Notes:

1) **Technical Complementary** courses are selected from an approved list given on the next page.

2) The **Complementary Studies (CS)** courses are *Impact of Technology* courses (Group A) and *Humanities & Social Sciences, Management Studies and Law* courses (Group B). Students **must take one course (3 credits) from Group A and one course (3 credits) from Group B**. The curriculum above includes suggested terms during which these courses can be taken. These must be chosen from an approved list under "Complementary Studies", found in the Program Requirements in the Faculty of Engineering Undergraduate section of the *Programs, Courses and University Regulations* publication - www.mcgill.ca/study (Go to Browse by "Faculties & Schools" to see your program listing).

Students are responsible for satisfying pre-/co-requisites and verifying with their department that they are meeting the requirements of their program.

Technical Complementary Courses - Chemical Engineering

A minimum of 9 credits of technical complementary courses must be chosen from a list of technical complementaries approved by the Department. The purpose of this requirement is to provide students with an area of specialization within the broad field of chemical engineering. Alternatively, some students use the technical complementaries to increase the breadth of their chemical engineering training.
