

Course: chemistry 183-Chemistry of Drugs
Instructor: David harpp and joe Schwarcz and jonathan jarry
Instructor email: David.harpp@mcgill.ca

Brief course description: The simple chemistry of drugs from history to modern times and their effect on everyday life

Method of Delivery: zoom lectures

Evaluation Scheme: 2 midterms at 30% each and a final at 40%

Example:

Course: CHEM 213
Instructor: Amy Blum
Instructor email: amy.blum@mcgill.ca

Brief course description:

This course will give an overview of physical chemistry concepts surrounding energy and apply them to relevant problems such as combustion, material properties, and batteries. We will place phenomenological observations of the world into quantitative terms that enable us to predict events and behaviors, ultimately enabling the design of modern materials and devices.

Method of Delivery:

Recorded content videos with live problem solving/tutorial sessions

Evaluation Scheme:

25% Weekly short quizzes (12, drop 2)
25% Online midterm 1 Oct 8
25% Online midterm 2 Nov 19
25% Final project: Thermodynamics and technology
