

2017 Global Child Health Skills Conference

November 9-11, Montreal

Brought to you by the McGill
Global Child Health Program:

The Global Child Health Program (GCHP), within the McGill Department of Pediatrics, is coordinated by a multidisciplinary committee wishing to broaden the Montreal Children's Hospital's involvement in Global Health activities.

For more information, contact
Gillian Morantz
gillian.morantz@mcgill.ca

The second annual Skills Conference provides hands-on training for pediatric health care workers in preparation for work in resource-limited settings.

WHERE:

McGill Simulation Centre and the Montreal Children's Hospital

WHAT:

November 9: **Pediatric Ultrasound for Resource-Limited Settings**

November 10:

Helping Babies Breathe (HBB) : previous NRP certification required
Emergency Triage, Assessment & Treatment (ETAT): previous PALS certification required

November 11: **Multiple workshops related to work in Resource-Limited Settings**, including sedation, ethics, nursing skills and creative solutions for limited materials

Register for one or more of the sessions at:

<https://global-child-health-skills-conference.eventbrite.ca>

Spots are limited!
