All exchange partners on this list are commonly selected by Engineering students. Therefore, interested students may find more information about these schools that can help them prepare for their exchange term (e.g. Experience reports, approved courses on the Course Equivalency System etc). Please be advised that not all schools offer all Engineering programs or a wide course selection for each program. Students have to ensure that the selected partner is a good fit for their program and the selected exchange term before applying for an exchange. *All institutions will require some advanced planning to ensure Accreditation Units (AUs) are being met.*

Engineering students can also select other partners from the full list of partner institutions as long as they are coded as “General” or “Engineering” partners. Full list of exchange partners can be found here: <https://www.mcgill.ca/students/international/students-going-abroad/where-can-i-go>
