

URBAN ECONOMICS

Instructor:

Professor Nicolas Gendron-Carrier

E-mail: nicolas.gendron-carrier@mcgill.ca

Office Hours: Thursday, 14:00-15:30, Leacock 543.

Teaching Assistant:

Minho Kim (minho.kim2@mail.mcgill.ca)

Prerequisites:

You should have completed a course in microeconomic theory (ECON 230D or 250D) and economic statistics (ECON 227D or 257D). A few lectures will use calculus, but math beyond algebra will not be used extensively. We will be looking at a lot of regression results, so you should have a basic understanding of what regression coefficients mean before taking this course.

Course Overview:

The goal of this course is to give students an understanding of how economists think about cities. We will explore why cities exist, their internal structure, and analyze a variety of policy issues related to cities.

Course Materials:

Jan K. Brueckner's *Lectures on Urban Economics* will serve as a textbook for the course. This book is available at the bookstore and online. I also recommend reading Edward Glaeser's *Triumph of the City* as we go along. Lecture slides and all required readings except the textbook will be posted on *myCourses*.

Electronic Communications:

All class announcements will be posted on *myCourses*.

In order to help me get to know you better, I encourage you to ask questions related to the class material in class or during office hours.

For all administrative issues, please first contact the TA. The TA is your first point of contact and will communicate important matters to me. Questions that are personal in nature can be sent to me by e-mail. E-mails should be sent from your official McGill e-mail address only and include [ECON 348] in the subject line. I will normally reply to e-mails within 48 hours, except on weekends. I may not respond to e-mails related to the class material or administrative issues covered in the syllabus and on *myCourses*.

Format:

Lectures will take place in-person unless instructed otherwise. The TA will occasionally hold tutorials (either in-person or on Zoom). In these sessions, the TA will answer questions about the class material and go over solutions to the midterm exams. I will also be available during office hours every week to answer questions about class material.

In the event a lecture or tutorial takes place on Zoom, please familiarize yourself McGill's [Remote Learning Resources](#). You will be notified through a pop-up box in Zoom if a session is being recorded. By remaining in sessions that are recorded, you agree to the recording, and you understand that your image, voice, and name may be disclosed to classmates. You also understand that recordings will be made available in *myCourses* to students registered in the course.

Evaluation:

Midterm I (25%): To be held in-person on Thursday, October 5.

Midterm II (25%): To be held in-person on Thursday, November 9.

Final (50%): To be held in-person during the final exam period.

Please note that work submitted for evaluation as part of this course may be checked with text matching software within *myCourses*.

Make-up Exams:

You may only miss an exam for a documented family or medical emergency. If you miss a midterm exam, you must hand me an original physician's note within 7 days of the date of the exam which explains the medical reason for your absence. No make-up exams are possible for the midterm exams. If you miss a midterm exam for a documented family or medical emergency, the exam's weight will be reallocated to the final.

Re-read Policy:

We do our very best to ensure fair grading and to minimize errors. Nevertheless, if you disagree with the grade you have received in your exam, you may opt to have your exam re-read. Before you do, please make sure you first carefully compare your answers to the solutions we provide.

To request a re-read, you must submit to me (the instructor, not the TA) your exam with a written justification for the re-read, specifying the question which you felt was incorrectly graded. This written request for re-read must be submitted within 7 days of receiving the exam. I will then re-read and reassess the answer. Please note that I may review the entire exam. As a result, your grade may go up, down, or stay the same. Policies on final exam re-reads are determined by the Faculty of Arts.
