Contact Name/ Supervisor: FOADEY Valdès

Placement Description & Logistics:

Nature of Internship: Hybrid

Title of Internship Position: Full-stack web developer

Role Description: The intern will develop web applications for customers of diverse sectors and adapt to their different requirements. Apart from web development skills, the intern will also benefit from an immersion in teamwork and the application of agile methods in real life. We believe that everyone, regardless of their level, has a wealth of knowledge and that sharing and opening up is the way to make it shine. We therefore expect to receive from the trainee as much as we give to him/her like a family.

Task	Internship Tasks	Expected Outputs (Deliverables)
1	Understand the role and functioning of our web developer team.	A brief document overview of how the team works (technologies used, work methods, ...) and a presentation of a small application if the intern do not have a mastery of the technologies used by the team before arrival

2	Assist other team members on specific development projects.	A specification of web application whose functionalities will depend on the projects.
3	Perform functional tests on the developed applications.	A document or list of all the tests performed and their results.
4	Research and identify potential customers for the driving school management software "BroomBroomCar"	A summary list of potential customers.

Additional Information:

Number of Interns: 4

Proposed Start Date: any date

Proposed End Date: any date

Number of Work Hours per Week: 40 hours per week.

Additional Information: Intern will work from home on Fridays.
