Skip the Waitz

With this Library app

Waitz uses custom sensors to anonymously pick up laptops, cell phones, and other devices to estimate the number of people and provide real-time occupancy data for study spaces.

By using this app, students are able to see how busy McLennan-Redpath is before heading to campus.

A screenshot of the McGill Library Sofia search interface, enclosed in a red rectangular border. The interface features a search bar with a blue button labeled "Search" and a dropdown arrow, followed by a text input field containing the placeholder text "(Books, media, etc.)". To the right of the input field is a blue button labeled "Go". Below the search bar, the text "Searching McGill Library holdings with the [Sofia Discovery tool](#)." is displayed, followed by a link to "Advanced Search". At the bottom, there is a link to "WorldCat Discovery FAQ and feedback".
