

Postdoctoral position in epidemiology and public health

The Department of Population-Based Medicine at Tübingen University invites applications for a postdoctoral fellowship in epidemiology and public health. The University Hospital of Tübingen is a leading center of German university medicine, treating approximately 75,000 inpatients and about 380,000 outpatients annually. Tübingen is a beautiful and lively medieval town with a large university population located in southern Germany.

The successful candidate will take a leading role and contribute to multiple projects. The goal of our research is to better understand the role of behavioural, psychosocial, and biological risk factors for the development of chronic conditions (e.g., diabetes, cardiovascular conditions) and poor health outcomes in people with chronic conditions. Applicants will have the opportunity to develop new project ideas with research collaborators internationally (e.g., using existing data and publicly available datasets). As a member of a multi-disciplinary research team, the candidate will be involved in aspects of study design, study coordination, data analyses, publications, and knowledge dissemination.

The working language in the group is English, and we welcome applications from international applicants.

Qualifications and Skills:

- Doctoral degree in epidemiology, biostatistics, public health, or related field, with experience in behavioural or psychosocial research
- Highly motivated, curious, project-, task- and team-oriented
- Experience with advanced methods of statistical analysis of epidemiologic data
- Demonstrated publication record in health sciences
- Ability to work collaboratively; experience working with multi-disciplinary teams and building professional networks
- Excellent written and oral communication skills in English
- Strong organizational skills

Start Date:

Start date is flexible, and applications will be considered on a rolling basis.

Application:

Cover letter describing research experience and interests, CV, list of references and contact information. Documents and inquiries must be sent via email to

Dr. Norbert Schmitz, Professor and Director, Department of Population-Based Medicine, Faculty of Medicine, Tübingen University, Tübingen, Germany:
