POSITION AVAILABLE: Postdoctoral Fellow

A postdoctoral fellowship is available at McGill University, in the research laboratory of Dr. Mark Eisenberg (Centre for Clinical Epidemiology of the Lady Davis Institute, Jewish General Hospital, Montreal, QC). Dr. Eisenberg’s research includes knowledge syntheses and clinical trials in public health (e.g., smoking cessation, e-cigarettes, cannabis legalization) and interventional cardiology.

The postdoctoral fellow will have access to data from a randomized controlled trial of nicotine and non-nicotine e-cigarettes for smoking cessation (NCT02417467). This trial has completed enrollment, and will have full follow-up in September 2020. There are a number of secondary research questions which could be assessed using these data.

Primary responsibilities:
- Identify and develop research questions and study designs;
- Lead knowledge syntheses and conduct analyses related to the completed trial;
- Write manuscripts as lead author;
- Provide mentorship to junior trainees on the research team;
- Collaborate with research team members and trial investigators; and
- Present findings at scientific conferences.

Qualifications:
- Recent PhD in epidemiology, public health, or a related field.
- Prior experience conducting statistical analyses in SAS, Stata, or R.
- Excellent writing skills in English.
- Prior experience with grant applications is an asset but not required; the fellow will have the opportunity to develop grant-writing skills.

To apply: Send a cover letter, CV, unofficial transcript, and up to three (3) writing samples to:

Mark J. Eisenberg, MD MPH
c/o Sarah Windle, MPH
sarah.windle@ladydavis.ca

Applications will be accepted until the position is filled.
