

# SCHOOL OF ARCHITECTURE

McGill University's School of Architecture has trained and inspired some of Canada's leading architects and educators for 115 years, including Arthur Erickson, Moshe Safdie, Raymond Moriyama, Melvin Charney, Alvin Boyarsky and Adam Caruso. If you hold a Bachelor's degree in Architecture, and are looking to deepen your understanding of the field, the McGill School of Architecture offers professional and post-professional Master's degrees, as well as a PhD program. The professional MArch program (accredited by the Canadian Architectural Certification Board) emphasizes methodologies, creative practices, and design-based speculation supported by advanced technologies. Students in the post-professional programs specialize in the history and theory of architecture, culture and technology, and urban design and housing. PhD scholars work alongside our Professors to deepen inquiry into a research area of their interest.
