

Name of Organization/unit: Food Bundles

Background Information

Full Address of organization/unit: KK 19AV, KK 340 St, House 2, Kicukiro, Kigali, Rwanda
<https://www.food.rw/>

Description of your organization:

Food Bundles is an Agri-tech startup. We are building digital solutions designed to optimize fresh food distribution, sold in bundles, to consumers in cities using low resource technology. By digitizing the supply chain, Food Bundles creates a transparent, resilient, and sustainable market for smallholders. This helps to reduce post-harvest loss, increase farmers' income, and avails affordable, nutritious, fresh food to consumers in cities.

Contact Name: Dioscore SHIKAMA, CEO

Placement Description & Logistics:

Internship Position: Front-End Developer Intern

Description	Internship Tasks	Expected Outputs
<p>We are looking for a Front-End Web Developer who is motivated to combine the-art-of-design with the-art-of-programming. The Front-End Web Developer will join our team of developers to build up front end templates (HTML, CSS/SASS, JavaScript and jQuery) that work across all major browsers and devices (android and iOS).</p> <p>The intern will be responsible for ensuring the alignment of web design and optimizing landing pages for our clients for maximum efficiency as well as maintaining brand consistency across all pages.</p>	<ol style="list-style-type: none"> 1. Understand the mission and operation of Food Bundles. 2. Create user-friendly web pages using markup languages (HTML, CSS/SASS, JavaScript and jQuery). 3. Determine the structure, design, and responsiveness of landing pages. 4. Optimizing speed and scalability, and maintaining brand consistency and integrity throughout landing pages. 	<ol style="list-style-type: none"> 1. Presentation on the activities, operations, and opportunities at Food Bundles. 2. A new, improved, and user-friendly front-end web page accessible to Food Bundles' users. 3. A report detailing the structure, design, and responsiveness of landing pages. 4. Responsive (mobile app, web app), consistent (branding and colour codes), and scalable landing features for the

	<p>5. Build reusable code and libraries for future use.</p> <p>6. Ensure validation of user inputs before submitting to the back end.</p>	<p>designed mobile and web applications.</p> <p>5. Repository of reusable code and libraries as needed.</p> <p>6. Validated user inputs and APIs to the back-end team</p>
