10 days that will last a lifetime

Unique to the Desautels MBA program, our integrated 10-day organized study course will provide you with an unparalleled opportunity to adopt a worldly outlook.

This course will find you and your entire cohort visiting an international city renowned as a significant business destination.

You and your classmates will have the opportunity to visit multiple companies, meet with senior executives, and truly experience business in that country.

You will be exposed to the fundamental issues an organization needs to consider when entering a foreign market and the challenges involved in operating an international business. These encompass the strategic issues as to “why” and “where”, as well as more tactical issues that address the “how” to enter and operate in a foreign market. As a built-in component to the curriculum, this unique course and the international settings afford exploration of all the learning covered in the first year of the program.
