic careers, in which students, faculty, staff, alumni and retirees display their artwork, reminding the campus community how many of our members have parallel creative pursuits.

Scientists within the Faculty of Science (staff, students, alumni, retirees, etc.) are invited to submit a digital sample of their work.

Art works from any visual medium with a **FOREST** can be considered: textile art, sculpture, mosaics, photography, painting etc.

Please email your interest, short bio, medium, sample of your work, and questions to Susan Molnar : susan.molnar@mcgill.ca, by April 6th 2018.
