**Title:** Tooth defects reflect genetic disorders affecting bone mineralization

**Speaker:** Dr. Catherine Chaussain,  
Professor  
University Paris  
Descartes Dental School  
France

The presentation will describe tooth defects in hypophosphatemic rickets and osteogenesis imperfecta. It will demonstrate that the tooth constitutes a useful model for the better understanding of pathogenetic mechanisms associated with these genetic disorders.

**Time & Place:**  
Tuesday, April 3, 2012  
11:30 a.m. in the Rogers Faculty Council Room (M/48)  
3640 University St., Strathcona Anatomy & Dentistry Bldg.

Small lunch served. All are welcome. Host: Dr. Marc McKee at (marc.mckee@mcgill.ca)
