

Cold Room Safety & Hygiene

Room Number _____

Name and Phone Number(s)
of Person(s) Responsible

Cold Room Regulations:

1. Clean bench tops and shelf surfaces after all procedures.
2. Keep room tidy.
3. Do not store cardboard, paper or other porous organic materials in cold rooms. Change absorbent padding whenever soiled, and at least once a week.
4. Clean up spills immediately.
5. Report all maintenance problems (dripping faucets, water leaks, condensation problems, compressor failures, etc.) to Facilities Management (local 4555) promptly.
6. Identify everything, i.e., tag all specimens and apparatus with the name of the owner.
7. Keep materials off the floor to facilitate regular floor cleaning.
8. Keep door closed to avoid condensation on interior surfaces.
9. Do not store flammable or other volatile materials (including dry ice, liquid nitrogen or other cryogenics), as this room was not designed for such purposes.
