

Course: Chemistry 591, Bioinorganic Chemistry
Instructor: Professor Scott Bohle
Instructor email: scott.bohle@mcgill.ca

Brief course description: The chemistry of inorganic elements in life is examined in detail with the aim of developing the rationale for which elements are found in which biochemistry. Enzymatic, structural, physiological, and genetic roles will all be covered.

Method of Delivery: Either in person or on line seminar sessions.

Evaluation Scheme:

Midterm exam:	25 %
Problem sets, 2,	20%
Practical exercise,	15%
Research proposal,	15%
Ffinal exam,	25%.
