

Post-Doctoral Fellowship in Maternal and Perinatal Health at Stanford University School of Medicine

We are seeking an individual with training and experience in epidemiology or a related field (PhD or PhD/MD) for a postdoctoral fellowship related to maternal and perinatal health; the primary mentor is Professor Suzan Carmichael. This postdoctoral research opportunity will be focused primarily on maternal health outcomes in the United States, with a particular emphasis on severe maternal morbidity, maternal nutrition and weight, health care, social determinants, and/or disparities. The post-doc will have the opportunity to collaborate with a variety of epidemiologists, clinician-scientists, biostatisticians, and social scientists at Stanford University as well as other institutions. The post-doc will be located at the Stanford School of Medicine and have opportunities to be involved with a variety of other groups at Stanford such as the California Maternal Quality Care Collaborative (CMQCC), the California Perinatal Quality Care Collaborative (CPQCC), the Center for Population Health Sciences, the Center for Policy, Outcomes and Prevention (CPOP), and the March of Dimes Prematurity Research Center.

The ideal candidate will be interested in an academic research career conducting epidemiologic research related to reproductive, maternal, and infant health outcomes. The candidate will be familiar with statistical software, (e.g., SAS, R), have strong training in quantitative epidemiologic methods (e.g., causal inference methods, Bayesian methods), have strong written and interpersonal communication skills, and be highly motivated to make a difference in maternal and perinatal health. Applicants need not have completed their doctoral training prior to applying, although training must be completed prior to the start of the fellowship.

Interested applicants should submit: 1) Curriculum vitae, 2) a cover letter describing research interests to be pursued during training, 3) one lead-author published or unpublished manuscript, and 4) names of two references. Applications received before **July 1, 2019** will be given priority, but applications will be accepted until the position is filled. Anticipated start date is early fall 2020 but is flexible.

Additional Information

Faculty Sponsor: Suzan Carmichael, PhD, MS
Professor
Department of Pediatrics (Neonatology)
Department of Ob/Gyn (Maternal-Fetal Medicine and Obstetrics)
Department of Epidemiology and Population Health, by courtesy
Fellow, Center for Population Health Sciences
Stanford University School of Medicine, Stanford, CA

Group and Department Web-Sites: [Dept. of Pediatrics](#), [Dept. of Ob/Gyn](#), [Dept. of Epidemiology & Population Health](#), and [Center for Population Health Sciences](#)

Postdoc Appointment Term: One year, with option to extend by mutual arrangement

Appointment Start Date: September 1, 2020 (negotiable)

How to Submit Application Materials: Please email materials to Ms. Anna Lue, aclue@stanford.edu
