

MCGILL UNIVERSITY
Department of Kinesiology & Physical Education

EDKP 204 Health Education

Fall 2022
Course Outline

Prof. Jordan Koch, PhD

Email: jordan.koch@mcgill.ca

Office Hours: Upon Appointment

Lecture: T/Th 8:35~9:55am in Currie 305/6

Lab: Th 10:05~10:55am in Currie 124/3

Teaching Assistant:

Sandrine Servant

sandrine.servant@mail.mcgill.ca

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst many First Nations including the Kanien'kehà:ka of the Haudenosaunee Confederacy, Huron/Wendat, Abenaki, and Anishinaabeg.

Course description: This course aims to provide students with a critical framework for understanding health and wellness concepts, health-related issues, and health education in Canada. Special attention will be paid to the teacher's role in the development of a total school health program at both elementary and high school levels.

Course Format: This course is formatted in a way that allows for both classroom experiences as well as seminar experiences related to the content of the course. The seminar experiences will take place in the gymnasium and other alternative environments.

Learning Outcomes: At the end of the course students should be able to:

1. Understand the value of kinesthetic learning.
2. Explore and demonstrate possibilities for kinesthetic teaching.
3. Understand the history of health and wellness movements in Canada.
4. Examine health-related issues and health education in Canada.
5. Critically analyze how peoples' health and wellness connects to broader social issues.

The MELS professional teaching competencies and Course Learning Outcomes:

Although the thirteen professional competencies endorsed by the MELS are interrelated, this course will help students to develop the following competences in particular:

Competency 3: *Plan teaching and learning situations.*

Competency 4: *Implement teaching and learning situations.*

Competency 6: *Manage how the class operates.*

Competency 7: *Take into account student diversity.*

Competency 11: *Commit to own professional development and to the profession.*

Competency 12: *Mobilize digital technologies.*

Course content:

The content for this course will be disseminated in a variety of different ways. For example, you will be expected to participate in class discussions, read peer-reviewed research articles, watch videos, and listen to podcasts about health and wellness. You will also be required to scrutinize these resources and, when necessary, challenge and replace inadequate content with more sophisticated arguments rooted in evidence.

*All required content will be posted on myCourses.

Participation & attendance policy:

I see you as colleagues. As far as I am concerned, one day you and I may be teaching side-by-side in the same place. My expectations for you, and for myself, are extraordinarily high. I expect that we conduct ourselves as professionals would in any school setting. Therefore, your attendance and active engagement during lectures is required. Proper attire and active participation are also strongly encouraged during our seminar experiences. Attending classes, being on time and well-prepared, is a given. Although I don't feel I should have to, I provide specific expectations below.

An email to myself and your group prior to a missed class or seminar experience is required.

After two missed classes, we will have a conversation to see if further work needs to be completed to meet course requirements.

Opportunities to Demonstrate Learning:

TEAM TEACHING DEMO ~ 25%

Creating the kinesthetic classroom:

The physical body as a “tool of inquiry” and “vector of knowledge” (Wacquant, 2004) is largely marginalized in today's schools. Although the body figures prominently in both physical and health education curricula, the relationship between ‘health education’ and ‘physical education’ remains strained in the sense that both employ the body in vastly different ways. As physical and health educators, you are in a unique position to challenge this dichotomy by liberating the physical body from the fringes of school curricula.

Team Teaching Demo:	25%
Peer Teaching Reflections:	5%
Team Video Presentation:	20%
MELS PC Assessment:	10%
Midterm Exam:	20%
Final exam:	20%
Total:	100%

In groups of three, you will prepare and present a teaching demonstration to your peers on an identified health content area (**pre-approved by me at least one week prior to your teaching demo**). The content you present may be either general or specific (e.g., mental health or schizophrenia). Here's the rub... You must teach this content kinesthetically, i.e., in a manner that illustrates how *embodied* learning can be utilized to advance student knowledge in a subject area that has traditionally privileged *disembodied* pedagogy. Your lesson should last approx. 30minutes to ensure adequate time for constructive peer-feedback. Presenters must also ensure that ALL equipment needed to teach your lesson is ready for the start of class and returned to the equipment room in a timely fashion.

All presentations will take place during lab time on Thursdays at the Currie Gym (10:05-10:55am).

*Other assignment details posted on myCourses.

Peer-Teaching Reflections ~ 5%

Offering constructive feedback to your students is important as a teacher. It is also important to acknowledge that, as teachers, we may at times hold differing opinions about the quality of students' work. Thus, to democratize this course's evaluations, you and your classmates will be required to provide short (but insightful) feedback to your peers about the quality of their teaching demos. Your feedback should focus on how the various teachers/presenters could have enhanced their demonstration. A total of 8 team teaching demos are scheduled throughout the semester and you will be free to use your top 7 reflection scores (graded on a scale of 0-5 each week).

TEAM VIDEO PRESENTATION ~ 20%

In groups of four, you will research, construct, display, and defend a research/video presentation that analyzes a specific social/health issue linked to the COVID-19 pandemic.

- E.g., how has the COVID-19 pandemic impacted mental health? Physical health? The environment? In what ways has the pandemic cut differently across race, class, and/or gendered lines? How has the pandemic affected the intellectual health of students, parents, older adults, etc.? (You get the picture...).
- Your topic must be pre-approved by your TA **by no later than October 6th, 2022**.

Your pre-recorded video will be shown in-class during the last 2 weeks of class (**Nov. 24th, 29th, & Dec. 1st**), followed by a 3-minute Q & A in which **all team members must be present**, unless otherwise pre-approved by your instructor.

Structurally, your video will include:

- 1) A short 10-minute analysis (with a thesis statement) of the pandemic's impact upon a specific social issue linked to public health.
- 2) Your video **must** be grounded in both academic (i.e., peer-reviewed) and empirical resources. References/work cited must also be listed in the credits of your video.
 - A minimum of **THREE** peer-reviewed scholarly references are required.
- 3) You should frame/communicate your argument using a series of creative cues (e.g., PowerPoint slides, photographs, graphs, etc.) that enhance your team's argument while engaging your audience visually.

*Other assignment details posted on myCourses.

MELS PC ASSESSMENT ~ 10%

During your teaching practicums, your MELS professional competencies are assessed by both your CT and your university facilitator. These competencies will also be used in your post-graduation teaching assessments and include proficiencies such as: *To commit to own professional development and to the profession*. In EDKP 204, you will also be expected (and evaluated upon your ability) to demonstrate PCs by: arriving to class on-time, being well-prepared, and by engaging your peers in respectful and thought-provoking dialogue.

* Due: last day of class (printed and submitted in-person)

*See rubric posted on myCourses for further information.

MITERM AND FINAL EXAMS ~ 20% each

Your mid-term and final exams (*conceptually cumulative) provide an important opportunity for you to demonstrate your comprehension of both in-class sessions and of other assigned materials. More specific details will be provided throughout the semester to help focus your preparation.

Midterm Exam

In-class: Thursday October 6th, 2022 @ 8:35am.

Final Exam

In-class: Thursday November 17th, 2022 @ 8:35am.

Late Assignments:

Assignments are expected to be prepared for the start of class unless otherwise stated. Late assignments will be docked 10% per day late, including weekends.

University Grading Scale

<u>Letter Grades</u>	<u>Percentages</u>
A	85-100
A-	80-84
B+	75-79
B	70-74
B-	65-69
C+	60-64
C	55-59
D	50-54
F (fail)	0-49

McGill University Policy on Academic Conduct: McGill University values academic integrity. Therefore, all students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the Code of Student Conduct and Disciplinary Procedures (see www.mcgill.ca/students/srr/honest/ for more information). L'université McGill attache une haute importance à l'honnêteté académique. Il incombe par conséquent à tous les étudiants de comprendre ce que l'on entend par tricherie, plagiat et autres infractions académiques, ainsi que les conséquences que peuvent avoir de telles actions, selon le Code de conduite de l'étudiant et des procédures disciplinaires (pour de plus amples renseignements, veuillez consulter le site www.mcgill.ca/students/srr/honest/).

© Instructor generated course materials (e.g., handouts, notes, summaries, exam questions, etc.) are protected by law and may not be copied or distributed in any form or in any medium without explicit permission of the instructor. Note that infringements of copyright can be subject to follow up by the University under the Code of Student Conduct and Disciplinary Procedures.

The course is on myCourses. Students are expected to regularly check myCourses for course updates and information, especially the calendar. As well, students are encouraged to read and print out a copy of each day's lecture prior to class.

Special Circumstances: As the instructor of this course, I endeavour to provide an inclusive learning environment. However, if you experience barriers to learning in this course, do not hesitate to discuss them with me and the *Office for Students with Disabilities*, 514-398-6009.

Mobile Computing and Communication Devices: Any surfing of the internet during lectures that is not directly related to the class discussion is distracting and is strictly forbidden. Additionally, the use of any electronic devices for emailing, texting, etc., is strictly forbidden.

To protect your privacy, the Faculty of Education will only reply to you at your official e-mail address at McGill. Please be sure that you check your McGill e-mail on a regular basis.

In accord with McGill University's Charter of Students' Rights, students in this course have the right to submit in English or in French any written work that is to be graded.
