

UNDERSTANDING PRIMARY CARE RESEARCH IN CANADA TODAY

Workshop

Dr. Bartlett will provide an interactive presentation on primary care research with a focus on the Quebec and Canadian Health Care Systems. As part of the initial presentation, Dr. Bartlett will also elaborate on the Canadian Institutes for Health Research Strategy of Patient Oriented Research with a particular emphasis on the Primary and Integrated Health Care Innovations Network. This is an excellent opportunity for researcher at every level as well as those interested in primary care research to gain a greater understanding of the current Canadian primary care research environment, recruit new trainees and network. Everyone is welcome but registration is mandatory.

Places are limited, please register before January 23

Questions or registration: research.fammed@mcgill.ca
