Callaghan Wilmott – Mechanical Engineering, Fall 2019

Inti Aerospace is a data services company, utilizing proprietary solar drone technology to provide large-scale, precision surveying to the agricultural industry.

Odero Otieno - Comp.Eng+MTE, Winter 2020

DawaSwift is a medical product delivery software company which leverages artificial intelligence technology on its web & mobile app based platform.

JobeLink

Ebou Jobe - Software Eng., Fall 2019

JobeLink is a software application that will bring together restaurants and part-time job seekers like students, to reduce mismatches between demand and supply of labor.

Entrepreneurship-in-Action Speaker Series

You are invited to hear our student entrepreneurs talk about their tech start-ups and what they did over the summer to further develop them.

Refreshments will be provided.

Date: Monday, September 24, 2018

Time: 5:30-7:00PM

Location: MD267

RSVP required: <http://engineering.myfuture.mcgill.ca>
