

SYMPOSIUM ON COGNITIVE NEUROSCIENCE OF AGING AND DEMENTIA

Towards consensus definitions of key terms in the cognitive neuroscience of aging and dementia

Wednesday, 31 May 2017 from 8:00 AM to 1:00 PM

Thomson House, Ballroom (3rd Floor)

McGill University,
3650 McTavish
Montreal, Quebec
H3A 1Y2 Canada

INVITED SPEAKERS:

Cheryl Grady
University of Toronto

Roberto Cabeza
Duke University

Patricia Reuter-Lorenz
University of Michigan

Audrey Duarte
Georgia Institute of
Technology

Natasha Rajah
McGill University

Lars Nyberg
Umea University

Ulman Lindenberger
Max Planck Institute for
Human Development, Berlin

Michael Rugg
University of Texas

Denise Park
University of Texas

Fergus Craik
University of Toronto

Sylvie Belleville
Institut Universitaire
de Gériatrie de Montréal

Marilyn Albert
Johns Hopkins
School of Medicine

DESCRIPTION:

Please join us at 8am, May 31, 2017 at Thomson House, McGill University for a morning symposium on the Cognitive Neuroscience of Aging and Dementia. Leading international researchers in the field will each give 20 minute presentations that focus on operationally defining key terms used to explain age- and dementia-related changes in brain structure and function, i.e. compensation, maintenance, dedifferentiation, reserve and plasticity. Presentations will be followed by a panel discussion. The event will be hosted by Natasha Rajah and Roberto Cabeza. This event is free but registration is required at: <https://www.eventbrite.ca/e/symposium-on-cognitive-neuroscience-of-aging-and-dementia-registration-31130560344>
