Introduction

This report includes publications authored by researchers affiliated with the Research Institute of the McGill University Health Centre (RI MUHC) and by researchers affiliated with the Montreal Neurological Institute (MNI), who are also affiliated with the MUHC Department or Medicine.

The following categories of publications are included. For all categories, one of the main sources of information is researcher CV (see Annex for list in researchers having provided an updated CV). To validate CV information, other sources were consulted, depending on publication type, as per below:

<table>
<thead>

Publications are grouped according to first RI MUHC author. Authorship priority rule used to attribute publication to first RI MUHC author is as follow⁸:

- First author in authorship list, then last, then second, third, etc.

Applicability of this priority rules remains to be validated with the authors of each publication.

References are also sub-divided according to publication type group; groups are illustrated in table above with thicker borders.
